The 37th Parallel tells the true story of a computer programmer whose investigations into alien activity lead him deep into a vast conspiracy stretching 3000 miles across America. Chuck Zukowski is obsessed with tracking down UFO reports, but this innocent hobby takes on a sinister urgency when he makes a horrifying discovery. As he traces a series of incidents across Utah, Colorado and Kansas, a pattern emerges: a horizontal line of unexplained activity stretching right across America, a line some are calling the 'UFO Highway' or the '37th Parallel'. His extraordinary journey takes him from El Paso to the Pentagon, into secret underground military caverns and Indian sacred sites. This terrifying account will keep you awake at night, pondering some of the biggest and most inescapable questions humanity faces: are we really alone in this vast universe? And if not, who are our neighbours?

Bob Lazar is the reason Area 51 became infamous in the 1980s and his recent appearance on Joe Rogan's podcast with 7 million listeners is credited with inspiring the Storm Area 51 phenomenon. In his DREAMLAND autobiography, Lazar reveals every detail of his highly controversial story about being an insider within the world's most legendary military research base. Bob Lazar was a brilliant young physicist that found himself employed at a top secret facility in the middle of the desert outside Las Vegas. Under the watchful eye of the government elite, he is tasked with understanding an exotic propulsion system being used by an advanced aerospace vehicle he is told came from outer space. The stressful work and long, odd hours start to wear on Bob and he becomes concerned for his safety. He tells his wife and a couple close friends about what he's doing in the desert, and his employers find out and are furious. When they station goons outside his house, Bob seeks help from wealthy UFOlogist, John Lear, who encourages Bob to take his story to award-winning investigative journalist George Knapp at KLAS-TV, a CBS affiliate. To prove he's telling the truth, Bob takes a group of people out into the desert to watch a test flight of the "flying saucer." On the way home, they are stopped by the police,

who notify the base, and Bob loses his job. In a series of interviews with CBS TV, Bob Lazar then blows the lid off "Area 51," blows the whistle on the effort to conceal this craft from the American people, and blows up his career as a top physicist. Bob Lazar's reports have been the subject of intense controversy for decades. He has been interviewed numerous times and his story has been corroborated by other individuals he worked with and who were present when these events happened. But until now, Bob Lazar has never told his own story, in every detail in his own words, about those exciting days in the desert outside of Las Vegas and how the world came to learn about the experiments being conducted at Area 51.

The 37th Parallel Harper Collins

SECOND EDITION-REVISED AND UPDATED The reality of UFO incursions at American nuclear weapons facilities has been convincingly established. Hundreds of U.S. military veterans now openly discuss these ominous incidents and thousands of declassified government documents substantiate their revelations. Over the past four decades, renowned researcher Robert Hastings has interviewed more than 150 of those veterans regarding their involvement in these astounding cases. On September 27, 2010, CNN live-streamed his UFOs and Nukes press conference in Washington D.C. during which former U.S. Air Force officers described numerous nuclear missiles mysteriously malfunctioning moments after a disc-shaped craft was observed hovering near their underground launch silos. That shocking episode, in March 1967, was merely the tip of the proverbial iceberg. Documented UFO activity occurred at a plutonium processing plant in Washington State as early as January 1945, months prior to the atomic bombings in Japan. Another incident, in October 2010, involved one missile base in Wyoming being unable to communicate with several of its missile launch control capsules just as a huge cigar-shaped craft slowly flew over them. Significantly, documents smuggled out of Russia in the 1990s confirm that Soviet nukes were also the focus of UFO interest during the Cold War era. On one occasion, in October 1982, a number of missiles temporarily activated for launch, as terrified officers attempted to disrupt the unauthorized count-down. After 15 seconds, the anomaly terminated and the equipment returned to standby status. While this was taking place, an enormous disc silently hovered over the base. In short, the evidence presented in *UFOs & Nukes* makes clear that humans' deadliest weapons have been, since their development and use during World War II, under intense scrutiny by still-unidentified observers possessing tremendously advanced technology. Given these disclosures, it seems evident that the UFO-Nukes Connection is highly significant and perhaps even the key reason these mysterious aerial craft have appeared in our skies over the past seven decades.

The Aztec UFO Incident—the first ever widely publicized report of a recovered flying saucer—was derided as a hoax for decades. But now the Ramseys and Frank Thayer reveal the exact spot where the craft landed and show how the 100-foot diameter saucer was moved to a secret laboratory. Witnesses to the

incident who were interviewed by the authors affirm that they were sworn to secrecy by the military. The authors also reveal the names of scientists who worked on the craft after its recovery. Also included are previously unseen documents from the CIA, FBI, U.S. Air Force, and U.S. Army that constituted a cover-up whose sole purpose was to surround the Aztec story with a smokescreen of lies, misinformation, and destructive allegations. Roswell is no longer the only proven flying saucer recovery we know about. The Aztec UFO Incident is a must-read for historians and UFO students alike.

The Aztec UFO Incident Harper Collins

"In 1980, a UFO was tracked on military radar in Rendlesham Forest, England. It landed near two of the most strategically important military bases in NATO, and was approached by military witnesses who touched the hull. This explosive new book—perfect for fans of Annie Jacobsen's *Area 51*, and Leslie Kean's *UFOs*—tells the full story of this incident, which is set to become better-known than Roswell. Written by Nick Pope, an international bestselling author and former government UFO investigator, working closely with John Burroughs and Jim Penniston, the two officers at the heart of the encounters, this book reveals the first-hand witnesses' full stories for the first time and is supported by numerous formerly-classified documents obtained under the Freedom of Information Act. Burroughs and Penniston are well-known in the believer community and are enthusiastic about promoting the book with Pope. An ex-Ministry of Defense official, Pope is the only government UFO investigator to have gone on the record on this subject. He has a huge US media profile as a UFO expert, making him the perfect person to team with Burroughs and Penniston to write and promote this book. The inside story of these events and their aftermath will change people's perceptions about the UFO mystery and about the true role played by government, the military and the intelligence agencies" --

Featured on two major television documentaries! In December 1980, Larry Warren was a member of the Air Force security police stationed at RAF Bentwaters, a NATO base in Great Britain. On the night of the 28th he was on guard duty when he was taken by truck to join other Air Force personnel to investigate a disturbance in a Rendlesham Forest about five miles away, which turned out to be a landed UFO. This was the third night of UFO activity in the area and by far the most profound. When the men were debriefed the next day, they were warned to tell no one about what they had seen—as "bullets are cheap." And so began what would turn out to be the best documented and most significant military-UFO incident in history. This remarkable story, told with the help of investigative writer Peter Robbins, was the basis of two blockbuster television documentaries. "Warren's firsthand account explodes with authentic detail. A riveting, fascinating, and important book." -Whitley Strieber, author of *Communion* "[H]as the force of a well-told mystery novel, yet it is all disturbingly true. A major contribution to the literature." -Budd Hopkins, author of *Missing Time* "[O]ne gripping version of the story of this classic UFO case and its aftermath." -*Publisher's Weekly* "This book is dynamite. Meticulously researched, gripping, provocative..." -Nick Pope, author of *Open Skies, Closed Minds* "[Q]uestions on these UFO sightings are still being asked in Parliament. If you read this gripping book you will see why." -*Focus*, journal of the British Ministry of Defence.

Horsley also spent seven years as equerry to His Royal Highness Prince Philip. It was at Philip's request that Horsley investigated numerous UFO sightings. He offers a candid account of that work, including a mysterious encounter with a Mr. Janus, who exhibited telepathic abilities and an intimate knowledge of extraterrestrial life.

The Believer is the weird and chilling true story of Dr. John Mack. This eminent Harvard psychiatrist and Pulitzer Prize-winning

biographer risked his career to investigate the phenomenon of human encounters with aliens and to give credibility to the stupefying tales shared by people who were utterly convinced they had happened. Nothing in Mack's four decades of psychiatry had prepared him for the otherworldly accounts of a cross section of humanity including young children who reported being taken against their wills by alien beings. Over the course of his career his interest in alien abduction grew from curiosity to wonder, ultimately developing into a limitless, unwavering passion. Based on exclusive access to Mack's archives, journals, and psychiatric notes and interviews with his family and closest associates, *The Believer* reveals the life and work of a man who explored the deepest of scientific conundrums and further leads us to the hidden dimensions and alternate realities that captivated Mack until the end of his life.

This is the casebook of the world's only officially recognized UFO encounter that took place in the UK in December 1980. Previous accounts of the Rendlesham Forest incident have been flawed: people with axes to grind and little access to primary sources and discreditable single eyewitness accounts. Georgina Bruni has had access to police, Ministry of Defence and US military sources and her casebook reveals fresh information on the incident and the possible alien encounter that ensued. It includes interviews with those involved as well as other never-before-reported incidents in the area. The casebook also reveals details of the aftermath and the harsh treatment meted out to those who wavered from the "don't ask, don't tell" line of officialdom. 'While twenty years have passed, she brings new light to this story that just won't go away...' Major General Gordon E. Williams, USAF (Retired)

The Rendlesham File St. Martin's Griffin

The Rendlesham Forest Incident of December 1980, is considered by far the most significant event in UFO history. It was also a unique military-related event, having taken place in Rendlesham Forest just outside the twin bases of RAF Bentwaters and RAF Woodbridge in Suffolk, England - both of which had been transferred to the United States Air Force in 1951 by the British MOD (Ministry of Defence), becoming one of the largest and most important NATO complexes in Europe during the Cold War. The account given in this book is that of James W. Penniston, a Staff Sergeant at the time of the incident, who was the primary witness who led the investigation in the beginning and had 'Top-Secret clearance' - one of only eight people with Top-Secret clearance working Security at the twin bases. His credibility and honesty were highly respected throughout his years in the USAF. Jim Penniston has teamed-up with author Gary Osborn to present the definitive account of the Rendlesham Incident and the aftermath of events, just as he witnessed and experienced them from the incident itself, which began during the early morning hours of Boxing Day, December 26, 1980 up to April 2014.
