Discover the (surprising) secret to lifelong financial freedom with real estate investing. Real estate has always been a powerful tool for investing, and many people believe that a single-family home investment strategy will help them achieve their goals. However, the true path to financial freedom using real estate is found in apartment buildings. Real estate investing expert and author Michael Blank learned that once investors did their first deal, the curious "Law of the First Deal" led to the second and third deals in rapid succession. Most were able to quit their jobs within 3-5 years of getting started. Of course, when most people hear "apartment buildings" they immediately assume they need years of investing experience and money saved up to be able get into

the game. This simply isn't true. Michael has compiled the results of his research into his new book, *Financial Freedom with Real Estate Investing: The Blueprint to Quitting Your Job with Real Estate - Even without Experience or Cash*. He's outlined the "Financial Freedom Blueprint" that guides you through your first multifamily deal, even if you have no prior experience or your own cash.

ASE Test Preparation - A5 Brakes McGraw-Hill Education Australia Worldwide, more parents are opting for immersion pre-schooling for their children in order to benefit from its linguistic, educational, and cultural benefits. This immersion can be either bilingual or monolingual, aimed at early second language learning, or at language maintenance - offering minority language children mother-tongue support and enrichment. This book examines some of the key issues and policy concerns relating to immersion education in the early years. The term itself can be difficult in some political contexts, as can the differing outcomes noted by studies comparing monolingual programmes, and bilingual programmes for minority language children. The importance of training in immersion methodology for educators is discussed, as is the need to adapt preschool pedagogical practices to the immersion context, in order to provide optimal input for young language learners. One of the most pressing discussions surrounds differentiated provision - ensuring that the varying needs of children with language impairment, typical second language learners, and mother-tongue speakers with significant socioeconomic or linguistic disadvantages are all met. Overall, the book explores the challenges currently facing the sector, particularly with regard to training and professional development for practitioners, and the provision of appropriate materials in less widely used languages. Given the documented benefit of high quality immersion pre-schooling, this book fulfils

an urgent need to increase the recognition of the sector. This book was published as a special issue of International Journal of Bilingual Education and Bilingualism.
