The bestselling Oxford Dictionary of Literary Terms provides clear and concise definitions of the most troublesome literary terms, from abjection to zeugma. It is an essential reference tool for students of literature in any language.

Now expanded and in its fourth edition, it includes increased coverage of new terms from modern critical and theoretical

movements, such as feminism, schools of American poetry, Spanish verse forms, life writing, and crime fiction. It includes extensive coverage of traditional drama, versification, rhetoric, and literary history, as well as updated and extended advice on recommended further reading and a pronunciation guide to more than 200 terms. Completely revised and updated, this edition also features brand-new entries on terms such as distant reading, graphic novels, middle generation, and misery memoir. Many new bibliographies have been added to entries and recommended web links are available via a companion website.

Selected and introduced by Richard Dawkins, *The Oxford Book of Modern Science Writing* is a celebration of the

finest writing by scientists for a wider audience - revealing that many of the best scientists have displayed as much imagination and skill with the pen as they have in the laboratory. This is a rich and vibrant collection that captures the poetry and excitement of communicating scientific understanding and scientific effort from 1900 to the present day. Professor Dawkins has included writing from a diverse range of scientists, some of whom need no introduction, and some of whose works have become modern classics, while others may be less familiar - but all convey the passion of great scientists writing about their science. This Dictionary is part of the Oxford Reference Collection: using sustainable print-on-demand technology to make the

acclaimed backlist of the Oxford Reference programme perennially available in hardback format. What is a ham-and-egger? What are Anglo-Saxon attitudes? Who or what is liable to jump the shark? Who first tried to nail jelly to the wall? The answers to these and many more questions are in this fascinating book. Here in one volume you can track down the stories behind the names and sayings you meet, whether in classic literature or today's news. Drawing on Oxford's unrivalled bank of reference and language online resources, this dictionary covers classical and other mythologies, history, religion, folk customs, superstitions, science and technology, philosophy, and popular culture. Extensive cross referencing makes it easy to trace specific information, while every page points to further paths to explore. A fascinating slice of cultural history, and a browser's delight from start to finish. What is the fog of war? Who first wanted to spend more time with one's family? When was the Dreamtime? How long since the first cry of Women and children first? Where might you find dark matter? Would you want the Midas touch? Should you worry about grey goo?

*Bryson's Dictionary for Writers and Editors*  
OXFORD University Press

Compiles over 10,000 quotations, proverbs, and phrases on over 350 themes, among them actors and acting, bores and boredom, elections, food and drink, kissing, madness, schools, taxes, the weather, and youth. Many are attributed, with reference to particular works, while others merely explain the meaning and sometimes the background. For example, a Carthaginian peace is a peace settlement that imposes very severe terms of the defeated side, and refers to the ultimate destruction of Carthage by Rome in the Punic Wars. A keyword index presents abbreviated versions to facilitate finding a particular, perhaps half remembered, quotation. Annotation copyrighted by Book News, Inc., Portland, OR
