El espacio, ya sea físico o virtual, puede tener un impacto significativo en el aprendizaje. Learning Spaces se centra en la forma en que las expectativas de los alumnos influyen en dichos espacios, en los

principios y actividades que facilitan el aprendizaje y en el papel de la tecnología desde la perspectiva de quienes crean los entornos de aprendizaje: profesores, tecnólogos del aprendizaje, bibliotecarios y administradores. La tecnología de la información ha aportado capacidades únicas a los espacios de aprendizaje,

ya sea estimulando una mayor interacción mediante el uso de herramientas de colaboración, videoconferencias con expertos internacionales o abriendo mundos virtuales para la exploración. Este libro representa una exploración continua a medida que unimos el espacio, la tecnología y la pedagogía para asegurar el éxito de los estudiantes.

World tuberculosis day takes place on the 24th of March, commemorating the date Robert Koch announced he had discovered TB bacillus, the bacterium causing tuberculosis. Tuberculosis is still a widespread epidemic in various parts of the world, leading to over one and a half million worldwide annual deaths, which disproportionately affects developing countries. The COVID-19 pandemic shifted countries' focus away from tuberculosis, putting the goals of the

End TB project at risk. The World Tuberculosis Day 2023 focuses on boosting awareness, hoping to increase public and political involvement—which will be crucial for the UN High-level meeting on TB in September 2023. Political will is needed to increase financial investment in current TB programs, as well as to improve the research and development of strategies to improve TB prevention (such as the development of a new TB vaccine), TB diagnosis (such as improving the speed and

efficiency of current molecular diagnostic tests), and TB treatment (such as finding shorter and more efficient treatments). It is in this spirit that Frontiers is launching a new article collection to coincide with this UN day. This occasion not only offers an opportunity to raise the visibility of tuberculosis but also to consider solutions to this ongoing epidemic.

bestselling author Lee Strobel's books for young adults and students thirteen and up—The Case for Christ Student Edition, The Case for a Creator Student Edition, The Case for Faith Student Edition, The Case for the Real Jesus Student Edition, and The Case for Grace Student Edition—are collected together in this ebook bind-up volume, presenting all the evidence for Christian faith in one place so readers can decide for themselves. Award-

winning journalist and investigator Lee Strobel's journey to faith began with a need for evidence that Christianity was worth believing, and his quest for answers led him to test and prove various held beliefs surrounding Jesus, God, and the elements of faith themselves over the years. Together in one ebook volume, all of his groundbreaking research and interviews with leading scholars have been collected together to answer the questions you have always asked, laying

out the facts and taking on the doubts many young people like you encounter every day. The Case for ... Student Collection: Presents all the compelling arguments for and against Christianity teens and young adults thirteen and up often ask and encounter in our world, so they can see the real facts Can be used as a primer on Christianity or as a resource to confirm why Christians can confidently believe what they do Contains infographics and charts to make the concepts clear

We can end TB Routledge In the United States, 1,200 community colleges enroll over ten million students each year—nearly half of the nation’s undergraduates. Yet fewer than 40 percent of entrants complete an undergraduate degree within six years. This fact has put pressure on community colleges to improve academic outcomes for their students. Redesigning

America’s Community Colleges is a concise, evidence-based guide for educational leaders whose institutions typically receive short shrift in academic and policy discussions. It makes a compelling case that two-year colleges can substantially increase their rates of student success, if they are willing to rethink the ways in which they organize programs of study, support services, and instruction. Community colleges were originally designed to expand

college enrollments at low cost, not to maximize completion of high-quality programs of study. The result was a cafeteria-style model in which students pick courses from a bewildering array of choices, with little guidance. The authors urge administrators and faculty to reject this traditional model in favor of “guided pathways”—clearer, more educationally coherent programs of study that simplify students’ choices without limiting their options and that enable

them to complete credentials and advance to further education and the labor market more quickly and at less cost. Distilling a wealth of data amassed from the Community College Research Center (Teachers College, Columbia University), *Redesigning America’s Community Colleges* offers a fundamental redesign of the way two-year colleges operate, stressing the integration of services and instruction into more clearly structured programs of

study that support every student’s goals.

Improving the use of evidence in teacher preparation is one of the greatest challenges and opportunities for our field. The chapters in this volume explore how data availability, quality, and use within and across preparation programs shed light on the structures, policies, and practices associated with high quality teacher preparation. Chapter

authors take on critical questions about the connection between what takes place during teacher preparation and subsequent outcomes for teachers and students – which has remained a black box for too long. Despite a long history of teacher preparation in the U.S. and a considerable investment in preservice and in-service training, much is still to be learned about how pre-service preparation impacts teacher effectiveness. A strong empirical basis that informs how specific

aspects of and approaches to teacher preparation relate to outcomes for graduates and their preK-12 student outcomes will provide a foundation for improved teaching and learning. Our book responds to stakeholders' collective responsibility to students and teachers to act more deliberately. Issues of data availability and quality, the uses of data for improvement, priorities for future research, and opportunities to promote evidence use in teacher

preparation are discussed throughout the volume to inspire collective action to push the field towards more use of evidence. Chapters present research that uses a variety of research designs, methodologies, and data sources to explore important questions about the relationship between teacher preparation inputs and outcomes. Little, Brown Books for Young Readers Debtors have been mocked, scolded and lied to for decades. We have been told that it is

perfectly normal to go into debt to get medical care, to go to school, or even to pay for our own incarceration. We've been told there is no way to change an economy that pushes the majority of people into debt while a small minority hoard wealth and power. The coronavirus pandemic has revealed that mass indebtedness and extreme inequality are a political choice. In the early days of the crisis, elected officials drew up plans to spend trillions of dollars. The only question

was: where would the money go and who would benefit from the bailout? The truth is that there has never been a lack of money for things like housing, education and health care. Millions of people never needed to be forced into debt for those things in the first place. Armed with this knowledge, a militant debtors movement has the potential to rewrite the contract and assure that no one has to mortgage their future to survive. Debtors of the World Must Unite. As

isolated individuals, debtors have little influence. But as a bloc, we can leverage our debts and devise new tactics to challenge the corporate creditor class and help win reparative, universal public goods. Individually, our debts overwhelm us. But together, our debts can make us powerful.

This much-needed case study book provides higher education and student affairs graduate students, practitioners,

and faculty with the tools to enhance their learning of student development theory and to apply this learning to practice. Each chapter offers a summary of theory – covering traditional and newer student development models – in addition to multiple case studies that help readers focus on practice that fosters social justice and inclusion. The case studies for each chapter represent a range of institutional types and diverse student populations, offering an opportunity to explore the

intersections of various developmental processes and to foster social justice and inclusion in higher education contexts. Guiding questions at the end of each case study offer opportunities for further discussion and critical reflection. An essential text for every student development course, *Case Studies for Student Development Theory* enhances student learning and development in higher education while also addressing how students' social identities intersect with college

campus environments. *First Annual Report on the Noxious Insects for the Province of Ontario* The Case for ... Student Collection  
In higher education, case studies can be utilized to have students put themselves into problems faced by a protagonist and, by doing so, address academic or career-related issues. Working through these issues provides students with an opportunity to gain applied perspective and experiences. Professors in higher education who

choose this method of teaching require navigational tools to ensure that students achieve stated learning objectives. Case Study Methodology in Higher Education is an essential research publication that focuses on the history and theories relating to case study methodology including techniques for writing case studies and utilizing them in university settings to prepare students for real-life career-related scenarios. This publication features a wide range of topics such

as educational leadership, case writing, and teacher education. It is essential for educators, career professionals, higher education faculty, researchers, and students.

An estimated 45 million adults in the U.S. lack a credit score at time when credit invisibility can reduce one's ability to rent a home, find employment, or secure a mortgage or loan. As a result, individuals without credit—who are

disproportionately African American and Latino—often lead separate and unequal financial lives. Yet, as sociologists and public policy experts Frederick Wherry, Kristin Seefeldt, and Anthony Alvarez argue, many people who are not recognized within the financial system engage in behaviors that indicate their credit worthiness. How might institutions acknowledge these practices and help these people emerge from the financial shadows? In *Credit Where It's Due*, the

authors evaluate an innovative model of credit-building and advocate for a new understanding of financial citizenship, or participation in a financial system that fosters social belonging, dignity, and respect. Wherry, Seefeldt, and Alvarez tell the story of the Mission Asset Fund, a San Francisco-based organization that assists mostly low- and moderate-income people of color with building credit. The Mission Asset Fund facilitates zero-interest lending circles,

which have been practiced by generations of immigrants, but have gone largely unrecognized by mainstream financial institutions. Participants decide how the circles are run and how they will use their loans, and the organization reports their clients' lending activity to credit bureaus. As the authors show, this system not only helps clients build credit, but also allows them to manage debt with dignity, have some say in the creation of financial products, and reaffirm their sense of

social membership. The authors delve into the history of racial wealth inequality in the U.S. to show that for many black and Latino households, credit invisibility is not simply a matter of individual choices or inadequate financial education. Rather, financial marginalization is the result of historical policies that enabled predatory lending, discriminatory banking and housing practices, and the rollback of regulatory protections for first-time homeowners. To

rectify these inequalities, the authors propose common sense regulations to protect consumers from abuse alongside new initiatives that provide seed capital for every child, create affordable short-term loans, and ensure that financial institutions treat low- and moderate-income clients with equal respect. By situating the successes of the Mission Asset Fund in the larger history of credit and debt, *Credit Where It's Due* shows how to prioritize financial citizenship for

all. *Working with Academic Literacies* Edward Elgar Publishing The guide all MBAs and exec ed students need. If you're enrolled in an MBA or executive education program, you've probably encountered a powerful learning tool: the business case. But if you're like many people, you may find interpreting and writing about cases mystifying and time-consuming. In *The Case Study Handbook*, Revised Edition, William Ellet presents a potent new

approach for efficiently analyzing, discussing, and writing about cases. Early chapters show how to classify cases according to the analytical task they require (making a decision, performing an evaluation, or diagnosing a problem) and quickly establish a base of knowledge about a case. Strategies and templates, in addition to several sample Harvard Business School cases, help you apply the author's framework. Later in the book, Ellet shows how to write persuasive case-

analytical essays based on the process laid out earlier. Examples of effective writing further reinforce the methods. The book also includes a chapter on how to talk about cases more effectively in class. Any current or prospective MBA or executive education student needs this guide.

This is the most comprehensive textbook on school library administration available, now updated to include the latest standards and address new technologies. This reference text provides a complete instructional overview of the workings of the library media center—from the basics of administration,

budgeting, facilities management, organization, selection of materials, and staffing to explanations on how to promote information literacy and the value of digital tools like blogs, wikis, and podcasting. Since the publication of the fourth edition of *Administering the School Library Media Center* in 2004, many changes have altered the landscape of school library administration: the implementation of NCLB legislation and the revision of AASL

standards, just to mention two. The book is divided into 14 chapters, each devoted to a major topic in school library media management. This latest edition gives media specialists a roadmap for designing a school library that is functional and intellectually stimulating, while leading sources provide guidance for further research.

—Washington Post “An essential work, humane and candid, that challenges and expands our understanding of the lives of contemporary college students.” —Paul Tough, author of *Helping Children Succeed* “Eye-opening...Brings home the pain and reality of on-campus poverty and puts the blame squarely on elite institutions.”

—Washington Post “Jack’s investigation redirects attention from the matter of access to the matter of

—New Yorker *The Ivy League* looks different than it used to. College presidents and deans of admission have opened their doors—and their coffers—to support a more diverse student body. But is it enough just to admit these students? In this bracing exposé, Anthony Jack shows that many students’ struggles continue long after they’ve settled in their dorms. Admission, they

quickly learn, is not the same as acceptance. This powerfully argued book documents how university policies and campus culture can exacerbate preexisting inequalities and reveals why some students are harder hit than others.

Princeton University Press  
Beyond Free College outlines an audacious national agenda—consistent with, but far more comprehensive than, the current “free college”

movement—that builds on the best of US higher education’s populist history such as the G.I. Bill and the community college transfer function. The authors align a wide constellation of higher education trends—online learning, prior learning assessment, competency-based learning, high school college-credit—with a rapidly shifting student transfer environment that privileges college credit as the pivotal educational catalyst to boost access and completion. The

book’s agenda seeks greater productive investment in postsecondary education by privileging a single metric—lower-cost-per-degree-granted—as the animating driver of a transfer pathway that will fulfill the potential of its historical, progressive innovators. Beyond Free College’s goal is as simple as it is urgent: To galvanize higher education advocates in an effort to reorganize, reorient, and reignite the transfer function to serve the needs of a

neotraditional student population that now constitutes the majority of college-goers in America; and in ways that advance completion, not just access to higher education.
