Chilton's Motorcycle Repair Manual Harley-Davidson

Celebrate the rebirth of the world's most stunning high-performance automobile. Porsche made history when it brought turbocharging to the racing world in the form of the 917. When strict regulations regarding engine displacement took away the option of bigger engines, manufacturers turned to forced induction. In its wildest trim, the original 12-cylinder turbocharged Porsche racing engine yielded as much as 1,400 horsepower! Porsche's official philosophy was that racing cars must have a connection to street cars, so it was preordained that Porsche would eventually produce a turbocharged version of its air-cooled flat-six cylinder engine. The resulting 930 Turbo appeared in the spring of 1975 in Europe. Acceleration from 0 to 100 kilometers per hour took a scant 5.5 seconds, and its top speed was 155 miles per hour. The Turbo's distinctive rear wing let the world know that this was something very special. It was nothing less than the rebirth of the high-performance automobile. At a time when the big-block engines in America's so-called "muscle cars" were putting out 180 horsepower and the engines in exotic supercars weren't much more ambitious, the lightweight Porsche was a genuine rocket. Porsche Turbo: The Inside Story of Stuttgart's Turbocharged Road and Race Cars celebrates Porsche's five decades of turbocharged supercar performance, both on the track and on the street. It covers all of the major racing cars as well as the turbocharged street cars, including the 930, 935, 924, 944, 968, 911, and Cayenne Panamera. Don't let this one fly past you!

The author of Rejected Princesses returns with an inspiring, fully illustrated guide that brings together the fiercest mothers in history—real life matriarchs who gave everything to protect all they loved. Mothers possess the "maternal instinct"—an innate fierceness that drives them to nurture, safeguard, fight, and sacrifice for the most important things that matter to them. For some mothers, it's their children. For others, it's artistic expression, invention, social cause, or even a nation that they helped to birth. In Tough Mothers, Jason Porath brings his wisdom and wit to bear on fifty fascinating matriarchs. In concise, deeply researched vignettes, accompanied by charming illustrations, Porath illuminates these fearsome women, explores their lives, and pays tribute to their accomplishments. Here are famous women as well as lesser known figures from around the globe who have left their indelible mark as they changed the course of history, including: The Mother Who Sued to Save Her Children from Slavery—Sojourner Truth The Mother of Rock n' Roll—Sister Rosetta Tharpe The Mother of Holocaust Children—Irena Sendler The Mothers of The Dominican Republic—The Mirabal Sisters The Mother of Yemen's Golden Age—Arwa al-Sulayhi A celebration of motherhood and female achievement, Tough Mothers reminds us of the power of women to transform our lives and our world.

There are dinosaurs, murder fantasies, and secret wars in this collection of short comics stories. Compulsive Comics collects the very best of Eric Haven's singular brand of inverted-comic-book-consciousness and genre-bending short stories. "The Glacier" is about a lone scientist making a startling discovery. The volume's most controversial story, "I Killed Dan Clowes," is an epic conflation of autobio and fantasy. While driving around Oakland, ruminating on the history of underground comics in the Bay Area, the main character fatally hits acclaimed graphic novelist Daniel Clowes, and the absurdity only escalates from there.
