Gonzalo Fernández de Oviedo (1478-1557) wrote the first comprehensive history of Spanish America, the *Historia general y natural de las Indias*, a sprawling, constantly revised work in which Oviedo attempted nothing less than a complete account of the Spanish discovery, conquest, and colonization of the Americas from 1492 to 1547, along with descriptions of the land's flora, fauna, and indigenous peoples. His *Historia*, which grew to an astounding fifty volumes, includes numerous interviews with the Spanish and indigenous leaders who were literally making history, the first extensive field drawings of America rendered by a European, reports of exotic creatures, ethnographic descriptions of indigenous groups, and detailed reports about the conquest and colonization process. Fernández de Oviedo's *Chronicle of America* explores how, in writing his *Historia*, Oviedo created a new historiographical model that reflected the vastness of the Americas and Spain's enterprise there. Kathleen Myers uses a series of case studies—focusing on Oviedo's self-portraits, drawings of American phenomena, approaches to myth, process of revision, and depictions of Native Americans—to analyze Oviedo's narrative and rhetorical strategies and show how they relate to the politics, history, and discursive practices of his time. Accompanying the case studies are all of Oviedo's extant field drawings and a wide selection of his text in English translation. The first study to examine the entire *Historia* and its evolving rhetorical and historical context, this book confirms Oviedo's assertion that "the New World required a different kind of history" as it helps modern readers understand how the discovery of the Americas became a catalyst for European historiographical change.

In 1979, Steven C. Caton went to a remote area of Yemen to do fieldwork on the famous oral poetry of its tribes. Soon he was embroiled in a dangerous local conflict. This is Caton's touchingly candid account of the extraordinary events that ensued.

In the early hours of April 22, 1914, American President Woodrow Wilson sent Marines to seize the port of Veracruz in an attempt to alter the course of the Mexican Revolution. As a result, the United

States seemed on the brink of war with Mexico. An international uproar ensued. The governments of Argentina, Brazil, and Chile offered to mediate a peaceful resolution to the crisis. Surprisingly, both the United States and Mexico accepted their offer and all parties agreed to meet at an international peace conference in Niagara Falls, Ontario. For Canadians, the conference provided an unexpected spectacle on their doorstep, combining high diplomacy and low intrigue around the gardens and cataracts of Canada's most famous natural attraction. For the diplomats involved, it proved to be an ephemeral high point in the nascent pan-American movement. After it ended, the conference dropped out of historical memory. This is the first full account of the Niagara Falls Peace Conference to be published in North America since 1914. The author carefully reconstructs what happened at Niagara Falls, examining its historical significance for Canada's relationship with the Americas. From this almost forgotten event he draws important lessons on the conduct of international mediation and the perils of middle-power diplomacy.

USAhistory.com offers facts about the Mexican-American War (1846-1848). The annexation of Texas by the United States was a leading factor in the start of the conflict. A chronology of the battles is provided. The war was ended with the Treaty of Guadalupe Hidalgo on February 2, 1848.

First Published in 1968. This is Volume I of three of the chronological history of the West Indies and is a register of events relating to the West Indies, arranged in the only manner suited to the subject, for the plan comprehends the whole of the Columbian islands, and as they belong to different European powers, and some even of those which are subject to the same crown, have little or no connexion with each other, there is no other natural or convenient order wherein their history can be composed, than that which a chronological series offers.

This book analyzes the initial engagement with Hollywood by key Latin American writers, examining the ways in which these writers seized the opportunity to reassert their relevance in the rapidly modernizing public sphere by actively – and often subversively – mediating encounters between Hollywood and local audiences.

This book proposes an innovative conceptual framework to explore cultural organizations at a multilateral level and cultural mediators as key figures in cultural and institutionalization processes. Specifically, it analyzes the role of Ibero-American mediators in the institutionalization of Hispanic and Lusophone cultures in the first half of the 20th century by means of two institutional networks: PEN (the non-governmental writer's association) and the International Institute of Intellectual Cooperation (predecessor to UNESCO). Attempting to combine cultural and global history, sociology, and literary studies, the book uses an analytical focus on intercultural networks and cultural transfer to investigate the multiple activities and roles that these mediators and cultural organizations set in motion. Literature has traditionally studied major figures and important centers of cultural production, but other regions and localities also played a crucial role in the development of intellectual cooperation. This book reappraises the place of Ibero-America in international cultural relations and retrieves the lost history of key secondary actors. The book will appeal to scholars from international relations, global and cultural history, sociology, postcolonial Studies, world and comparative literature, and New Hispanisms. This edition of the journal dedicated to sailing navies of the Georgian era examines the relationship between the British and American navies. The *Trafalgar Chronicle*, the yearbook of The 1805 Club, is a prime source of information and the publication of choice for new research about the Georgian navy, sometimes also loosely referred to as "Nelson's Navy." Successive editors have widened the scope to include all sailing navies of the period, but its scope reaches out to include all the sailing navies of the era. A fundamental thread running through the journal is the *Trafalgar* campaign and the epic battle of twenty-one October 1805 involving British, French, and Spanish ships, and some 30,000 men of a score of nations. Each volume is themed, and this new edition contains a particularly Anglo-American flavour, focussing on North America and North Americans in Nelson's Navy, with one article, for example, describing how the U.S. National anthem was composed onboard a British warship. Seventeen articles offer a wealth of information and new research covering such diverse

subjects as the true appearance of Victory and the story of the little known American, Sir Isaac Coffin, who helped carry the pall at Nelson's funeral. With contributions from leading experts in the field and handsomely illustrated throughout, this yearbook casts intriguing light on that era of history which forever fascinates naval enthusiasts and historians alike.

A timely and prescient narrative that reveals how crumbling Mid-east relations dashed the promise of peace and fostered the Muslim terrorist movement, from an observer who lived it. In november 1993, on the lawns of the White House, Israel and the Palestinians signed the Oslo peace agreement. A year later, Yasser Arafat, Yitzhak Rabin and Shimon Peres received the Nobel Peace Prize in recognition of this historic achievement. In retrospect, it's easy to say that the decision of the five-person Nobel committee was premature. At the time, however, many people around the world were optimistic that the century-old Mid-east conflict was on the way to being resolved. In *Chronicle of a War Foretold*, Norman Spector documents how the promise of peace in the Mid-east gave way to the realities of death and destruction. Based on first-hand experience with the major players, from the Rabin assassination through 9/11 and the war on Afghanistan, Spector analyzes how the same forces and beliefs that led to the downward spiral in relations between Israelis and Palestinians spawned the bombing of the Twin Towers in Manhattan.

Mediation is the term James Ruppert uses to describe his important new theory of reading Native American fiction. Focusing on novels of six major contemporary American writers - N. Scott Momaday, James Welch, Leslie Silko, Gerald Vizenor, D'Arcy McNickle, and Louise Erdrich - Ruppert analyzes the ways in which these writers draw upon their bicultural heritage, guiding Native and non-Native readers alike to a different and expanded understanding of each other's worlds. While Native American writers may criticize white society, revealing its past and present injustices, their emphasis, Ruppert argues, is on healing, survival, and continuance. Their fiction aims to produce cross-cultural understanding rather than divisiveness. To that end they articulate the perspectives and values of competing world views. In particular they create characters who manifest what Ruppert calls "multiple identities" - determined by both Native and non-Native perceptions of the self. These writers use a variety of narrative techniques deriving from different cultural traditions. They might incorporate Native oral storytelling techniques, adapting them to written form, or they might reconstruct Native mythologies, investing them with new meaning and relevance by applying them to contemporary situations. As novel-writers, they also include features more characteristic of western European writing - such as the omniscient narrator or the detective-story plot.

What drove U.S. Catholics in their arduous quest, full of twists and turns over more than a century, to win an American saint? The absence of American names in the canon of the saints had left many of the faithful feeling spiritually unmoored. But while canonization may be fundamentally about holiness, it is never only about holiness, reveals Kathleen Sprows Cummings in this panoramic, passionate chronicle of American sanctity. Catholics had another reason for petitioning the Vatican to acknowledge an American holy hero. A home-grown saint would serve as a mediator between heaven and earth, yes, but also between Catholicism and American culture. Throughout much of U.S. history, the making of a saint was also about the ways in which the members of a minority religious group defined, defended, and celebrated their identities as Americans. Their fascinatingly diverse causes for canonization—from Kateri Tekakwitha and Elizabeth Ann Seton to many others that are failed, forgotten, or still under way—represented evolving national values as Catholics made themselves at home. Cummings's vision of American sanctity shows just how much Catholics had at stake in cultivating devotion to men and women perched at the nexus of holiness and American history—until they finally felt little need to prove that they belonged.
