cartes géographique s. Par Dom Jacques Martin ...; & continué par Dom Jean-François de Brezillac,... Misfit City Vol. 1 This study centres on the hypothesis that, as first claimed by historian Louis Chevalier, Eugene Sue's "Les Mysteres de Paris", through pressure from Sue's reader-correspondents as he wrote and published the novel in serial form, was a collective production. *Human*

Computation Routledge Concise description of classical statistics, from basic dice probabilities to modern regression analysis. Equal stress on theory and applications. Moderate difficulty; only basic calculus required. Includes problems with answers. Boom! Studios The Book of Samuel is universally acknowledged as one of the supreme achievements of biblical literature. Yet the book's

anonymous author was more than an inspired storyteller. The author was also an uncannily astute observer of political life and the moral compromises and contradictions that the struggle for power inevitably entails. The Beginning of Politics mines the story of Israel's first two kings to unearth a natural history of power, providing a forceful new reading of what is

arguably the first and greatest work of Western political thought. Moshe Halbertal and Stephen Holmes show how the beautifully crafted narratives of Saul and David cut to the core of politics, exploring themes that resonate wherever political power is at stake. Through stories such as Saul's madness, David's murder of Uriah, the rape of Tamar,

and the rebellion of Absalom, the book's author deepens our understanding not only of the necessity of sovereign rule but also of its costs--to the people it is intended to protect and to those who wield it. What emerges from the meticulous analysis of these narratives includes such themes as the corrosive grip of power on those who hold and compete for power; the ways in which political violence

unleashed by the sovereign on his own subjects is rooted in the paranoia of the isolated ruler and the deniability fostered by hierarchical action through proxies; and the intensity with which the tragic conflict between political loyalty and family loyalty explodes when the ruler's bloodline is made into the guarantor of the all-important continuity of sovereign power.--

 Walter de Gruyter GmbH & Co KG
 The last decade has seen a surge of scholarly interest in these religious professionals and a good number of high quality publications. Our volume, however, with its unique intercultural character and its explicit focus on appropriation and contestation of religious expertise in the Imperial Era is substantially different. Unlike the

rather narrow focus of earlier studies of civic priests, the papers presented here examine a wider range of religious professionals, their dynamic interaction with established religious authorities and institutions, and their contributions to religious innovation in the ancient Mediterranean world, from the late Hellenistic period through to Late Antiquity, from the City

of Rome to mainland Greece, Asia Minor, Syria and Egypt, from Greek civic practice to ancient Judaism. A further advantage of our volume is the wide range of media of transmission taken into account. Our contributors look at both old and new materials, which derive not only from literary sources but also from papyri, inscriptions, and material culture. Above all, this

volume assesses critically convenient terminological usage and offers a unique insight into a rich gamut of ancient Mediterranean religious specialists. *Dictionnaire universel François et Latin, contenant la signification et la définition [...] De Gruyter Mouton* This volume, prepared with the collaboration of the International Philo Bibliography

Project, is the third in a series of annotated bibliographies on the Jewish exegete and philosopher Philo of Alexandria. It contains a listing of all scholarly writings on Philo for the period 1997 to 2006. Magritte BRILL Human computation is a new and evolving research area that centers around harnessing human intelligence to solve computational problems that are beyond

the scope of existing Artificial Intelligence (AI) algorithms. With the growth of the Web, human computation systems can now leverage the abilities of an unprecedented number of people via the Web to perform complex computation. There are various genres of human computation applications that exist today. Games with a purpose (e.g., the ESP Game) specifically

target online gamers who generate useful data (e.g., image tags) while playing an enjoyable game. Crowdsourcing marketplaces (e.g., Amazon Mechanical Turk) are human computation systems that coordinate workers to perform tasks in exchange for monetary rewards. In identity verification tasks, users perform computation in order to gain access to some online content; an

example is reCAPTCHA, which leverages millions of users who solve CAPTCHAs every day to correct words in books that optical character recognition (OCR) programs fail to recognize with certainty. This book is aimed at achieving four goals: (1) defining human computation as a research area; (2) providing a comprehensive review of existing work; (3) drawing

connections to a wide variety of disciplines, including AI, Machine Learning, HCI, Mechanism/M arket Design and Psychology, and capturing their unique perspectives on the core research questions in human computation; and (4) suggesting promising research directions for the future.	Routing / Understanding Workers and Requesters / The Art of Asking Questions / The Future of Human Computation <i>Gazette nationale, ou le moniteur universel</i> Princeton University Press Smothered by her backwater hometown and frustrated by its 1980s cult-movie fame (The Gloomies...ha ve you seen it? It's a real classic, y'know.), Wilder is pretty sure she's seen	everything Cannon Cove has to offer. She's desperate to get away from home as soon as she can, and move on to bigger, better, and less annoying things...even if that might mean leaving her best friends behind. But when Wilder discovers a centuries-old pirate map, she may find out that REAL adventure was in their tiny town all along...and they need each other to get to the bottom of it!
--	---	---

It's a rip-roaring adventure written by award-winning screenwriter Kiwi Smith (10 Things I Hate About You, Legally Blonde) and Kurt Lustgarten, and illustrated by Naomi Franquiz.
