Residential Design Using AutoCAD 2022 is an introductory level tutorial which uses residential design exercises as the means to teach you AutoCAD 2022. Each book comes with access to extensive video instruction in which the author explains the most common tools and techniques used when designing residential buildings using AutoCAD 2022. After completing this book you will have a well-rounded knowledge of Computer Aided Drafting that can be used in the industry and the satisfaction of having completed a set of residential drawings. This textbook starts with a basic introduction to AutoCAD 2022. The first three chapters are intended to get you familiar with the user interface and the most common menus and tools. Throughout the rest of the book you will design a residence through to its completion. Using step-by-step tutorial lessons, the residential project is followed through to create elevations, sections, details, etc. Throughout the project, new AutoCAD commands are covered at the appropriate time. Focus is placed on the most essential parts of a command rather than an exhaustive review of every sub-feature of a particular command. The Appendix contains a bonus section covering the fundamental principles of engineering graphics that relate to architecture. This book also comes with extensive video instruction as well as bonus chapters that cover must know commands, sketching exercises, a roof study workbook and much more. About the

Videos Each book includes access to extensive video training created by author Daniel Stine. The videos make it easy to see the exact menu selections made by the author while he describes how and why each step is made making it straightforward and simple to learn AutoCAD. These videos allow you to become familiar with the menu selections and techniques before you begin the tutorial. By watching these videos you will be more confident in what you are doing and have a better understanding of the desired outcome of each lesson.

Part narrative, part business book; Architect + Entrepreneur is filled with contemporary, relevant, fresh tips and advice, from a seasoned professional architect building a new business. The guide advocates novel strategies and tools that merge entrepreneurship with the practice of architecture and interior design. The Problem: Embarking on a new business venture is intimidating; you have questions. But many of the resources available to help entrepreneur architects and interior designers start their design business lack timeliness and relevance. Most are geared toward building colossal firms like SOM and Gensler using outdated methods and old business models. If you're an individual or small team contemplating starting a design business, this is your field guide; crafted to inspire action. The Solution: Using the lean startup methodology to create a minimum viable product, the handbook encourages successive small wins that support a broader vision enabling one to, "think big, start small, and learn fast." It's a unique take on design practice viewed through the lens of entrepreneurship and is designed to answer the questions all new business owners face, from the rote to the existential. Questions about: - Startup costs - Business models (old and new) - Marriage of business and design - Mindset - Branding & naming (exercises and ideas) - Internet marketing strategies - Passive income ideas - Setting your fee - Taxes - Standard Operating Procedures (SOPs) - Securing the work - Client relations - Software - Billing rates - Contracts Building a business isn't a singular act; it's a series of small steps. Using the outline found in Architect + Entrepreneur you can start today. The chapters are organized to guide you from idea to action. Rather than write a business plan you'll be challenged to craft a brand and you'll sell it using new technologies. Follow the guide sequentially and you'll have both the tools and a profitable small business.
