The use of joist hangers provides a quick, economic and reliable method for forming timber-to-timber joints and for supporting timbers on masonry or steel beams. Although their installation is less dependent on traditional trade skills, care must be taken

when specifying and fitting joist hangers. This guide is for building designers, contractors and site supervisors. It shows how to use hangers to support timber joists in new construction work, and stresses the importance of correct specification and installation to ensure good performance. This guide replaces BRE Defect Action Sheets 57 and 58, which have been withdrawn.
