World MIT
Press (MA)
Featuring the
latest
research
commissioned
on the

occasion of
the Bauhaus
centenary,
this book
explores the
global
influence of

the renowned Bauhaus school of arts and its famed artists. Bauhaus Imaginista marks the centennial anniversary of this fascinating and popular school of art, which championed the idea of artists working together as a community. The Bauhaus reconnected art with everyday life and was active in the fields of architecture, performance, design, and visual art. Founded by

Walter Gropius, its faculty included such luminaries as Paul Klee, Wassily Kandinsky, La' szlo' Moholy-Nagy, and Josef Albers. Placing emphasis on the international dissemination and reception of the Bauhaus, this book expresses the Bauhaus' influence, philosophy, and history beyond Germany. Rethinking the school from an international perspective, it sets its

entanglement s against a century of geopolitical change, as many of its artists fled World War II Germany. Bauhaus Imaginista takes readers on a global visual tour of Bauhaus influence from art and design museums to campus galleries and art institutes in India, Japan, China, Russia, Brazil, Berlin, and the United States. *The New Landscape in Art and Science* Lars Muller Publishers

One of the aims of the book is to shed more light on the notion Neue Sachlichkeit in

its appearance in a variety of fields as painting, architecture, music, photography and literature, in order to get a clearer idea of its scope. Several contributions will do so by analysing the heterogeneity in the use of the term concerning its function in the fight for recognition in the art-fields around 1930 - in other words, Neue Sachlichkeit will be analysed as a positioning strategy. Especially its

participation in the broader discourse on modernity, as well as its international and intermedial dimension will be highlighted, often using the historical avant-garde as point of reference. From this perspective, the present volume wants to be read as a plea for a differentiated description of the many shared aspects and some differences between the avant-garde and Neue

Sachlichkeit. <i>Moving Forward, Looking Back</i> Jovis 'One of the most famous of modern art documents - a poetic primer, prepared by the artist for his Bauhaus pupils, which has deeply affected modern thinking about art . . . This little handbook leads us into the mysterious world where science and imagination fuse.' Observer <i>Bauhaus 1919-1933</i> Rodopi	In 1924, while serving as director of the Bauhaus, Walter Gropius built his first private house in the architectural style he was developing at the school: the Auerbach House. Built for Felix Auerbach, a physics professor in Jena, a university town near Weimar, the house was an early instantiation of the nascent Bauhaus Style and an important milestone for the early	years of the school. <u>A Hundred Years of Photography, 1839-1939</u> Alan Wofsy Fine Arts With Building in France, Building in Iron, Building in Ferroconcrete (1928)—publis hed now for the first time in English—Sigfri ed Giedion positioned himself as an eloquent advocate of modern architecture. This was the first book to exalt Le Corbusier as the artistic champion of
---	---	--

the new movement. It also spelled out many of the tenets of Modernism that are now regarded as myths, among them the impoverishment of nineteenth-century architectural thinking and practice, the contrasting vigor of engineering innovations, and the notion of Modernism as technologically preordained. Asymmetric Typography Getty Publications Kazimir Malevich's

painting Black Square is one of the twentieth century's emblematic paintings, the visual manifestation of a new period in world artistic culture at its inception. None of Malevich's contemporary revolutionaries created a manifesto, an emblem, as capacious and in its own way unique as this work; it became both the quintessence of the Russian avant-gardist's own art—which he

called Suprematism—and a milestone on the highway of world art. Writing about this single painting, Aleksandra Shatskikh sheds new light on Malevich, the Suprematist movement, and the Russian avant-garde. Malevich devoted his entire life to explicating Black Square's meanings. This process engendered a great legacy: the original abstract movement in painting and

its theoretical grounding; philosophical treatises; architectural models; new art pedagogy; innovative approaches to theater, music, and poetry; and the creation of a new visual environment through the introduction of decorative applied designs. All of this together spoke to the tremendous potential for innovative shape and thought formation concentrated in Black Square. To this day, many

circumstances and events of the origins of Suprematism have remained obscure and have sprouted arbitrary interpretations and fictions. Close study of archival materials and testimonies of contemporaries synchronous to the events described has allowed this author to establish the true genesis of Suprematism and its principal painting. *Building in France, Building in Iron, Building*

Paul Klee was endowed with a rich and many-sided personality that was continually spilling over into forms of expression

other than his painting and that made him one of the most extraordinary phenomena of modern European art. These abilities have left their record in the four intimate Diaries in which he faithfully recorded the events of his inner and outer life from his nineteenth to his fortieth year. Here, together with recollections of his childhood in Bern, his relations with his family and such friends as Kandinsky,

Marc, Macke, and many others, his observations on nature and people, his trips to Italy and Tunisia, and his military service, the reader will find Klee's crucial experience with literature and music, as well as many of his essential ideas about his own artistic technique and the creative process.

National Geographic Books

Kasimir Malevich's treatise on Suprematism was included in the Bauhausbücher series in 1927, as was Piet Mondrian's reflections on Russian Constructivism in 1925 (New Design, Bauhausbücher 5). Like Mondrian, who was never an official member of the Bauhaus, Malevich nevertheless has a close connection to the ideas of the school in terms of content. This volume, the

eleventh, remains the only book publication in Germany to be produced during the life of the Russian avant-garde artist, and it laid the foundation for his late work: to wrest the mask of life from the true face of art.

New Works from the Bauhaus Workshops
Lars Muller Publishers
One hundred years after the founding of

Bauhaus, it s time to revisit bauhaus journal as significant written testimony of this iconic movement of modern art. In this journal, published periodically from 1926 to 1931, the most important voices of the movement are heard: masters of the Bauhaus, among others, Josef Albers, Walter Gropius, Wassily Kandinsky, Paul Klee, László Moholy-Nagy, and Oskar

Schlemmer, as well as Herbert Bayer, Marcel Breuer, Ludwig Mies van der Rohe, Gerrit Rietveld and many more. They address the developments in and around the Bauhaus, the methods and focal points of their own teaching, and current projects of students and masters. At the time primarily addressed to the members of the circle of friends of the Bauhaus, the journal published by Gropius and Moholy-Nagy makes tangible the authentic voice of this mouthpiece of the avant-garde. The facsimile reprint is intended to give new impetus to international discussion and research on the Bauhaus, its theories and designs. The exact replica of all individual issues are accompanied by a commentary booklet including an overview of the content, an English translation of all texts, and a scholarly essay which places the journal in its historical context. Includes 14 issues with separate commentary in transparent slipcase.

The Theater of the Bauhaus Wesleyan University Press
Kandinsky Compositions Wesleyan University Press
The Bauhaus, the school of art and design founded in Germany in

1919 and shut down by the Nazis in 1933, brought together artists, architects and designers in an extraordinary conversation about modern art. Bauhaus 1919-1933, published to accompany a major multimedia exhibition at MoMA, is the first comprehensive treatment of the subject by MoMA since 1938 and offers a new generational perspective on the 20th century's most influential experiment in artistic education. It brings together works in a broad range of mediums, including industrial design, furniture, architecture, graphics, photography, textiles, ceramics, theatre and costume design, and painting and sculpture - many of which have rarely if ever been seen outside of Germany. Featuring about 400 colour plates and a rich range of documentary images, this publication includes two overarching images by the exhibition's curators, Leah Dickerman and Barry Bergdoll, concise interpretive essays on key objects by over twenty leading scholars, and an illustrated, narrative chronology. Antarctic Resolution Getty Publications Walter Gropius outlines the guiding principles of Bauhaus living, from

household utensils to textiles and ceramics The Bauhaus sought to unite life, craftsmanship and art under one coherent ethos and aesthetic. In *New Works from Bauhaus Workshops--the seventh of the Bauhaus' publications--the institute's founder, Walter Gropius (1888-1969), provides a comprehensive overview of the Bauhaus workshops. He explains the basic principles guiding the*

teaching, describes contemporary developments in architecture and illuminates the Bauhaus point of view on household utensils, which was geared toward finding the most suitable form for the respective object. Here, Gropius presents the Bauhaus workshops in Weimar devoted to furniture, metals, textiles and ceramics, among other subjects. Moholy-Nagy and the New

Typography Bloomsbury Publishing Few creative movements have been more influential than the Bauhaus, under the leadership of Walter Gropius. The art of the theater commanded special attention. The text in this volume is a loose collection of essays by Oskar Schlemmer, Laszlo Moholy-Nagy, and Farkas Molnár (who in an illustrated essay shares

his vision of a total theatre space), with an introduction by Bauhaus leader Walter Gropius. Originally published in German in 1924, *Die Bühne im Bauhaus* was translated by A. S. Wensinger and published by Wesleyan in 1961. It was prepared with the full cooperation of Walter Gropius and his introduction was written specially for this edition. From Bauhaus experiments

there emerged a new aesthetic of stage design and presentation, a new concept of "total theater." Its principles and practices, revolutionary in their time and far in advance of all but the most experimental stagecraft today, were largely the work of Oskar Schlemmer, Laszlo Moholy-Nagy, and their students. Profusely illustrated and startling in its typography (the work of Moholy-Nagy), the 1924

volume quickly became a collector's item and is now virtually unobtainable. Those interested in the stage, the modern visual arts, or in the bold steps of the men of genius who broadened the horizons of aesthetic experience will appreciate that this translation is available again. **Principles of Neo-plastic Art** Thames & Hudson
In the era of the Anthropocene, it's urgent to

shift our collective attention southward. Antarctica, a continent that accounts for 10% of Planet Earth and 70% of the world's fresh water, represents at once the repository of planetary data essential to produce reliable climate change projections, and the biggest threat to all coastal sites.⁰⁰On the 200th anniversary of the discovery of Antarctica, 'Antarctic Resolution' offers a high-

resolution image of the hyper-surveilled yet neglected continent and instigates a decisive resolution towards a supra-national governance model. Advocating for true trans-national and cross-disciplinary collaboration, 'Antarctic Resolution' brings together, for the first time in Antarctic bibliography, international experts and practitioners in the fields of science, architecture,

engineering, history, political science, law, anthropology, literature, art and technology.⁰⁰ The holistic agenda of Antarctic Resolution, which includes dedicated chapters on the role of science and politics in the continent, culminates in the first ?Declassified Archive of Antarctic Architecture.? Revealing the unique evolution of inhabitation models and architectural typologies in

the extreme (from the first Antarctic hut to advanced contemporary structures), the Archive questions the motives that led to an unexpected architectural redundancy on the continent.00D developed by UNLESS, a not-for-profit organization which mobilizes architecture as an agency for territorial investigation, Antarctic Resolution juxtaposes academic content with highly visual information.

Alongside archival and contemporary photography, the book is dense with drawings, diagrams and cartographies produced by the global network of the Polar Lab.00Resistin g the temptation of imposing a conclusive narrative, the publication structure offers knowledge in the form of fragments ? flashes that shed light in a continent that lies in the dark for six months each year. Bauhaus

Women New York : Reinhold Publishing Corporation This book, a valuable introduction to the Bauhaus movement, is generously illustrated with examples of students' experiments and typical contemporary achievements. The text also contains an autobiographical sketch. **Bauhaus Imaginista** Kettler verlag Forty-five key women of the Bauhaus movement. Bauhaus Women: A Global
