Designed for all healthcare professionals who work with children and young people, including those studying to become health play specialists and children's nurses, this text provides practical examples of how all members of the multidisciplinary team can help to support children's play.

**The Development of Children** Rowman & Littlefield

A language develops over time, it develops in a child, and the capacity for language has evolved in the human species.

**Honey Paw and Lightfoot** Routledge

An engaging account of how new languages come into being, arguing that children are the driving force.

Uncle Lightfoot, Flip That Switch Macmillan

The 'Get to Know Me' series is made up of resources aimed at children with additional needs and those who support them in the

classroom. Developed by child psychologist Dr Louise Lightfoot and illustrated by Catherine Hicks, the series includes activities specific to anxiety, depression and Obsessive Compulsive Disorder (OCD). This book, *Draw Along Sammy Sloth*, is an activity-based picture book story, in which individual children are encouraged to interact with the story in a creative way – through writing, drawing, scrap booking, collage, activities etc. Active engagement helps children to understand and process information, and aids long-term recall. It has been designed to support the individual child and encourage an empathetic and inclusive environment. In this book, we meet Sammy, a sloth who lives in a beautiful tree by the sea. The story follows Sammy as he wakes up one day to find he feels funny and strange. He can't sit still and does not feel like his usual happy and relaxed self. After pacing up and down he meets Anna the Armadillo who tells Sammy that he is silly and has no right to be sad when his life is good. Sammy hears this and feels embarrassed and ashamed of how he has been feeling. Sammy hides away until he meets a kind lizard who shows him kindness and empathy. This book was written with children with anxiety in mind, providing an opportunity to relate to Sammy's thoughts, feelings, behaviours and experiences. However, children with a range of needs may benefit from the story. The book is written in a narrative style, so it does not use diagnostic labels and is not intended for this purpose. Instead the focus is on creating a common language which children can understand and use to make sense of how they are feeling. A practitioner guidebook is also available (ISBN 9780815349419).

Healthy mental, emotional, and behavioral (MEB) development is a critical foundation for a productive adulthood. Much is known about strategies to support families and communities in strengthening the MEB development of children and youth, by promoting healthy development and also by preventing and mitigating disorder, so that young people reach adulthood ready

to thrive and contribute to society. Over the last decade, a growing body of research has significantly strengthened understanding of healthy MEB development and the factors that influence it, as well as how it can be fostered. Yet, the United States has not taken full advantage of this growing knowledge base. Ten years later, the nation still is not effectively mitigating risks for poor MEB health outcomes; these risks remain prevalent, and available data show no significant reductions in their prevalence. *Fostering Healthy Mental, Emotional, and Behavioral Development in Children and Youth: A National Agenda* examines the gap between current research and achievable national goals for the next ten years. This report identifies the complexities of childhood influences and highlights the need for a tailored approach when implementing new policies and practices. This report provides a framework for a cohesive, multidisciplinary national approach to improving MEB health.

*How Children Develop* Macmillan

While reformers and policymakers focus on achievement gaps, testing, and accountability, millions of students mentally and emotionally disengage from learning and many gifted teachers leave the field. Ironically, today's schooling is damaging the single most essential component to education—the joy of learning. How do we recognize the “wounds” caused by outdated schooling policies? How do we heal them? In her controversial new book, education writer and critic Kirsten Olson brings to light the devastating consequences of an educational approach that values conformity over creativity, flattens student's interests, and dampens down differences among learners. Drawing on deeply emotional stories, Olson shows that current institutional structures do not produce the kinds of minds and thinking that society really needs. Instead, the system tends to shame, disable, and bore many learners. Most importantly, she presents the experiences of wounded learners who have healed and shows what teachers, parents, and students can do right now to help themselves stay healthy. “We need to replace industrial schooling with more genuinely caring and humane ways of teaching, and Olson clearly shows us why and how to do it.” —Ron Miller, Editor, *Education Revolution* magazine “*Wounded by School* is not

merely a technical repair manual for our broken schools, it is a guide to how to revive their purpose, their spirit, and their hope.” —David H. Rose, Founding Director, CAST (the Center for Applied Special Technology) “Kirsten Olson’s book is refreshingly unlike the general run of sludge I associate with writing about pedagogy. I can’t imagine anyone not being better for reading this book—Twice!” —John Taylor Gatto, author of *Dumbing Us Down* “I invite anyone invested in American public schools (and I hope that’s all of us) to read this book and join hands in building schools that help every student not only heal but thrive.” —Terry Chadsey, Associate Director, Center for Courage & Renewal “Olson questions the appropriateness of school structures, norms, rituals, and routines that were set in place—cast in stone more than a century ago—that now seem dangerously anachronistic and alienating. And she asks us to consider the ways in which we might create more cherishing and inclusive school cultures that would incite learning and love.” —From the Foreword by Sara Lawrence-Lightfoot, Harvard Graduate School of Education

*The Emotional Life of the Toddler* Greenwood Books Ltd

This interdisciplinary volume explores art, its development, and its role in the construction of knowledge. Presenting theory and research on artistic development as a cultural and creative endeavor, contributors examine the origins of human art during the Paleolithic cultural revolution, as part of a modern cultural transformation, in the growth of a creative artist, and in developing children. Target chapters expressing the disciplinary perspectives of psychology, archaeology, communications, education, and the performing arts are followed by commentaries from internationally acclaimed scholars of human development. Part 1 explores how cultures harness and exploit the arts to give expression to values, social practices, and traditions. This section traces the emergence of new art forms that arose during social unrest, including the symbolization of spiritual beliefs expressed on the walls of Paleolithic caves, and the racial identity and cultural values expressed in the media of the hip-hop generation. Part 2 examines the journeys of a composer and a group of students to highlight the process of becoming an artist and the role education plays in its development. The book concludes with a focus on the development of aesthetic appreciation and artistic activity in childhood and adolescence, including, for example, how a child’s developing theory of mind affects appreciation for the

arts, and how developing empathy and emotional regulation contribute to the cognitive and affective underpinnings of acting in adolescence. As a whole contributors explore the developmental, sociocultural, and evolutionary processes that make the creation and experience of art possible. Intended for researchers and advanced students in both human development and the arts, this book will also serve as a textbook for advanced courses on psychology and the arts and/or special topics courses in cognitive and/or human development.

#### *Born to Parse* Psychology Press

An argument that children are born to assign structures to their ambient language, which feeds a view of language variation not based on parameters defined at UG. In this book, David Lightfoot argues that just as some birds are born to chirp, humans are born to parse--predisposed to assign linguistic structures to their ambient external language. This approach to language acquisition makes two contributions to the development of Minimalist thinking.

Social Development provides a comprehensive introduction to the multiple factors that shape a child's behavior, interaction with others, feelings about themselves, and how and why behaviors change over time. Delving into the biological, cognitive, and perceptual aspects of development and their influence on behavior, socialization, and self-image, this text also recognizes the significance of cultural and societal distinctions by emphasizing the value of context and identifying cultural variation's role in social development. Special pedagogical features in each chapter enhance the learning experience and promote student understanding: counter-intuitive examples challenge reader assumptions, coverage of extreme cases tell the story behind historical advancements, and profiles of current leaders in the field highlight the many paths to a career in social development. With a focus on real-world application, coupled with coverage of cutting-edge methodologies and the latest research findings, this book gives students a strong, highly relevant foundation in core concepts and practices central to the study of social development.

NATIONAL BESTSELLER • A renowned Harvard University professor offers valuable insights, incisive lessons, and deft guidance on how to communicate more effectively to help parents and teachers make the most of parent-teacher conferences, the essential conversation between the most vital people in a child's life. "An enormously important volume . . . that will help us all understand what happens when children leave home in order to learn at school."—Robert Coles, author of *Children of Crisis* and *Lives of Moral Leadership* "The essential conversation" is the crucial exchange that occurs between parents and teachers—a dialogue that takes place more than one hundred million times a year across our country and is both mirror of and metaphor for the larger cultural forces that define family-school relationships

and shape the development of our children. Participating in this twice-yearly ritual, so friendly and benign in its apparent goals, parents and teachers are often wracked with anxiety. In a meeting marked by decorum and politeness, they frequently exhibit wariness and assume defensive postures. Even though the conversation appears to be focused on the student, adults may find themselves playing out their own childhood histories, insecurities, and fears. Through vivid portraits and parables, Sara Lawrence-Lightfoot captures the dynamics of this complex, intense relationship from the perspective of both parents and teachers. She also identifies new principles and practices for improving family-school relationships. In a voice that combines the passion of a mother, the skepticism of a social scientist, and the keen understanding of one of our nation's most admired educators, Lawrence-Lightfoot offers penetrating analysis and an urgent call to arms for all those who want to act in the best interests of their children.

Nominee for the 2012 Silver Birch Express Award in the Ontario Library Association's Forest of Reading Program This lavishly illustrated book brings Gordon Lightfoot's heart-stirring song, "Canadian Railroad Trilogy," to readers young and old. The song was commissioned by the CBC in 1967 to mark Canada's centennial year and it has been a classic ever since. It eloquently describes the construction of the Canadian Pacific Railway -- "an iron road runnin' from the sea to the sea" -- a great feat of nation building that changed Canada forever for good and for ill, as in the process many people died and were dispossessed of their land. Highly acclaimed, award-winning illustrator Ian Wallace brings the song to visual life with his sweeping landscapes and evocative portrayals of the people who lived the building of the railroad -- from the financiers in the east to First Nations people across the country to the thousands of navvies themselves, many of whom came from as far away as China.
