The Music Producer's Handbook, Second Edition reveals the secrets to becoming a music producer and producing just about any kind of project in any genre of music. Among the topics covered are the producer's multiple responsibilities and all the elements involved in a typical production, including budgeting, contracts, selecting the studio and engineer, hiring session musicians, and even getting paid.

Unlike other books on production, *The Music Producer's Handbook* also covers the true mechanics of production, from analyzing, troubleshooting, and fixing a song that isn't working to getting the best performance and sound out of a band or vocalist. In addition, Bobby Owsinski tackles what may be the toughest part of being a producer - being a diplomat, a confidant, and an amateur psychologist all at once. This edition also includes new chapters on self-production, small studio production, and how the new songwriter-producer and engineer-producer hybrids make money in our new digital music world. It also features several new interviews with some of the best-selling producers from different musical genres, who offer advice on getting started, getting paid, and making hits. Packed with inside information and including exclusive online media, *The Music Producer's Handbook, Second Edition* provides invaluable tools and advice that will help beginners and seasoned professionals alike. Item includes online resource.

What Is Music Production? Taylor & Francis

The producer's guide to harmony, chord progressions, and song structure in the MIDI grid. As an online class, Dr. Allen has had over 50,000 students use this groundbreaking curriculum to learn music theory. Students and Producers who have wanted to learn music theory to improve their own music, but have been intimidated by traditional approaches, music notation, and abstract concepts will find this book to be the answer they have been looking for.

From the Author: "How music theory is usually taught is unfair. It starts with the assumption that you can read music and understand the language of classical music. My book leaves all of that behind - focusing only on the MIDI grid that producers are already familiar with to learn all the key concepts of music theory, and ultimately, make better music." This book covers all the fundamentals of music theory, but is written using the language of the DJ and Producer - the MIDI Grid. It includes "analysis" projects that look at the harmonic and melodic ideas in songs by popular producers including Zedd, Boards of Canada, Daft Punk, Deadmau5, Bonobo, Richie Hawtin, Moby, Skrillex, and Aphex Twin. Praise for Music Theory for Electronic Music Producers: "Aspiring electronic musicians have choices to make when it concerns their own education and training. This text makes one choice much easier: start here and get learning, quickly. Grounded and easygoing, the book uses real-world examples to help you make sense of music's inner workings while steering clear of dense theories." - Michael J. Ethen, PhD Musicologist "This book knocks the oftentimes alienating

world of music theory completely onto it's side. Difficult to explain concepts are perfectly demonstrated for the aspiring electronic music producer who might have no formal music training. A must have for all aspiring producers." - James Patrick (DJ, Producer, Educator) Slam Academy, Dubspot, IPR, Ableton Certified Trainer "With Music Theory for Electronic Music Producers, Dr. Allen has produced a remarkable resource: an extensive tour of musical theory that leverages some of our favorite modern tools - the virtual studio and it's piano roll note display. By introducing us to the "why" as well as the "what" of music theory, this book helps us to understand what makes music tick and how to improve our own work. In addition to offering a sound theoretical foundation, the deep dives into analyzing tracks by Skrillex, Aphex Twin, and Deadmau5 keeps our attention focused on real-world production. MTEMP will definitely go on the top of my recommendation list for anyone that needs a fresh view of musical concepts." - Darwin Grosse Director of Education, Cycling '74
