### Signs and Symbols Seal Books

A powerful and impassioned historical account of the largest successful revolt by enslaved people in history: the Haitian Revolution of 1791–1803 “One of the seminal texts about the history of slavery and abolition.... Provocative and empowering.” —The New York Times Book Review *The Black Jacobins*, by Trinidadian historian C. L. R. James, was the first major analysis of the uprising that began in the wake of the storming of the Bastille in France and became the model for liberation movements from Africa to Cuba. It is the story of the French colony of San Domingo, a place where the brutality of plantation owners toward enslaved people was horrifyingly severe. And it is the story of a charismatic and barely literate enslaved person named Toussaint L'Ouverture, who successfully led the Black people of San Domingo against successive invasions by overwhelming French, Spanish, and English forces—and in the process helped form the first independent post-colonial nation in the Caribbean. With a new introduction (2023) by Professor David Scott.

### The Task Catapult

What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality—the tendency of returns on capital to exceed the rate of economic growth—today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

### Echoes and Evidences of the Book of Mormon Simon & Schuster

New York Times Bestseller The new must-read epic from master storyteller Ken Follett: more than a thriller, it's an action-packed, globe-spanning drama set in the present day. “A compelling story, and only too realistic.” —Lawrence H. Summers, former U.S. Treasury Secretary “Every catastrophe begins with a little problem that doesn't get fixed.” So says Pauline Green, president of the United States, in Follett's nerve-racking drama of international tension. A shrinking oasis in the Sahara Desert; a stolen US Army drone; an uninhabited Japanese island; and one country's secret stash of deadly chemical poisons: all these play roles in a relentlessly escalating crisis. Struggling to prevent the outbreak of world war are a young woman intelligence officer; a spy working undercover with jihadists; a brilliant Chinese spymaster; and Pauline herself, beleaguered by a populist rival for the next president election. Never is an extraordinary novel, full of heroines and villains, false prophets and elite warriors, jaded politicians and opportunistic revolutionaries. It brims with cautionary wisdom for our times, and delivers a visceral, heart-pounding read that transports readers to the brink of the unimaginable.

### The Alchemist's Daughter Simon and Schuster

### Grounded for All Eternity Penguin

From the internationally bestselling author of *London* and *Sarum* -- a magnificent epic about love and war, family life and political intrigue in Ireland over the course of seventeen centuries. Like the novels of James Michener, *The Princes of Ireland* brilliantly interweaves engrossing fiction and well-researched fact to capture the essence of a place. Edward Rutherfurd has introduced millions of readers to the human dramas that are the lifeblood of history. From his first bestseller, *Sarum*, to the #1 bestseller *London*, he has captivated audiences with gripping narratives that follow the fortunes of several fictional families down through the ages. *The Princes of Ireland*, a sweeping panorama steeped in the tragedy and glory that is Ireland, epitomizes the power and richness of Rutherfurd's storytelling magic. The saga begins in pre-Christian Ireland with a clever refashioning of the legend of Cuchulainn, and culminates in the dramatic founding of the Free Irish State in 1922. Through the interlocking stories of a wonderfully imagined cast of characters -- monks and noblemen, soldiers and rebels, craftswomen and writers -- Rutherfurd vividly conveys the personal passions and shared dreams that shaped the character of the country. He takes readers inside all the major events in Irish history: the reign of the fierce and mighty kings of Tara; the mission of Saint Patrick; the Viking invasion and the founding of Dublin; the trickery of Henry II, which gave England its foothold on the island in 1167; the plantations of the Tudors and the savagery of Cromwell; the flight of the “Wild Geese”; the failed rebellion of 1798; the Great Famine and the Easter Rebellion. With Rutherfurd's well-crafted storytelling, readers witness the rise of the Fenians in the late nineteenth century, the splendours of the Irish cultural renaissance, and the bloody battles for Irish independence, as though experiencing their momentous impact firsthand. Tens of millions of North Americans claim Irish descent. Generations of people have been enchanted by Irish literature, and visitors flock to Dublin and its environs year after year. *The Princes of Ireland* will appeal to all of them -- and to anyone who relishes epic entertainment spun by a master.

Manning Clark was a complex, demanding and brilliant man. Mark McKenna's compelling biography of this giant of Australia's cultural landscape is informed by his reading of Clark's extensive private letters, journals and diaries—many that have never been read before. *An Eye for Eternity* paints a sweeping portrait of the man who gave Australians the signature account of their own history. It tells of his friendships with Patrick White and Sidney Nolan. It details an urgent and dynamic marriage, ripped apart at times by Clark's constant need for extramarital romantic love. A son who wrote letters to his dead parents. A historian who placed narrative ahead of facts. A doubter who flirted with Catholicism. A controversial public figure who marked slights and criticisms with deeply held grudges. To understand Clark's life is to understand twentieth century Australia. And it raises fundamental questions about the craft of biography. When are letters too personal, comments too hurtful and insights too private to publish? Clark incessantly documented his life-leaving notes to the biographers he knew would pursue his story. He had a deep need to be remembered and this book means he will now be understood in an unforgettable way. In the first book devoted exclusively to the ecopoetics of the twenty-first century, Lynn Keller examines poetry of what she terms the "self-conscious Anthropocene," a period in which there is widespread awareness of the scale and severity of human effects on the planet. Recomposing Ecopoetics analyzes work written since the year 2000 by thirteen North American poets—including Evelyn Reilly, Juliana Spahr, Ed Roberson, and Jena Osman—all of whom push the bounds of literary convention as they seek forms and language adequate to complex environmental problems. Drawing as often on linguistic experimentalism as on traditional literary resources, these poets respond to environments transformed by people and take "nature" to be a far more inclusive and culturally imbricated category than conventional nature poetry does. This interdisciplinary study not only brings cutting-edge work in ecocriticism to bear on a diverse archive of contemporary environmental poetry; it also offers the environmental humanities new ways to understand the cultural and affective dimensions of the Anthropocene.

Forster, now presented in a beautifully illustrated edition, is a visionary and thought-provoking novella that explores the perils of technological dependency and the potential consequences of a society overly reliant on machines. Ken Follett's extraordinary historical epic, the Century Trilogy, reaches its sweeping, passionate conclusion. In Fall of Giants and Winter of the World, Ken Follett followed the fortunes of five international families—American, German, Russian, English, and Welsh—as they made their way through the twentieth century. Now they come to one of the most tumultuous eras of all: the 1960s through the 1980s, from civil rights, assassinations, mass political movements, and Vietnam to the Berlin Wall, the Cuban Missile Crisis, presidential impeachment, revolution—and rock and roll. East German teacher Rebecca Hoffmann discovers she's been spied on by the Stasi for years and commits an impulsive act that will affect her family for the rest of their lives. . . . George Jakes, the child of a mixed-race couple, bypasses a corporate law career to join Robert F. Kennedy's Justice Department and finds himself in the middle of not only the seminal events of the civil rights battle but a much more personal battle of his own. . . . Cameron Dewar, the grandson of a senator, jumps at the chance to do some official and unofficial espionage for a cause he believes in, only to discover that the world is a much more dangerous place than he'd imagined. . . . Dimka Dvorkin, a young aide to Nikita Khrushchev, becomes an agent both for good and for ill as the United States and the Soviet Union race to the brink of nuclear war, while his twin sister, Tanya, carves out a role that will take her from Moscow to Cuba to Prague to Warsaw—and into history.

A New York Times Bestseller A Washington Post Notable Nonfiction Book of 2020 Named a Best Book of 2020 by NPR “A fascinating scientific, cultural, spiritual and evolutionary history of the way humans breathe—and how we’ve all been doing it wrong for a long, long time.” —Elizabeth Gilbert, author of Big Magic and Eat Pray Love No matter what you eat, how much you exercise, how skinny or young or wise you are, none of it matters if you’re not breathing properly. There is nothing more essential to our health and well-being than breathing: take air in, let it out, repeat twenty-five thousand times a day. Yet, as a species, humans have lost the ability to breathe correctly, with grave consequences. Journalist James Nestor travels the world to figure out what went wrong and how to fix it. The answers aren’t found in pulmonology labs, as we might expect, but in the muddy digs of ancient burial sites, secret Soviet facilities, New Jersey choir schools, and the smoggy streets of São Paulo. Nestor tracks down men and women exploring the hidden science behind ancient breathing practices like Pranayama, Sudarshan Kriya, and Tummo and teams up with pulmonary tinkerers to scientifically test long-held beliefs about how we breathe. Modern research is showing us that making even slight adjustments to the way we inhale and exhale can jump-start athletic performance; rejuvenate internal organs; halt snoring, asthma, and autoimmune disease; and even straighten scoliotic spines. None of this should be possible, and yet it is. Drawing on thousands of years of medical texts and recent cutting-edge studies in pulmonology, psychology, biochemistry, and human physiology, Breath turns the conventional wisdom of what we thought we knew about our most basic biological function on its head. You will never breathe the same again.

In 1922, Howard Carter peered into Tutankhamun's tomb for the first time, the only light coming from the candle in his outstretched hand. Urged to tell what he was seeing through the small opening he had cut in the door to the tomb, the Egyptologist famously replied, “I see wonderful things.” Carter's fabulous discovery is just one of the many spellbinding stories told in Three Stones Make a Wall. Written by Eric Cline, an archaeologist with more than thirty seasons of excavation experience, this book traces the history of archaeology from an amateur pursuit to the cutting-edge science it is today by taking the reader on a tour of major archaeological sites and discoveries. Along the way, it addresses the questions archaeologists are asked most often: How do you know where to dig? How are excavations actually done? How do you know how old something is? Who gets to keep what is found? Taking readers from the pioneering digs of the eighteenth century to today's exciting new discoveries, Three Stones Make a Wall is a lively and essential introduction to the story of archaeology.
