Open-access edition: DOI 10.6069/9780295748856 Beginning in the late nineteenth century, India played a pivotal role in global conversations about population and reproduction. In *Reproductive Politics and the Making of Modern India*, Mytheli Sreenivas demonstrates how colonial administrators, postcolonial development experts, nationalists, eugenicists, feminists, and family planners all aimed to reform reproduction to transform both individual bodies and the body politic. Across the political spectrum, people insisted that regulating reproduction was necessary and that limiting the population was essential to economic development. This book investigates the often devastating implications of this logic, which demonized some women's reproduction as the cause of national and planetary catastrophe. To tell this story, Sreenivas explores debates about marriage, family, and contraception. She also demonstrates how concerns about reproduction surfaced within a range of political questions—about poverty and crises of subsistence, migration and claims of national sovereignty, normative heterosexuality and drives for economic development. Locating India at the center of transnational historical change, this book suggests that Indian developments produced the very grounds over which reproduction was called into question in the modern world. The open-access edition of *Reproductive Politics and the Making of Modern India* is freely available thanks to the TOME initiative and the generous support of The Ohio State University Libraries.

On the basis of a decade's work on syntactic-comprehension disorders, primarily in the Neurolinguistics Laboratory of the Montreal Neurological Hospital, David Caplan and Nancy Hildebrandt present an original theory of these disturbances of language function. They suggest in this wide-ranging study that syntactic structure breaks down after damage to the brain because of specific impairments in the parsing processes and a general decrease in the amount of computational space that can be devoted to that function. *Disorders of Syntactic Comprehension* includes detailed single-case analyses and large-group studies, as well as a broad review of the literature on aphasia. It also provides introductions to syntactic structures and parsing for the reader unfamiliar with these subjects. It develops a general framework for viewing disorders in this area and for identifying a number of specific aspects of the breakdown of syntactic comprehension. The authors' richly detailed empirical linguistic database and their careful use of experimental materials enable them to bring the results of their research to bear on several aspects of theories of syntactic structure (Chomsky's theory) and parsing (the Berwick-Weinberg parser) and to use these theories to describe and explain aphasic phenomena. Moreover, the combination of population and group studies allows them to investigate the neurological basis of syntactic disorders in addition to the psychological and linguistic aspects. David N. Caplan is Associate Professor of Neurology and Linguistics at McGill University. Nancy Hildebrandt is in the Neurolinguistics Laboratory at the Massachusetts General Hospital. *Disorders of Syntactic Comprehension* is included in the series *Issues in the Biology of Language and Cognition*, edited by John C. Marshall.

An essential and comprehensive guide to university finances. In *University Finances*, higher education expert Dean O. Smith • demystifies basic accounting procedures, budgets, debt financing, and financial statements • explores more unusual financial topics, such as methods for calculating fringe benefit rates, bond refunding costs, and indirect cost allocations • shows that the use of university wealth is highly restricted by donors, bondholders, government regulators, and others • answers nuanced questions, like "How are USDA formula funds calculated?" and "Why does the university pursue more and more research funding when it loses money on every grant?" • illustrates financial calculations using realistic examples Some of these explanations are unavailable in print or online to anyone but a handful of professional accountants. Rigorous, detailed, and wide-ranging, *University Finances* is a unique and powerful resource.

From its historical grandeur to its metropolitan grit and stunning glamor, experience Paris through the lens of acclaimed photographer William Albert Allard, considered one of color photography's most celebrated pioneers. Over the course of three decades, former Magnum photographer William Albert Allard has been returning to Paris and embodying the idea of the flâneur, the idle yet keen wandering observer. Paris is the stunning culmination of Allard walking through the City of Light in search of nothing and everything, those gloriously unexpected scenes that unknowingly carry the weight of the world, if only for a moment. Visit backstage at music events and fashion shows, admire the cavernous rooms of fine museums, stroll the meandering streets of the city's neighborhoods, walk along the Seine, and spot lounging sunbathers, café patrons, and laborers with this masterful portraitist. Allard brings his personal voice and wonderful talent to this legendary city, revealing Paris in a personal, intimate way through the lens of his camera. Vibrant with color and rich with the details of human nature, this long out-of-print collection is now available again so viewers can marvel at both the work of a master photographer and the myriad poses struck by one of the world's greatest cities. "To walk in Paris is to stroll through a never-ending series of one-act plays with ever changing, often beautiful, sets, populated by sometimes equally attractive characters on display."—William Albert Allard Starting in 1964, Allard contributed to *National Geographic* magazine for 50 years, longer than any other single contributor. A pioneer of color documentary photography and a superb portraitist, Allard was credited early in his career with changing the look of *National Geographic* through his intimate work on the American subcultures of the Amish of Pennsylvania and the Hutterites of Montana. Allard has previously published six critically acclaimed books. His first, *Vanishing Breed*, photographs and writing about the American cowboy, published in 1981, was nominated for The American Book Award. Paris is the winner of the 5th edition of the Federation of European Professional Photographers (FEP) Book Prize Award.

Object-oriented analysis and design (OOAD) has over the years, become a vast field, encompassing such diverse topics as design process and principles, documentation tools, refactoring, and design and architectural patterns. For most students the learning experience is incomplete without implementation. This new textbook provides a comprehensive introduction to OOAD. The salient points of its coverage are: • A sound footing on object-oriented concepts such as classes, objects, interfaces, inheritance, polymorphism, dynamic linking, etc. • A good introduction to the stage of requirements analysis. • Use of UML to document user requirements and design. • An extensive treatment of the design process. • Coverage of implementation issues. • Appropriate use of design and architectural patterns. • Introduction to the art and craft of refactoring. • Pointers to resources that further the reader's knowledge. All the main case-studies used for this book have been implemented by the authors using Java. The text is liberally peppered with snippets of code, which are short and fairly self-explanatory and easy to read. Familiarity with a Java-like syntax and a broad understanding of the structure of Java would be helpful in using the book to its full potential.

Introduction to Sociology 3e Taylor & Francis

This original study examines women's activism against war in areas as far apart as Sierra Leone, India, Colombia and Palestine. It shows women on different sides of conflicts in the former Yugoslavia and Israel addressing racism and refusing enmity and describes international networks of women opposing US and Western European militarism and the so-called 'war on terror'. These movements, though diverse, are generating an antimilitarist feminism that challenges how war and militarism are understood, both in academic studies and the mainstream anti-war movement. Gender, particularly the form taken by masculinity in a violent sex/gender system, is inseparably linked to economic and ethno-national factors in the perpetuation of war.

This book investigates how we should form ourselves in a world saturated with technologies that are profoundly intruding in the very fabric of our selfhood. New and emerging technologies, such as smart technological environments, imaging technologies and smart drugs, are increasingly shaping who and what we are and influencing who we ought to be. How should we adequately understand, evaluate and appreciate this development? Tackling this question requires going beyond the persistent and stubborn inside-outside dualism and recognizing that what we consider our "inside" self is to a great extent shaped by our "outside" world. Inspired by various philosophers – especially Nietzsche, Peirce and Lacan – this book shows how the values, goals and ideals that humans encounter in their environments not only shape their identities but also enable them to critically relate to their present state. The author argues against understanding technological self-formation in terms of making ourselves better, stronger and smarter. Rather, we should conceive it in terms of technological sublimation, which redefines the very notion of human enhancement. In this respect the author introduces an alternative, more suitable theory, namely Technological Sublimation Theory (TST). Estimate Technology will be of interest to scholars and advanced students working in philosophy of technology, philosophy of the self, phenomenology, pragmatism, and history of philosophy. The History of al-Ṭabarī Vol. 21 Routledge

Autism spectrum disorders (ASDs) have been increasingly diagnosed in recent years and carries with it far reaching social and financial implications. With this in mind, educators, physicians, and parents are searching for the best practices and most effective treatments. But because the symptoms of ASDs span multiple domains (e.g., communication and language, social, behavioral), successfully meeting the needs of a child with autism can be

quite challenging. *Evidence-Based Practices and Treatments for Children with Autism* offers an insightful and balanced perspective on topics ranging from the historical underpinnings of autism treatment to the use of psychopharmacology and the implementation of evidence-based practices (EBPs). An evaluation methodology is also offered to reduce the risks and inconsistencies associated with the varying definitions of key autism terminology. This commitment to clearly addressing the complex issues associated with ASDs continues throughout the volume and provides opportunities for further research. Additional issues addressed include: Behavioral excesses and deficits treatment Communication treatment Social awareness and social skills treatment Dietary, complementary, and alternative treatments Implementation of EBPs in school settings Interventions for sensory dysfunction With its holistic and accessible approach, *Evidence-Based Practices and Treatments for Children with Autism* is a vital resource for school psychologists and special education professionals as well as allied mental health professionals, including clinical child and developmental psychologists, psychiatrist, pediatricians, primary care and community providers.

The Zen tradition has just two main meditative practices: shikantaza, or "just sitting"; and introspection guided by the powerful Zen teaching stories called koans. Following in the tradition of *The Art of Just Sitting* (endorsed as a "A book we have needed for a long, long time"), this new anthology from John Daido Looi illuminates the subtle practice of koan study from many different points of view. One of the most important African American leaders of the twentieth century and perhaps the most influential woman in the civil rights movement, Ella Baker (1903-1986) was an activist whose remarkable career spanned fifty years and touched thousands of lives. A gifted grassroots organizer, Baker shunned the spotlight in favor of vital behind-the-scenes work that helped power the Black freedom struggle. Making her way in predominantly male circles while maintaining relationships with a vibrant group of women, students, and activists, Baker was a national officer and key figure in the NAACP, a founder of the Southern Christian Leadership Conference, and a prime mover in the creation of the Student Nonviolent Coordinating Committee. In this definitive biography, Barbara Ransby chronicles Baker's long and rich career, revealing her complexity, radical democratic worldview, and enduring influence on group-centered, grassroots activism. Beyond documenting an extraordinary life, Ransby paints a vivid picture of the African American fight for justice and its intersections with other progressive struggles worldwide throughout the twentieth century.

Marriage globally is undergoing profound change, provoking widespread public comment and concern. Through the close ethnographic examination of case studies drawn from Africa, Asia, Europe and North America, *Marriage in Past, Present and Future* Tense places new and changing forms of marriage in comparative perspective as a transforming and also transformative social institution. In conditions of widespread socio-political inequality and instability, how are the personal, the familial and the political co-produced? How do marriages encapsulate the ways in which memories of past lives, present experience and imaginaries of the future are articulated? Exploring the ways that marriage draws together and distinguishes history and biography, ritual and law, economy and politics in intimate family life, this volume examines how familial and personal relations, and the ethical judgements they enfold, inform and configure social transformation. Contexts that have been partly shaped through civil wars, cold war and colonialism – as well as other forms of violent socio-political rupture – offer especially apt opportunities for tracing the interplay between marriage and politics. But rather than taking intimate family life and gendered practice as simply responsive to wider socio-political forces, this work explores how marriage may also create social change. Contributors consider the ways in which marital practice traverses the domains of politics, economics and religion, while marking a key site where the work of linking and distinguishing those domains is undertaken.

Traumatic brain injury (TBI) is a complex condition for which limited research exists. The recent conflicts in Iraq and Afghanistan have resulted in numerous service members returning home after sustaining TBI, and healthcare providers scrambling to find resources on how to treat them. This toolkit is a comprehensive source of inventories and therapy options for treating service members with mild TBI. All aspects of mild TBI are covered, including vestibular disorders, vision impairment, balance issues, posttraumatic headache, temporomandibular dysfunction, cognition, and fitness, among others. With easy-to-follow treatment options and evaluation instruments, this toolkit is a one-stop resource for clinicians and therapists working with patients with mild TBI.

First published in 2000, Dipesh Chakrabarty's influential *Provincializing Europe* addresses the mythical figure of Europe that is often taken to be the original site of modernity in many histories of capitalist transition in non-Western countries. This imaginary Europe, Dipesh Chakrabarty argues, is built into the social sciences. The very idea of historicizing carries with it some peculiarly European assumptions about disenchanting space, secular time, and sovereignty. Measured against such mythical standards, capitalist transition in the third world has often seemed either incomplete or lacking. *Provincializing Europe* proposes that every case of transition to capitalism is a case of translation as well—a translation of existing worlds and their thought—categories into the categories and self-understandings of capitalist modernity. Now featuring a new preface in which Chakrabarty responds to his critics, this book globalizes European thought by exploring how it may be renewed both for and from the margins.

The term arthrogyriposis describes a range of congenital contractures that lead to childhood deformities. It encompasses a number of syndromes and sporadic deformities that are rare individually but collectively are not uncommon. Yet, the existing medical literature on arthrogyriposis is sparse and often confusing. The aim of this book is to provide individuals affected with arthrogyriposis, their families, and health care professionals with a helpful guide to better understand the condition and its therapy. With this goal in mind, the editors have taken great care to ensure that the presentation of complex clinical information is at once scientifically accurate, patient oriented, and accessible to readers without a medical background. The book is authored primarily by members of the medical staff of the Arthrogyriposis Clinic at Children's Hospital and Medical Center in Seattle, Washington, one of the leading teams in the management of the condition, and will be an invaluable resource for both health care professionals and families of affected individuals.

"[A] new literary genre, the MBA Memoir . . . Delivers 97 pearls of warmth, wit and wisdom from the most inspirational entrepreneur I have ever met." —Frances Edmonds, bestselling author of *Repotting Your Life Called the "Queen of Beauty"* and the most influential lone woman to impact the beauty industry since Estée Lauder by the New York Times, Leslie Blodgett's story is anything but ordinary. As the CEO of BareMinerals, she reinvented how beauty was sold by tapping into the power of community before the idea of social media existed. In 2006, Blodgett took the company public in one of the largest cosmetic IPOs of the decade, and in 2010, the company was acquired for \$1.8 billion. *Pretty Good Advice* is her next chapter. This refreshing book features 97 candid and entertaining insights on business, life, and beauty. Personal and often surprising, Blodgett dishes on leading with humor, why wearing blush and reading obituaries are two of the most optimistic things you can do, and why you owe it to your coworkers not to be boring. *Pretty Good Advice* is full of frank, actionable advice to help light a fire under you.
