 Winner of the 2014 John Collier Jr. Award

 Prize Life at Home in the Twenty-First
 Century cross-cuts the ranks of important
 books on social history, consumerism,
 contemporary culture, the meaning of
 material culture, domestic architecture,
 and household ethnoarchaeology. It is a
 distant cousin of *Material World* and
Hungry Planet in content and style, but
 represents a blend of rigorous science and
 photography that these books can claim.
 Using archaeological approaches to
 human material culture, this volume offers
 unprecedented access to the middle-class

American home through the kaleidoscopic
 lens of no-limits photography and many
 kinds of never-before acquired data about
 how people actually live their lives at
 home. Based on a rigorous, nine-year
 project at UCLA, this book has appeal not
 only to scientists but also to all people who
 share intense curiosity about what goes on
 at home in their neighborhoods. Many who
 read the book will see their own lives
 mirrored in these pages and can reflect on
 how other people cope with their
 mountains of possessions and other daily
 challenges. Readers abroad will be equally
 fascinated by the contrasts between their
 own kinds of materialism and the typical
 American experience. The book will
 interest a range of designers, builders, and
 architects as well as scholars and students
 who research various facets of U.S. and
 global consumerism, cultural history, and

economic history.

Narrative Architecture explores the
 postmodern concept of narrative
 architecture from four perspectives:
 thinking, imagining, educating, and
 designing, to give you an original view on
 our postmodern era and architectural
 culture. Authors Sylvain De Bleeckere and
 Sebastiaan Gerards outline the ideas of
 thinkers, such as Edmund Husserl, Paul
 Ricoeur, Emmanuel Levinas, and Peter
 Sloterdijk, and explore important work of
 famous architects, such as Daniel
 Libeskind and Frank Gehry, as well as
 rather underestimated architects like

Günter Behnisch and Sep Ruf. With more than 100 black and white images this book will help you to adopt the design method in your own work.

Design Materials and Making for Social Change spans the two interconnected worlds of the material and the social, at different scales and in different contexts, and explores the value of the knowledge, skills and methods that emerge when design researchers work directly with materials and hold making central to their practice. Through the social

entanglements of addressing material impacts, the contributors to this edited volume examine homelessness, diaspora, migration, the erosion of craft skills and communities, dignity in work and family life, the impacts of colonialism, climate crisis, education, mental health and the shifting complexities in collaborating with and across diverse disciplines and stakeholders. This book celebrates the role of materials and making in design research by demonstrating the diverse and complex interplay between disciplines and the cultures it enables, when in search of alternative futures. *Design Materials and Making for Social Change* will be of interest to scholars in materials design, textile design, product design, fashion design, maker culture, systemic design, social design, design for sustainability and circular design.

Emerging from the world of commercial art and product styling, design has now become completely integrated into human life. Its marks are all around us, from the chairs we sit on to the Web sites on our computer screens. One of the pioneers of design studies and still one of its most

distinguished practitioners, Victor Margolin here offers a timely meditation on design and its study at the turn of the millennium and charts new directions for the future development of both fields. Divided into sections on the practice and study of design, the essays in *The Politics of the Artificial* cover such topics as design history, design research, design as a political tool, sustainable design, and the problems of design's relation to advanced technologies. Margolin also examines the work of key practitioners such as the matrix designer Ken Isaacs. Throughout the book Margolin demonstrates the underlying connections between the many ways of reflecting on and practicing design. He argues for the creation of an international, interdisciplinary field of design research and proposes a new ethical agenda for designers and researchers that encompasses the responsibility to users, the problems of sustainability, and the complicated questions of how to set boundaries for applying advanced technology to solve the problems of human life. Opinionated and erudite, Victor Margolin's *The Politics of the Artificial* breaks fresh ground in its call for a new approach to design research and practice. Designers, engineers, architects, anthropologists, sociologists, and historians will all benefit from its insights.

This e-only volume expands and updates the original 4-volume *Encyclopedia of Women in Today's World* (2011), offering a wide range of new entries and new multimedia content. The entries reflect such developments as the Arab Spring that brought women's issues in the Islamic world into sharp relief, the domination of female athletes among medal winners at the London 2012 Olympics, nine more women joining the ranks of democratically elected heads of state, and much more. The 475 articles in this e-only update (accompanied by photos and video clips) supplement the themes established in the original edition, providing a vibrant collection of entries dealing with contemporary women's issues around the world.

The Politics of the Artificial Bloomsbury Publishing USA

Considers how comics display our everyday stuff—junk drawers, bookshelves, attics—as a way into understanding how we represent ourselves now. For most of their history, comics were widely understood as disposable—you read them and discarded them, and the pulp paper they were printed on decomposed over time. Today,

comic books have been rebranded as graphic novels—clothbound high-gloss volumes that can be purchased in bookstores, checked out of libraries, and displayed proudly on bookshelves. They are reviewed by serious critics and studied in university classrooms. A medium once considered trash has been transformed into a respectable, if not elite, genre. While the American comics of the past were about hyperbolic battles between good and evil, most of today's graphic novels focus on everyday personal experiences. Contemporary culture is awash with stuff. They give vivid expression to a culture preoccupied with the processes of circulation and appraisal, accumulation and possession. By design, comics encourage the reader to scan the landscape, to pay attention to the physical objects that fill our lives and constitute our familiar surroundings. Because comics take place in a completely fabricated world, everything is there intentionally. Comics are stuff; comics tell stories about stuff; and they display stuff. When we use the phrase “and stuff” in everyday speech, we often mean something vague, something like “etcetera.” In this book, stuff refers not only to physical objects, but also to the emotions, sentimental attachments, and nostalgic longings that we express—or hold at bay—through our relationships with stuff. In *Comics and Stuff*, his first solo authored book in over a decade, pioneering media scholar Henry Jenkins moves through anthropology, material culture, literary criticism, and art history to resituate comics in the cultural landscape. Through over one hundred full-color illustrations, using close readings of contemporary graphic novels, Jenkins explores how comics depict stuff and exposes the central role that stuff plays in how we curate our identities, sustain memory, and make meaning. *Comics and Stuff* presents an innovative new way of thinking about comics and graphic novels that will change how we think about our stuff and ourselves.

From building blocks to city blocks, an eye-opening exploration of how children's playthings and physical surroundings affect their development. Parents obsess over their children's playdates, kindergarten curriculum, and every bump and bruise, but the toys, classrooms, playgrounds, and neighborhoods little ones engage with are just as important. These objects and spaces encode decades, even centuries of changing ideas about what makes for good child-rearing--and what does not. Do you choose wooden toys, or plastic, or, increasingly, digital? What do youngsters lose when seesaws are deemed too dangerous and slides are designed primarily for safety? How can the built environment help children cultivate self-reliance? In these debates, parents, educators, and kids themselves are often caught in the middle. Now, prominent design critic Alexandra Lange reveals the surprising histories behind the human-made elements of our children's pint-size landscape. Her fascinating investigation shows how the seemingly innocuous universe of stuff affects kids' behavior, values, and health, often in subtle ways. And she reveals how years of decisions by toymakers, architects, and urban planners have helped--and hindered--American youngsters' journeys toward independence. Seen through Lange's eyes, everything from the sandbox to the street becomes vibrant with buried meaning. *The Design of Childhood* will change the way

you view your children's world--and your own.

The East India Company at Home, 1757–1857 explores how empire in Asia shaped British country houses, their interiors and the lives of their residents. It includes chapters from researchers based in a wide range of settings such as archives and libraries, museums, heritage organisations, the community of family historians and universities. It moves beyond conventional academic narratives and makes an important contribution to ongoing debates around how empire impacted Britain. The volume focuses on the propertied families of the East India Company at the height of Company rule. From the Battle of Plassey in 1757 to the outbreak of the Indian Uprising in 1857, objects, people and wealth flowed to Britain from Asia. As men in Company service increasingly shifted their activities from trade to military expansion and political administration, a new population of civil servants, army officers, surveyors and surgeons journeyed to India to make their fortunes. These Company men and their families acquired wealth, tastes and identities in India, which travelled home with them to Britain. Their stories, the biographies of their Indian possessions and the narratives of the stately homes in Britain that came to house them, frame our explorations of imperial culture and its British legacies.

"The ground we walk on and grow crops in also just happens to be the most widely used building material on the planet. Civilizations throughout time have used it to create stable warm low-impact structures. The world's first skyscrapers were built of mud brick. Paul Revere Chairman Mao and Ronald Reagan all lived

in earth houses at various points in their lives and several of the buildings housing Donald Judd's priceless collection at the Chinati Foundation in Marfa Texas are made of mud brick." "While the vast legacy of traditional and vernacular earthen construction has been widely discussed, little attention has been paid to the contemporary tradition of earth architecture. Author Ronald Rael founder of Eartharchitecture.org provides a history of building with earth in the modern era focusing particularly on projects constructed in the last few decades that use rammed earth mud brick compressed earth cob and several other interesting techniques. Earth Architecture presents a selection of more than 40 projects that exemplify new creative uses of the oldest building material on the planet."--BOOK JACKET.

A visually sumptuous idea book, showcasing an eclectic array of interior design possibilities using salvaged goods. Following up on her celebrated first *Salvage Secrets* book, which *Fine Homebuilding* called "An invaluable first step in the salvage-for-design journey," here salvage design guru Joanne Palmisano takes readers further, exploring a wealth of smaller-scale interior design and decor concepts. Bottle caps turned into a kitchen backsplash, old bed springs reinvented as candle holders, and a recycled shipping container-turned-guesthouse are just a few examples of the innovative repurposing of second-hand items that readers will discover. From retro and modern to classic, "cottage," and urban chic, Palmisano takes readers on a sumptuous visual journey featuring unique salvage ideas in an eclectic array of styles, for every room in the house—kitchens and dining rooms, bedrooms and bathrooms, living rooms and dens, and entryways and outdoor areas. The journey continues with a sampling of cutting-edge retail spaces, hotels, cafes, and boutiques across the country that incorporate salvage into their designs, such as *Industrie Denim* in San Francisco, *Stowe Mountain Lodge* in Stowe, Vermont, and *Rejuvenation* in Portland. Profiles of thirteen "salvage success stories" are also included, showcasing the imaginative designs of creative homeowners. And lastly, fourteen easy, do-it-yourself projects are included at the back of the book (with step-by-step instructions), not to mention a comprehensive "Where to Find Salvage" resource section. Packed with over 350 color photos, *Salvage Secrets Design &*

Decor offers a trove of salvage ideas to inspire, proving that you need look no further than your local rebuild center, architectural salvage shop, or flea market to transform your living space.

The Multimedia Encyclopedia of Women in Today's World UCL Press Democratic in intention and approach, the book will argue that the home interior, as independently created by the 'amateur' householder, offers a continuous informal critique of shifting architectural styles (most notably with the advent of Modernism) and the design mainstream. Indeed, it will suggest that the popular increasingly exerts an influence on the professional. Underpinned by academic rigour, but not in thrall to it, above all this book is an engaging attempt to identify the cultural drivers of aesthetic change in the home, extrapolating the wider influence of 'taste' to a broad audience - both professional and 'trade'. In so doing, it will explore enthralling territory - money, class, power and influence. Illustrated with contemporary drawings and cartoons as well as photos, the book will not only be an absorbing read, but an enticing and attractive object in itself.
