RICHARD BLEVINS

Catalogue du fonds de la guerre
 Bloomsbury Publishing
 The contrast between battlefield and home front, soldier and civilian was the basis for memory and collective gratitude. Postwar commemoration, however, also grew directly out of the long and agonized search for the remains of hundreds of thousands of missing soldiers, and the sometimes contentious debates over where to bury them. For this reason, the local monument, with its inscribed list of names and its functional resemblance to tombstones, emerged as the focal point of commemorative practice. Sherman traces every step in the process of monument

building as he analyzes commemoration's competing goals--to pay tribute to the dead, to console the bereaved, and to incorporate mourners' individual memories into a larger political discourse."--Pub. description.

Champs de bataille de France University of Chicago Press

Nations, Identities and the First World War examines the changing perceptions and attitudes about the nation and the fatherland by different social, ethnic, political and religious groups during the conflict and its aftermath. The book combines chapters on broad topics like propaganda state formation, town and nation, and minorities at war, with more specific case studies in order to deepen our understanding of how processes of national identification supported the cultures of total war in Europe. This

transnational volume also reveals and develops a range of insightful connections between the themes it covers, as well as between different groups within Europe and different countries and regions, including Western and Eastern Europe, the Ottoman Empire and colonial territories. It is a vital study for all students and scholars of the First World War.

L'Opinion Editions Imago

In this new edition, with a new preface and an updated bibliography, the author provides a comprehensive and well-documented survey of the evolution and growth of the remarkable military enterprise of the Roman army. Lawrence Keppie overcomes the traditional dichotomy between the historical view of the Republic and the archaeological approach to the Empire by examining archaeological evidence from the earlier

years. The arguments of The Making of the Roman Army are clearly illustrated with specially prepared maps and diagrams and photographs of Republican monuments and coins.
