DMSO is a natural

substance that is obtained

from wood. Medical and

pharmaceutical studies

have repeatedly shown

that DMSO has the

greatest range and

number of healing effects
ever recorded for a single
substance. Its

comprehensive healing
properties are unique, all

working in synergistic
harmony. Over the last

sixty years, more than
forty thousand research

articles on this substance
have been published but

the general public
remains unaware of these

discoveries, partly as a
result of efforts from

certain quarters to
suppress the

dissemination of that
information. Having been

treasured as a secret for
many years by just a

small number of
specialists and alternative

practitioners, DMSO is
currently enjoying a

remarkable comeback in
the field of alternative

medicine. This book now
makes this information

available in an accessible
and engaging manner,

revealing all about this
wonderful universal

medicine, its uses and its
applications. Hartmut

Fischer, an alternative
health practitioner with a

background in scientific
and pharmaceutical

research, has been
researching this

substance for many years
and uses it privately and

professionally in his
practice. This book is
intended as a practical,

application-oriented
reference book for

patients who treat
themselves, as well as for

doctors, alternative health
practitioners and other

therapists.

Drawing on healing

systems from around the

world, a medical

anthropologist and

herbalist offers natural

and holistic remedies for

treating Lyme disease

When Dr. Wolfe Stori was

diagnosed with lyme

disease, he refused

standard treatments

because of antibiotic

intolerance. Instead, he

researched healing

systems of various

cultures—including

Traditional Chinese

Medicine, American Indian

healing practices,

homeopathy, and

traditional Western herbal

lore—and discovered the

teasel root. Teasel, a

flowering plant that grows throughout Europe and Asia, tonifies the liver and kidneys, promotes blood circulation, and strengthens the bones and tendons. The plant has been documented to help cure chronic conditions marked by arthritis, sore, stiff muscles, and eventual incapacitation—all symptoms associated with Lyme disease. Dr. Storl's approach consists of flushing out toxins and inhibiting bacteria by using teasel root as tincture, powder, or tea (available for purchase online and in natural foods stores); stimulating the immune system and detoxifying the body by exposing it to extreme heat (sweat lodges and Japanese baths); and dietary and naturopathic measures, including fresh natural food, exercise, and sufficient sleep. Written in an encouraging, personal tone but based in science and clinical studies, *Healing Lyme Disease Naturally* offers hope in combating a condition that has stubbornly resisted conventional medical treatment.

Hugh's River Cottage Veg Every Day! became the UK's best-selling vegetable cookbook, persuading us through sheer temptation to make vegetables the mainstay of our daily cooking. In this much-anticipated follow-up, Hugh delivers more irresistible recipes, and this time, takes things one step further. Fuelled by his passionate belief that plant foods should be the dominant force in our kitchens, Hugh has put cheese, butter, cream, eggs, and refined flour and sugar firmly to one side. Instead, he uses veg, fruit, wholegrains, nuts, seeds, spices and cold-pressed oils to explore the length and breadth of what can be achieved with natural, unprocessed plant foods. River Cottage Much More Veg! makes it clear that unadulterated ingredients are the very best building blocks for delicious and healthy meals. In typical Hugh style, the recipes are easy, utterly foolproof and delicious. All but a handful are gluten-free, and at least half the dishes require 20 minutes (or less) hands-on work time. With recipes such as Roast squash and chickpeas with spicy

apricot sauce, Blackened cauliflower with pecans and tahini, Spiced beetroot, radicchio and orange traybake, Celeriac and seaweed miso broth, Seared summer cabbage with rosemary, chilli and capers, and Baked celery agrodolce, River Cottage Much More Veg!

demonstrates how easy it is to make versatile, plentiful and delicious vegetables the bedrock of your diet.

On a Dark Night I Left My Silent House is Nobel Prize winner Peter Handke's evocative, moving, often fantastic, short novel about one man's conflict with himself and his journey toward resolution. During one night shift, an unnamed, middle-aged pharmacist in Taxham, an isolated suburb of Salzburg, tells his story to a narrator. The pharmacist is known and well-respected, but lonely and estranged from his wife. He feels most comfortable wandering about in nature, collecting and eating hallucinogenic mushrooms. One day he receives a blow to the head that leaves him unable to speak, and the narrative is transformed from ironic description into a collection of

sensual impressions, observations and reflections. The pharmacist, who is now called the driver, sets out on a quest, travelling into the Alps with two companions—a former Olympic skiing champion and a formerly famous poet—where he is beaten and later stalked by a woman. He drives through a tunnel and has a premonition of death, then finds himself in a surreal, foreign land. In a final series of bizarre, cathartic events, the driver regains his speech and is taken back to his pharmacy—back to his former life, but forever changed. A powerful, poetic exploration of language, longing and dislocation in the human experience, *On a Dark Night I Left My Silent House* reveals Handke at his magical best.

Thin-layer chromatography (TLC) is a powerful, fast and inexpensive analytical method. It has proven its usefulness in pharmaceutical, food and environmental analysis. This new edition of the practical TLC guide features a completely revised chapter on documentation, now including the use of digital cameras. Selected new sorbents and instruments are also introduced. Why has the prior edition been successful? All steps of the analytical procedure are clearly explained, starting with the choice of a suitable TLC technique and ending with data evaluation and documentation. Special emphasis is put on the proper choice of materials for TLC. Properties and functions of various materials and the TLC equipment are described, covering e. g. precoated layers, solvents and

developing chambers, including information on suppliers. Many practical hints for trouble shooting are given. All this is illustrated with numerous coloured figures. How to use TLC in compliance with GLP/GMP regulations is described in detail, including the required documentation. Therefore the reader can very easily compile his own standard operating procedures.

The most promising natural substance in our body is NADH, the biological form of hydrogen. It reacts with the oxygen present in every living cell, producing energy and water. The more NADH a cell has available, the more energy it can produce, the better it

functions, and the longer the cell - and the entire organism - lives. ATP is the life energy for every cell. If less NADH is present in the cell, less ATP is synthesized. Certain diseases, particularly Alzheimer's dementia and Parkinson's disease, are caused by impairment in ATP production. We can increase the ATP content in a cell by supplementing with NADH.

This book series gives a comprehensive overview of the adverse effects of botanical medicines. It provides introductory information on Botany, Chemistry, Pharmacology and Uses, followed by an Adverse Reaction Profile subdivided according to organ and function. The third contribution to the series gives important

information about eighteen specific medicinal herbs and important plant constituents. The herbs and constituents have been selected for several reasons, such as a prominent place in phytotherapy, clinical expectations about therapeutic potential and recent concern about a serious adverse reaction. The World Health Organization Regional Office for Europe (Copenhagen) has supported the book in the form of an acknowledgement that has been prepared by this Office.
