The Home Edit Ships of the Line

The French Revolutionary and Napoleonic Wars encompassed a period when rival European fleets vied for naval supremacy, and naval tactics were evolving. The British Royal Navy emerged triumphant as the leading world sea power, and the epitome of Britannic naval strength was the Ship-of-the-Line. These 'wooden walls' were more than merely floating gun batteries: they contained a crew of up to 800 men, and often had to remain at sea for extended periods. This book offers detailed coverage of the complex vessels that were the largest man-made structures produced in the pre-Industrial era.

The American fleet aircraft carrier Hornet is widely acknowledged for the contributions she made

to the war effort. The Doolittle Raid, launched from the Hornet's deck, inaugurated America's Pacific counteroffensive and transformed the aircraft carrier into one of the world's prime strategic weapon systems. She was one of three carriers to participate in the victory at Midway and the fighting around Guadalcanal. Through the experiences of this key warship and the eyes of her crew and the aviators who flew from her deck, Lisle Rose recreates the first desperate year of the war in the Pacific. He tells how the Hornet was molded into a deadly weapon of war, how the ship was fought and ultimately lost, and what it was like to live aboard her at a time when the fate of the United States depended on the Navy's tiny carrier fleet. In chronicling the carrier's operational history, the author contends that the fate of the Hornet's air group at Midway remains one of the great controversies in modern naval history and that the ship's importance in helping to keep the Japanese juggernaut at bay during the most critical period of the Pacific war is incontestable. His arguments ring true today as the controversy continues. Rose succeeds both in letting the reader see things the way the men of the Hornet did and in placing their experiences in a broad historical context.

The Ship Osprey Publishing

In celebration of one of science fiction's most beloved franchises, an updated edition of the acclaimed Ships of the Line hardcover collection. They dared to risk it all in a skiff of reeds or leather, on a ship of wood or steel, knowing the only thing between them and certain death was their ship. To explore, to seek out what lay beyond the close and comfortable, every explorer had to embrace danger. And as they did so, what arose was a mystical bond, a passion for the ships that carried them. From the very first time humans dared to warp the fabric of space, escaping from the ashes of the third World War, they also created ships. These vessels have become the icons of mankind's desire to rise above the everyday, to seek out and make the unknown known. And these ships that travel the stellar seas have stirred the same passions as the ones that floated in the oceans. While every captain has wished that their starship could be outfitted in the same manner as the sailing ship H.M.S. Beagle—without weapons—that proved untenable. From the start, Starfleet realized that each vessel, due to the limited range of the early warp engines, must be able to stand alone against any attack. Thus arose the idea, taken from the days of wooden sailing ships, that every Starfleet vessel must stand as a ship of the line. Through the actions of their captains and crews, countless starships have taken on that role. Here we remember some of those ships and their heroic crews. In celebration of one of science fiction's most beloved franchises, this updated edition of the acclaimed Ships of the Line hardcover collection now includes dozens of additional images brought together for the first time in book format—spectacular renderings featured in the highly successful Star Trek: Ships of the Line calendar series. With text by Star Trek's own Michael Okuda, the story of each of these valiant starships now comes to life.™, ®, & © 2014 CBS Studios, Inc. A Novel Thomas Nelson

“Savagery appeased can only grow. Once you give in to it, it must escalate, like a fire searching for air.” The man who won the Pulitzer Prize for GLENGARRY GLEN ROSS, who wrote the classic films THE VERDICT and WAG THE DOG sounds his alarm about the Visigoths at our gates. In RECESSIONAL he calls out, skewers, mocks, and, most importantly, dissects the virus of conformity which is now an existential threat to the West. A broad-ranging journey through history, the Bible, and literature, RECESSIONAL examines how politics and cultural attitudes about rebellion have shifted in the United States in the last generation. By screaming down freedom of thought and expression, Mamet explains, we kill invention and democracy – the foundations of security and growth. A wickedly funny, wistful and wry appeal to the free-thinking citizen, RECESSIONAL is a vital warning that if we don't confront the cultural thuggery now, the commissars and their dupes will transform the Land of the Free into the dictatorship at which they aim.

New Earth Book One: wagon Train To The Stars Simon and Schuster

In terms of quality, historical significance and sheer numbers, the Kriegstein family's ship model collection in the United States is the finest in private hands anywhere in the world. Principally made up of official 17th- and 18th-century models in the Admiralty or Navy Board style, the collection is unrivalled by any museum outside the British national collection at Greenwich. As the models are not on public display, this book fills the need for a detailed catalogue and visual reference with superb colour photos of all the models, both overall portraits and multiple close-ups. Apart from lengthy descriptions of these magnificent artefacts, space is devoted to how they were identified, and the valuable research done by Arnold and Henry Kriegstein, the identical twins whose shared passion brought this all together. Beyond the technicalities of the ships, the story has a human dimension in the brothers' adventures in pursuit of every model and their dogged determination to secure them against official obstruction and dubious antiques-trade practices. This is an entirely new and revised edition of Seventeenth and Eighteenth Century Ship Models first published in 2007, now expanded to include the additions to the collection since that date.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

“A beautiful book . . . a goldmine of information to anyone interested in the capital ships of the sailing navy of the 17th and 19th Centuries.”—Ships in Scale The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world, many of which are official, contemporary artifacts made by the craftsmen of the navy or the shipbuilders themselves, and ranging from the mid-seventeenth century to the present day. As such they represent a three-dimensional archive of unique importance and authority. Treated as historical evidence, they offer more detail than even the best plans, and demonstrate exactly what the ships looked like in a way

This period also coincided with the golden age of ship modelling. Each volume depicts a wide range of models, all shown in full color, including many close-up and detail views. These are captioned in depth, but many are also annotated to focus attention on interesting or unusual features, and the book weaves the pictures into an authoritative text, producing a unique form of technical history. The series is of particular interest to ship modellers, but all those with an enthusiasm for the ship design and development in the sailing era will be attracted to the in-depth analysis of these beautifully presented books.

From the day he is five-years-old and dropped off at his foster home of the next eleven years, Stephen is mentally and physically tortured. No one in the system can help him. He attended college, graduated, became a successful corporate executive, and married a wonderful woman with whom he established a loving family of his own.
