"It is common to refer to the dynamism
and vitality of young people as a source
of change, creation, and innovation, but
they are often also considered a problem
that we do not know how to respond to.
Young people can make adults feel
uncomfortable because they are neither

children who can be told what to do nor adults to be treated as equals. From the perspective of adults, their status is socially and culturally ambiguous"--

Living Free Berghahn Books

The long-anticipated new version of the internationally recognized Early Childhood Environment Rating Scale®, ECERS-3, focuses on the full range of needs of preschool- and kindergarten-aged children. This widely used, comprehensive assessment tool measures both environmental provisions and teacher-child interactions that affect the broad developmental needs of young children, including: Cognitive Social-emotional Physical Health and safety ECERS-3 also includes additional Items assessing developmentally appropriate literacy and math activities. Designed for

preschool, kindergarten, and child care classrooms serving children 3 through 5 years of age, ECERS-3: Provides a smooth transition for those already using ECERS-R. Emphasizes the role of the teacher in creating an environment conducive to developmental gains. Is designed to predict child outcomes more accurately and with greater precision. Provides a stronger method of distinguishing between good and truly excellent programs. Offers a complete training program with ongoing support available at the Environment Rating Scales Institute (ERSI) website (www.ersi.info). ECERS-3 is appropriate for state and district-wide QRIS and continuous improvement; program evaluation by directors and supervisors; teacher self-evaluation; monitoring by

agency staff; and teacher education. The established reliability and long term evidence of validity of the ERS family of instruments make this new version of ECERS particularly useful for RTTT-ELC accountability and research. Suitable for use in inclusive and culturally diverse programs, ECERS-3 subscales evaluate: Space and Furnishings Personal Care Routines Language and Literacy Learning Activities Interaction Program Structure

Handbook of Detergents, Part B Springer Science & Business Media

This Handbook presents a complete and rigorous overview of the fundamentals, methods and applications of the multidisciplinary field of Global Navigation Satellite Systems (GNSS), providing an exhaustive, one-stop

reference work and a state-of-the-art description of GNSS as a key technology for science and society at large. All global and regional satellite navigation systems, both those currently in operation and those under development (GPS, GLONASS, Galileo, BeiDou, QZSS, IRNSS/NAVIC, SBAS), are examined in detail. The functional principles of receivers and antennas, as well as the advanced algorithms and models for GNSS parameter estimation, are rigorously discussed. The book covers the broad and diverse range of land, marine, air and space applications, from everyday GNSS to high-precision scientific applications and provides detailed descriptions of the most widely used GNSS format standards, covering receiver formats as well as IGS product

and meta-data formats. The full coverage of the field of GNSS is presented in seven parts, from its fundamentals, through the treatment of global and regional navigation satellite systems, of receivers and antennas, and of algorithms and models, up to the broad and diverse range of applications in the areas of positioning and navigation, surveying, geodesy and geodynamics, and remote sensing and timing. Each chapter is written by international experts and amply illustrated with figures and photographs, making the book an invaluable resource for scientists, engineers, students and institutions alike.

Goethe's Clavigo Ballantine Books

Drawing upon extensive theoretical knowledge and decades of empirical research by the author and others, this volume traces changes in the structure and content of self-representations from the preschool years through late adolescence. Harter provides a

trenchant analysis of the cognitive and social processes responsible for the development of each person's unique sense of self. Throughout, normative-developmental and individual difference variables are clearly identified and clinical applications spotlighted. This authoritative work will be read with interest by scholars, clinicians, and students interested in understanding the causes and consequences of low self-esteem, or in designing interventions to promote more adaptive self-evaluations. The Palace of Minos at Knossos Legare Street Press

On March 23, 1900, Arthur John Evans and his staff began to excavate on Crete, looking for the fabled site of Knossos, where an extraordinary civilization, a precursor to classical Greece, was

rumored to have existed. Almost from the first shovel stroke, artifacts began to emerge. Evans realized that here was "an extraordinary phenomenon, nothing Greek, nothing Roman. A wholly unexplored world." The Palace of Minos at Knossos recounts the exciting story of uncovering a remarkable society lost to the world for 3,500 years, from its initial discovery through its excavation to the structure we see today. Sidebars on archaeological techniques, illustrations of the sites, tables, and diagrams throughout provide a wealth of information on the Palace. The use of artifacts and other "documents" recovered from the Palace bring out the voices of the people of the past, offering clues to who they were and how they lived. The Palace of Minos at Knossos

concludes with an interview with archaeologist Chris Scarre who talks about the misperceptions about Knossos and what we really know about its culture.

KOSMOS eBooklet: Probleme im Haus - Unerwünschtes Verhalten beim Hund

Oxford University Press, USA

This classic volume provides a solid foundation for thinking about creative ways in which our society can work to prevent or minimize destructive couple conflict and enhance couples' abilities to constructively handle their differences. A common thread throughout is that constructive conflict and negotiation are beneficial for relationships. The new introduction provides an overview of how this classic text is still relevant today. Divided into four parts, this book:

*addresses the societal and bio-evolutionary underpinnings of couple conflict; *presents the interpersonal roots of couple conflict and the consequences for individuals and couples; *discusses what effects couple conflict have on children and how individual differences in children moderate these effects; *outlines policies and programs that address couple conflict; and * concludes with an essay that pulls these four themes together and points to new directions for research and program efforts. This book serves as a supplement in graduate or advanced undergraduate courses on interpersonal relationships, couples and/or family and conflict, divorce, couples and/or family therapy taught in human development and family studies,

clinical or counseling psychology, social work, sociology, and communications and it is also a helpful compendium for researchers and clinicians/counselors interested in couple conflict.

On Talking Terms with Dogs Dogwise Publishing

French Bulldog Training - Dog Training for your French Bulldog puppy The training of dogs is often... ... confused with classical dog training drills ... only considered necessary for demanding dogs ... mocked by other dog owners ... replaced by anti-authoritarian methods ... considered too difficult to achieve without experience. What constitutes dog training and what is it good for? And how can you and your French Bulldog profit from it without having any experience? The most important thing is

to understand how a dog sees his world, what is "normal" for him and how you can use this to your advantage. In addition, the characteristics of each breed are significant when you get beyond the basic training phase. Your French Bulldog will show characteristics which are different to those of a Husky, for example, and this is predominantly what you need to consider during training. This book is vol. 1 of the French Bulldog training books. Vol. 2 for your grown up French Bulldog is also available with the title "French Bulldog Training Vol. 2: Dog Training for your grown-up French Bulldog" Author Claudia Kaiser says about her book: "It was my desire to let other dog owners profit from the knowledge I have gained over many years, and after making many

mistakes. I love my dog and know how important it is to adapt the training to suit each breed. It is exactly this desire that prompted me to write this book. My aim is to help every beginner, not only to understand his dog better, but also to know exactly how to get the best results, step-by-step, so that you can achieve a close, positive and trusting human-dog relationship." Quench your curiosity to know about background information, read reports on other experiences and obtain step-by-step instructions and secret tips which are tailor-made for your French Bulldog. Get your copy of this book today and experience... .. how your French Bulldog sees his world ... and how you can progressively train your dog to receive the best results. Your French Bulldog will appreciate it...

Jahrgang 1882 Frank & Timme GmbH
 Internal Fire is the captivating history of the internal combustion engine and the creative individuals who brought it to life. From gunpowder to diesel, the development of these early powerhouses has been recorded from all sides. The influences of new technologies, patents,

and obtainable fuels, as well as a growing understanding of the very nature of heat itself are all explored. Internal Fire is not intended as a textbook, but as the well-researched and readable chronicle of a mechanical servant that has greatly influenced life in the 20th century and beyond. You will find in this comprehensive book: ■ Gunpowder and Steam ■ Air Engines ■ Thermodynamics: Carnot Charts a Course ■ Patents: Origin and Influence ■ Internal-Combustion Engines: 1791-1813 ■ Searching and Perfecting: 1820-1860 ■ The Genesis of an Industry ■ Otto and Langen ■ Otto's Four-Stroke Cycle ■ Brayton and His Ready Motor ■ The Two-Stroke Cycle ■ Gas and Gasoline Engines to 1900 ■ Oil Engines: An Interim Solution ■ Rudolf Diesel: The

End of the Beginning

The Empire of the Hittites Teachers College Press

The history of the Swiss National Park, from its creation in the years before the Great War to the present, is told for the first time in this book. Unlike Yellowstone Park, which embodied close cooperation between state-supported conservation and public recreation, the Swiss park put in place an extraordinarily strong conservation program derived from a close alliance between the state and scientific research. This deliberate reinterpretation of the American idea of the national park was innovative and radical, but its consequences were not limited to Switzerland. The Swiss park became the prime example of a "scientific national park," thereby

influencing the course of national parks worldwide.

International Handbook of Autism and Pervasive Developmental Disorders Guilford Press

When the University of Chicago Press launched the landmark History of Cartography series nearly thirty years ago, founding editors J.B. Harley and David Woodward hoped to create a new basis for map history. They did not, however, anticipate the larger renaissance in map studies that the series would inspire. But as the renown of the series and the comprehensiveness and acuity of the present volume demonstrate, the history of cartography has proven to be unexpectedly fertile ground.--Amazon.com.

The Other End of the Leash U of

Minnesota Press

Story of the unique relationship of a wild animal with its human friends.

Couples in Conflict Routledge

Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely

different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover:

- How you can get your dog to come when called by acting less like a primate and more like a dog
- Why the advice to “get dominance” over your dog can cause problems
- Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief
- How dogs and humans share personality

types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Touch Crown Archetype

As information becomes more ubiquitous and the demands that searchers have on search systems grow, there is a need to support search behaviors beyond simple lookup. Information seeking is the process or activity of attempting to obtain information in both human and technological contexts. Exploratory search describes an information-seeking problem context that is open-ended, persistent, and multifaceted, and

information-seeking processes that are opportunistic, iterative, and multitactical. Exploratory searchers aim to solve complex problems and develop enhanced mental capacities. Exploratory search systems support this through symbiotic human-machine relationships that provide guidance in exploring unfamiliar information landscapes. Exploratory search has gained prominence in recent years. There is an increased interest from the information retrieval, information science, and human-computer interaction communities in moving beyond the traditional turn-taking interaction model supported by major Web search engines, and toward support for human intelligence amplification and information use. In this lecture, we

introduce exploratory search, relate it to relevant extant research, outline the features of exploratory search systems, discuss the evaluation of these systems, and suggest some future directions for supporting exploratory search.

Exploratory search is a new frontier in the search domain and is becoming increasingly important in shaping our future world. Table of Contents: Introduction / Defining Exploratory Search / Related Work / Features of Exploratory Search Systems / Evaluation of Exploratory Search Systems / Future Directions and concluding Remarks

Whisperer shows you how to develop the calm-assertive energy of a successful pack leader and use it to improve your dog's life—and your own. Be the Pack Leader is Cesar Millan's guide for taking your relationship with your dog to a higher level. By developing the skills necessary to become the calm-assertive owner your dog needs in order for him to live a balanced, fulfilled life, you'll improve your dog's behavior and your own life as well. Be the Pack Leader is filled with practical tips and techniques, including:

- How to use calm-assertive energy in relating to your dog—and to others around you
- The truth about behavioral tools, from leashes and harnesses to clickers and e-collars
- How to satisfy the needs of your dog's breed
- Success stories from Cesar's clients,

viewers, and fans—including the Grogan family of Marley & Me fame

- A quick reference guide of specific, step-by-step procedures to tackling some of the most common dog behavior problems “[Cesar] arrives amid chaos and leaves behind peace.” —Malcolm Gladwell, *The New Yorker*
- “[Millan is] serene and mesmerizing. . . . He deserves a cape and a mask.” —*New York Times*

Diagnostik und Planung Springer

In Touch, Laura U. Marks develops a critical approach more tactile than visual, an intensely physical and sensuous engagement with works of media art that enriches our understanding and experience of these works and of art itself. These critical, theoretical, and personal essays serve as a guide to developments in

nonmainstream media art during the past ten years -- sexual representation debates, documentary ethics, the shift from analog to digital media, a new social obsession with smell. Marks takes up well-known artists like experimental filmmaker Ken Jacobs and mysterious animators the Brothers Quay, and introduces groundbreaking, lesser-known film, video, and digital artists. From this emerges a materialist theory -- an embodied, erotic relationship to art

and to the world. Marks's approach leads to an appreciation of the works' mortal bodies: film's volatile emulsion, video's fragile magnetic base, crash-prone Net art; it also offers a productive alternative to the popular understanding of digital media as "virtual" and immaterial. Weaving a continuous fabric from philosophy, fiction, science, dreams, and intimate experience, Touch opens a new world of art media to readers.
