Élevée dans une famille profondément religieuse, Claire se donne tout entière à sa foi. Pourtant, dès son mariage, ressortent les démons du passé demeurés pendant des années enfouis au plus profond d'elle et dont

elle ne soupçonnait pas l'existence. Un événement tragique va l'amener à questionner ses croyances et mettre en doute la sincérité des personnes de son entourage. Elle entame alors un voyage qui, petit à petit, l'amènera à réfléchir sur ce qui a toujours été pour elle «la vérité». Mais réussira-t-elle à en sortir indemne? Et surtout, quelle est cette

ombre mystérieuse qui vient lui rendre visite la nuit?

The Humanure Handbook Yale

Geodesy is the science of accurately measuring and understanding three fundamental properties of Earth: its geometric shape, its orientation in

space, and its gravity field, as well as the changes of these properties with time. Over the past half century, the United States, in cooperation with international partners, has led the development of geodetic techniques and instrumentation. Geodetic observing systems provide a significant benefit to society in a wide array of military, research, civil, and commercial areas, including sea level change monitoring, autonomous navigation, tighter low

flying routes for strategic aircraft, precision agriculture, civil surveying, earthquake monitoring, forest structural mapping and biomass estimation, and improved floodplain mapping. Recognizing the growing reliance of a wide range of scientific and societal endeavors on infrastructure for precise geodesy, and recognizing geodetic infrastructure as a shared national resource, this book provides an independent assessment of the benefits provided by

geodetic observations and networks, as well as a plan for the future development and support of the infrastructure needed to meet the demand for increasingly greater precision. *Precise Geodetic Infrastructure* makes a series of focused recommendations for upgrading and improving specific elements of the infrastructure, for enhancing the role of the United States in international geodetic services, for evaluating the requirements for a geodetic workforce for the

coming decades, and for providing national coordination and advocacy for the various agencies and organizations that contribute to the geodetic infrastructure.

Is television dead? The classic television era of the 1950s and 1960s, characterized by limited choices of programs broadcast on over the air channels to families as if they were seated around a hearth - and to a nation as if gathered around a

campfire - has indeed ended. Throughout the drastic evolution of this media, thousands of studies have examined the short-term effects of television, such as the evaluation of persuasion campaigns. Yet there is scant research on the overreaching sociological impacts of television and its centrality to Western culture over the past 60 years. This compelling volume of *The ANNALS* is the first collection of rigorous articles devoted to studying ways in which television has impacted

our values, ideologies, institutions, social structure, and culture.

This is a work of fiction based on the life and

times of John Henry Selman, one of the Old West's deadliest but least-known gunmen. Selman lived on both sides of the law-as leader of the vigilant Texas Home Guard and hired gun for the Seven Rivers gang. He was a deadly accurate shooter and left a bloody trail across the West. And in a gunfight that would create a legend, John Selman faced the West's most infamous outlaw, John Wesley Hardin, in one of the most notorious gunfights the Old West has ever known.

Infrastructure Petit Futé Comprehensive biography of Anthony Fokker, the famed Dutch pilot and daredevil aviator Anthony Fokker: The Flying Dutchman Who Shaped American Aviation tells the larger-than-life true story of maverick pilot and aircraft manufacturer Anthony Fokker. Fokker came from an affluent Dutch family and developed a gift for tinkering with mechanics. Despite not receiving a traditional education, he stumbled his way into aviation as a young stunt

pilot in Germany in 1910. He survived a series of spectacular airplane crashes and rose to fame within a few years. A combination of industrial espionage, luck, and deception then propelled him to become Germany's leading aircraft manufacturer during World War I, making him a multimillionaire by his midtwenties. When the German Revolution swept the country in 1918 and 1919, Fokker made a spectacular escape to the United States. He set up business in New York and

New Jersey in 1921, and shortly thereafter became the world's largest aircraft manufacturer. The U.S. Army and Navy acquired his machines, and his factories equipped legendary carriers such as Pan American and TWA at the dawn of commercial air transport. Yet despite his astounding success, his empire collapsed in the late 1920s after a series of ill-conceived business decisions and deeply upsetting personal dramas. In 1927, aviator Richard Byrd solicited a Fokker three-engine plane

to be the first to fly non-stop across the Atlantic. The plane was damaged on a test flight and Charles Lindbergh beat him to it. Lindbergh's solo adventure in the Spirit of St. Louis earned him--and cost Fokker--a lasting place in the history books. Using previously undiscovered records and primary sources, Marc Dierikx traces Fokker's extraordinary life and celebrates his spectacular achievements.

HFT The Gardener

presents the culmination of a project comprising multiple bodies of work by the fictional character Hillel Fischer Traumberg. Traumberg is an algorithmic high-frequency trader (HFT), who experiments with psychoactive drugs, and explores the ethno-pharmacology of over a hundred psychoactive plants. He uses gematria (Hebrew numerology) to discover the numerological equivalents of the plants' botanical names with companies in the Financial Times Global

500 Financial Index. He communes with the traditional shamanic users of these plants whose practices include healing, divining the future, entering the spirit world, and exploring the hallucinatory nature of reality. Traumberg develops a fantasy of himself as a techno-shaman, transmuting the spiritual dimensions of the universe and the hallucinogenic nature of capital into new art forms. He becomes an 'outsider artist' whose work is collected by oligarchs and

bankers, the world of global capital in which he began. HFT The Gardener is the fifth title to be published on the work of Suzanne Treister by Black Dog Publishing. Previous titles include Nato, Hexen 2.0, Hexen 2039 and Hexen 2.0 Tarot Deck.

London Orbital is Iain Sinclair's voyage of discovery into the unloved outskirts of the city. Encircling London like a

noose, the M25 is a road to nowhere, but when Iain Sinclair sets out to walk this asphalt loop - keeping within the 'acoustic footprints' - he is determined to find out where the journey will lead him. Stumbling upon converted asylums, industrial and retail parks, ring-fenced government institutions and lost villages, Sinclair discovers a Britain of the fringes, a landscape consumed by developers. London Orbital charts this extraordinary trek and round trip of the soul,

revealing the country as you've never seen it before. 'My book of the year. Sentence for sentence, there is no more interesting writer at work in English' John Lanchester, Daily Telegraph 'A magnum opus, my book of the year. I urge you to read it. In fact, if you're a Londoner and haven't read it by the end of next year, I suggest you leave' Will Self, Evening Standard 'A journey into the heart of darkness and a fascinating snapshot of who we are, lit by

Sinclair's vivid prose. I'm sure it will be read fifty years from now']. G.  Mayo 'A carefully crafted
 and utterly compelling
 tale of lost opportunity

and impossible choices.' Amanda Brooke, author of *The Affair* Why do you love your child? Is it because they're a straight A student, a talented footballer? Or is it simply because they're yours? Sarah and Phil love both their children, James and Lauren. The couple have the same hopes and aspirations as any parent. But their expectations are shattered when they discover that their perfect baby daughter has been born with a flaw; a tiny, but life-changing glitch that is destined to shape

her future, and theirs, irrevocably. Over time the family adapt and even thrive. Then one day a blood test casts doubt on the very basis of their family. Lauren is not Phil's child. Suddenly, their precious family is on the brink of destruction. But the truth they face is far more complex and challenging than simple infidelity. It tests their capacity to love, each other and their children, and it raises the question of what makes - and what breaks - a family. **Unmasked** Raintree

From the author of the *TRAINSPOTTING* and *SHALLOW GRAVE* screenplays, a novel about the unpredictable course of fate. An aspiring novelist meets a rich woman with a slender grip on the real world. In late December 2008, Ian Halperin told the world that Michael Jackson had only six months to live.

His investigations into Jackson's failing health made headlines around the globe. Six months later, the King of Pop was dead. Whatever the final autopsy results reveal, it was greed that killed Michael Jackson. Friends and associates paint a tragic picture of the last years and days of his life as Jackson made desperate attempts to prepare for the planned concert series at London's O2 Arena in July 2009. These shows would have earned millions for the singer and his entourage,

but he could never have completed them, not mentally, and not physically. Michael knew it and his advisors knew it. Anyone who caught even a fleeting glimpse of the frail old man hiding beneath the costumes and cosmetics would have understood that the London tour was madness. Why did it happen this way? After an intense five year investigation, New York Times bestselling author Ian Halperin uncovers the real story of Michael Jackson's final years, a

suspenseful and surprising thriller.
