"Will computers ever think like humans?" "Not if they're well designed." Mixing academic essay, anti-art philosophy, unsettling memoir and wry wit, Noise Music is a profoundly complex and open-ended collage covering a plethora of topics including psychology of information processing, consciousness, science, time, perception, art theory and criticism, morals, mental illness, the human condition, artificial intelligence, cognitive biases, language and communication. However, at its core the book is about the limits of human knowledge and understanding due to how minds

and senses work. Going hand in hand with the philosophy, the aleatory narrative and miscellaneous scope expects readers to critique and expand beyond their conventional aesthetic modes of thinking and, in the end, makes the book itself "unsolvable."

The Discourses of Epictetus Hal Leonard Corporation

The year 2019 marked a number of significant anniversaries for the People's Republic of China (PRC), each representing different 'Chinese dreams'. There was the centennial of the May Fourth Movement — a dream of patriotism and cultural renewal. The PRC celebrated its seventieth anniversary — a dream of revolution and national strength. It was also thirty years since the student-led Protest Movement of 1989 — dreams of democracy and free expression crushed by government dreams of unity and stability. Many of these 'dreams' recurred in new guises in 2019. President Xi Jinping tightened his grip on power at home while calling for all citizens to 'defend China's honour abroad'. Escalating violence in Hong Kong, the ongoing suppression of Uyghurs in Xinjiang, and deteriorating Sino-US relations dominated the headlines. Alongside stories about China's advances in artificial intelligence and genetically modified babies and its ambitions in the Antarctic and outer space, these issues fuelled discussion about what Xi's own 'China Dream' of national rejuvenation means for Chinese citizens and the rest of the world. The China Story

Yearbook: China Dreams reflects on these issues and more. It surveys the dreams, illusions, aspirations, and nightmares that coexisted (and clashed) in 2019 in China and beyond. As ever, we take a cross-disciplinary perspective that recognises the inextricable links between economy, politics, culture, history, language, and society. The Yearbook, with its accessible analysis of the main events and trends of the year, is an essential tool for understanding China's growing power and influence around the world.
