"This is a book to savor,
especially if you're a fast-

"This fun, argumentative,
and frequently surprising

pop history of American
fast food will thrill and
educate food lovers of all
speeds." —Publishers
Weekly Most any honest
person can own up to
harboring at least one
fast-food guilty pleasure.
In Drive-Thru Dreams,
Adam Chandler explores
the inseparable link
between fast food and
American life for the past

century. The dark
underbelly of the
industry's largest players
has long been scrutinized
and gutted, characterized
as impersonal, greedy,
corporate, and worse. But,
in unexpected ways, fast
food is also deeply
personal and emblematic
of a larger than life image
of America. With wit and
nuance, Chandler reveals

the complexities of this industry through heartfelt anecdotes and fascinating trivia as well as interviews with fans, executives, and workers. He traces the industry from its roots in Wichita, where White Castle became the first fast food chain in 1921 and successfully branded the hamburger as the official all-American meal, to a teenager's 2017 plea for a year's supply of Wendy's chicken nuggets, which united the internet to generate the most viral tweet of all time. Drive-Thru Dreams by Adam

Chandler tells an intimate and contemporary story of America—its humble beginning, its innovations and failures, its international charisma, and its regional identities—through its beloved roadside fare.

More than two billion people worldwide have currently no access to grid electricity or other efficient energy supply. This is one third of humanity and the majority live in rural areas. The productivity and health of these people are diminished by reliance on traditional fuels and technologies, with women and children suffering most. Energy is the key element to

empower people and ensure water, food and fodder supply as well as rural development. Therefore access to energy should be treated as the fundamental right to everybody. Renewable energy has the potential to bring power, not only in the literal sense, to communities by transforming their prospects. This book offers options that meet the needs of people and communities for energy and engage them in identifying and planning their own provision. It

describes updated renewable energy technologies and offers strategies and guidelines for the planning and implementation of sustainable energy supply for individuals and communities.

"Alif had never set foot outside of West Sumatra. He passed his childhood days searching for fallen durian fruit in the jungle, playing soccer on rice paddies, and swimming in the blue waters of Lake Maninjau. His mother wants him to attend an Islamic boarding school, a pesantren, while he dreams of public high school. Halfheartedly, he follows his mother's wishes. He finds himself on a grueling three-day bus ride from Sumatra to Madani Pesantren (MP) in

a remote village on Java. On his first day at MP, Alif is captivated by the powerful phrase *man jadda wajada*. He who gives his all will surely succeed. United by punishment, he quickly becomes friends with five boys from across the archipelago, and together they become known as the Fellowship of the Manara. Beneath the mosque's minaret, the boys gaze at the clouds on the horizon, seeing in them their individual dreams of far-away lands, like America and Europe.

Where would these dreams take them? They didn't know. What they did know was: never underestimate dreams, no matter how high they may be. God truly is The Listener. The Land of Five Towers is the first book in a trilogy written by A. Fuadi—a former TEMPO & VOA reporter, photography buff, and a social entrepreneur. He went to George Washington University and Royal Holloway, University of London for his masters. A portion of the royalties from the

trilogy are intended to build Komunitas Menara, a volunteer-based social organization which aims to provide free schools, libraries, clinics and soup kitchens for the less fortunate. To learn more about Komunitas Menara and their activities, check out www.negeri5menara.com

Uncommon Grounds
Jossey-Bass

The idiosyncrasies of human decision-making have confounded economists and social theorists for years. If each

person makes choices for personal (and often irrational) reasons, how can people's choices be predicted by a single theory? How can any economic, social, or political theory be valid? The truth is, none of them really are. Mark Buchanan makes the fascinating argument that the science of physics is beginning to provide a new picture of the human or "social atom," and help us understand the surprising, and often predictable, patterns that emerge when they get together.

Look at patterns, not people, Buchanan argues, and rules emerge that can explain how movements form, how interest groups operate, and even why ethnic hatred persists. Using similar observations, social physicists can predict whether neighborhoods will integrate, whether stock markets will crash, and whether crime waves will continue or abate. Brimming with mind games and provocative experiments, *The Social Atom* is an incisive, accessible, and

comprehensive argument for a whole new way to look at human social behavior.

International Labor Office Whether it's a delicate green tea or a bracing Assam black, a cup of tea is a complex brew of art and industry, tradition and revolution, East and West. In this sweeping tour through the world of tea, veteran tea traders Mary Lou Heiss and Robert J. Heiss chronicle tea's influence across the globe and provide a complete reference for

choosing, drinking, and enjoying this beverage. The Story of Tea begins with a journey along the tea trail, from the lush forests of China, where tea cultivation first flourished, to the Buddhist temples of Japan, to the vast tea gardens of India, and beyond. Offering an insider's view of all aspects of tea trade, the Heisses examine *Camellia sinensis*, the tea bush, and show how subtle differences in territory and production contribute to the diversity of color, flavor, and quality in

brewed tea. They profile more than thirty essential tea varieties, provide an in depth guide to tasting and brewing, and survey the customs and crafts associated with tea. Sharing the latest research, they discuss tea's health benefits and developments in organic production and fair trade practices. Finally, they present ten sweet and savory recipes, including Savory Chinese Marbled Eggs and Green Tea Pot de Crème, and resources for purchasing fine tea. Vividly illustrated

throughout, *The Story of Tea* is an engrossing tribute to the illustrious, invigorating, and elusive leaf that has sustained and inspired people for more than two thousand years.

Build an

iconic brand? Welcome to the battlefield. The story wars are all around us. They are the struggle to be heard in a world of media noise and clamor. Today, most brand messages and mass appeals for causes are drowned out before they even reach us. But a few consistently break through the din, using the only tool that has ever moved minds and changed behavior—great stories. With insights from mythology, advertising history, evolutionary biology, and psychology,

viral storyteller and advertising expert Jonah Sachs takes readers into a fascinating world of seemingly insurmountable challenges and enormous opportunity. You'll discover how: • Social media tools are driving a return to the oral tradition, in which stories that matter rise above the fray • Marketers have become today's mythmakers, providing society with explanation, meaning, and ritual • Memorable stories based on timeless themes build legions of eager

evangelists • Marketers and audiences can work together to create deeper meaning and stronger partnerships in building a better world • Brands like Old Spice, The Story of Stuff, Nike, the Tea Party, and Occupy Wall Street created and sustained massive viral buzz
Winning the Story Wars is a call to arms for business communicators to cast aside broken traditions and join a revolution to build the iconic brands of the future. It puts marketers in the role of heroes with a chance to

transform not just their craft but the enterprises they represent. After all, success in the story wars doesn't come just from telling great stories, but from learning to live them.

This new edition of the book by Jean Bruneton has been revised and expanded by over 200 pages, to reflect the most recent advances (natural or semisynthetic substances) as well as the most recent contributions to the therapeutic arsenal

(antimalarial, antitumor, or antiretroviral agents). Building upon biosynthetic relationships, the author describes the different classes of metabolites and the drugs that produce them. Organized in four parts (primary metabolites, phenolics, shikimates and acetates, terpenes and steroids, alkaloids), the book develops for each class, phytochemical generalities, distribution, biosynthesis, extraction and quantitation methods, and biological aspects. For each raw material, it

presents the origin, identity, production, composition, uses, processing and optimization: thus a considerable amount of botanical, chemical, analytical, pharmacological and therapeutic data is gathered into a particularly coherent compilation, for each product, the therapeutic indications and recommended usage are specified. An extensive index (about 3 000 entries) and nearly 500 recent references

represent a valuable starting point for the reader's own literature research. This encyclopedia of pharmacognosy and phytochemistry is written for students, educators and professionals using plant resources in pharmacy, cosmetology, perfumery, botany, food technology and other fields.

The Bugis, who number about three million, live for the most part in the Indonesian province of South Sulawesi: they are among the most fascinating peoples of maritime Southeast Asia,

and the least known. Their image in legend and modern fiction is of bold navigators, fierce pirates and cruel slave traders, but most are in fact farmers, planters and fishermen. Although they are an Islamic people, they maintain such pre-Islamic relics as transvestite pagan priests and shamans. Their colorful nobility claims descent from the ancient gods, yet owes its power to social consensus. This book is the first to describe the history of the Bugis. It ranges from their

origins 40,000 years ago to the present and provides a complete picture of contemporary Bugis society. It is based on the author's extensive field research over the last 30 years, on oral tradition, written epics and chronicles, on travellers' tales from the sixteenth to the nineteenth centuries, and on the latest research by Western and Asian scholars in the fields of archaeology, history, linguistics and anthropology. The author reveals the brilliance of

Bugis civilization in all its exotic and extraordinary manifestations, and its survival through Dutch colonization, Japanese invasion and the incursions of modernity.
