Economic Development - A Way of Sustainable Livelihood Popular Prakashan

Published in 1913, a best-seller in the 1930s and long out of print, Physics for Entertainment was translated from Russian into many

languages and influenced science students around the world. In the foreword, the book's author describes the contents as "conundrums, brain-teasers, entertaining anecdotes, and unexpected comparisons," adding, "I have quoted extensively from Jules Verne, H. G. Wells, Mark Twain and other writers, because, besides providing entertainment, the fantastic experiments these writers describe may well serve as instructive illustrations at physics classes." The book's topics included how to jump from a moving car, and why, "according to the law of buoyancy, we would never drown in the Dead Sea."

30 Teenage Stories New Delhi : National Book Trust, India

Examines the development of the basic principles of chemistry from the Bronze Age to the present day

Architecture for the Poor Favola Forlag

Gathers quotations about agriculture, anthropology, astronomy, the atom, energy, engineering, genetics, medicine, physics, science and society, and research

Some More Short Stories Children's Book Trust

This penetrating study of the white supremacy myth in books for the young adds an important dimension to American intellectual history. The study pinpoints an intersecting adult and child culture: it demonstrates that many children's stories had political, literary, and social contexts that paralleled the way adult books, schools, churches, and government institutions similarly maligned black identity, culture, and intelligence. The book reveals how links between the socialization of children and conservative trends in the 19th century foretold 20th century disregard for social justice in American social policy. The author demonstrates that cultural pluralism, an ongoing corrective to white supremacist fabrications, is informed by the insights and historical assessments offered in this study.

Ten Little Fingers Children's Book Trust

Many people can write. But writing well enough to get published takes hours of practice, the ability to take criticism, and expert advice. Filled with stories and tips from published authors, this easy-to-use guide teaches you the basics of the writing craft. Whether you want to create poems or plays, children's books or online blogs, romance novels or a memoir, you'll learn to write more effectively and creatively. Published author, editor, and PR consultant Wendy Burt-Thomas covers all aspects of writing, including how to: Prepare to write, from planning to research to organization Properly structure your piece to fit your chosen genre Stay focused during the drafting and editing processes

Work with other authors Overcome writer's block Market your writing

Cheaper by the Dozen Simon and Schuster

Architecture for the Poor describes Hassan Fathy's plan for building the village of New Gourna, near Luxor, Egypt, without the use of more modern and expensive materials such as steel and concrete. Using mud bricks, the native technique that Fathy learned in Nubia, and such traditional Egyptian architectural designs as enclosed courtyards and vaulted roofing, Fathy worked with the villagers to tailor his designs to their needs. He taught them how to work with the bricks, supervised the erection of the buildings, and encouraged the revival of such ancient crafts as claustra (lattice designs in the mudwork) to adorn the buildings.

Grove Press

'Did you run across that queer sort of legend about a wild goose? It was all up and down the beaches. You know how those things spring up. Some of the men I brought back were talking about it. It was supposed to have appeared at intervals the last days between Dunkirk and La Panne. If you saw it, you were eventually saved. That sort of thing.' 'Hmm, a wild goose. I saw a tame one. Dashed strange experience. Tragic in a way, too. And lucky for us. Tell you about it ...' The Snow Goose is a beautiful tale of a hunchbacked artist, a girl, a wounded bird and a courageous act at Dunkirk. Also included in this volume is The Small Miracle, a contemporary fable inspired by St Francis of Assisi. Both tales are endearing classics of the storyteller's art.

What to Do? University of Chicago Press

This is the tragic story of Janusz Korczak (as featured in the major

motion picture *The Zookeeper's Wife*) who chose to perish in Treblinka rather than abandon the Jewish orphans in his care. Korczak comes alive in this acclaimed biography by Betty Jean Lifton as the first known advocate of children's rights in Poland, and the man known as a savior of hundreds of orphans in the Warsaw ghetto. A pediatrician, educator, and Polish Jew, Janusz Korczak introduced progressive orphanages, serving both Jewish and Catholic children, in Warsaw. Determined to shield children from the injustices of the adult world, he built orphanages into 'just communities' complete with parliaments and courts. Korczak also founded the first national children's newspaper, testified on behalf of children in juvenile courts, and, through his writings, provided teachers and parents with a moral education. Known throughout Europe as a Pied Piper of destitute children prior to the onslaught of World War II, he assumed legendary status when on August 6, 1942, after refusing offers for his own safety, he defiantly led the orphans under his care in the Warsaw Ghetto to the trains that would take them to Treblinka. Introductions by Elie Wiesel, Curren Warf and Allison A. Eddy [Subject: Biography, Holocaust Studies, Jewish Studies, WWII, Children's Rights] Illustrating Children's Books Routledge

A Newbery Medal Winner When Amos Fortune was only fifteen years old, he was captured by slave traders and brought to Massachusetts, where he was sold at auction. Although his freedom had been taken, Amos never lost his dignity and courage. For 45 years, Amos worked as a slave and dreamed of freedom. And, at age 60, he finally began to see those dreams come true. "The moving story of a life dedicated to the fight for freedom."—Booklist

King of Children Archers & Elevators Publishing House

The second book in the Incorrigible Children of Ashton Place—the acclaimed and hilarious Victorian mystery series by Maryrose Wood, perfect for fans of Lemony Snicket and Trenton Lee Stewart—has a brand-new look. Thanks to their plucky governess, Miss Penelope Lumley, Alexander, Beowulf, and Cassiopeia are much more like children than wolf cubs now. They are accustomed to wearing clothes. They hardly ever howl at the moon. And for the most part, they resist the urge to chase squirrels up trees. Yet the Incorrigibles are not entirely civilized, and still managed to ruin Lady Constance's Christmas ball, nearly destroying the grand house. So while Ashton Place is being restored, Penelope, the Ashtons, and the children take up residence in London. As they explore the city, Penelope and the Incorrigibles discover more about themselves as clues about the

children's—and Penelope's own—mysterious past crop up in the most unexpected ways....

The Annotated Alice Beech Tree Books

A dazzling, irresistible collection of the ten most groundbreaking and beautiful experiments in scientific history. With the attention to detail of a historian and the storytelling ability of a novelist, New York Times science writer George Johnson celebrates these groundbreaking experiments and re-creates a time when the world seemed filled with mysterious forces and scientists were in awe of light, electricity, and the human body. Here, we see Galileo staring down gravity, Newton breaking apart light, and Pavlov studying his now famous dogs. This is science in its most creative, hands-on form, when ingenuity of the mind is the most useful tool in the lab and the rewards of a well-considered experiment are on exquisite display.
