* Marshalls the arguments for affirmative action* Offers strategies for actionWhy is affirmative action under attack? What were the policy's original purposes, and have they been achieved? What are the arguments being arrayed against it? And—for all stakeholders concerned about equity and diversity on campus—what's the way forward,

politically, legally, and practically?The authors explore the historical context, the philosophical and legal foundations of affirmative action, present contemporary attitudes to the issue on and off campus, and uncover the tactics and arguments of its opponents. They conclude by offering strategies to counter the erosion of affirmative action, change the basis of the discourse, and coordinate institutional support to foster inclusive college environments and multi-ethnic campus communities.This book analyzes the ideological and legal construction of colorblind legislation that

has led to the de facto exclusion of people of color from institutions of higher education. It addresses the role of the courts in affecting affirmative action in higher education as a workplace and place of study. It documents the underrepresentation of collegians of color and presents research on student opinion on race-based policies at two- and four-year institutions. It details the pervasiveness of the affirmative action debate across educational sectors and the status of race among myriad factors considered in college admissions. Finally, it considers affirmative action as a pipeline issue and in the light of educational policy.

Issues in Pathology, Diagnostics, and Disease: 2011 Edition Sleeping Bear Press

The Single Most Comprehensive Source

of Commodity and Futures Market Information Available Since 1939, professional traders, commercial hedgers, portfolio managers, and speculators have come to regard The CRB Commodity Yearbook as the "bible" of the industry. Here is a wealth of authoritative data, gathered from government reports, private industry, and trade and industry associations, all compiled by the Commodity Research Bureau, the organization of record for the entire commodity industry. The Yearbook is absolutely essential for identifying changing trends in supply and demand and for projecting important price movements. It gives investors: Worldwide supply/demand and production/consumption data for all the basic commodities and futures markets-

from A(luminum) to Z(inc), including all the major markets in interest rates, currencies, energy, and stock index futures Over 900 tables, graphs, and price charts of historical data, many of which show price history dating back to 1900 Fact-filled CD-ROM provides readers with valuable commodity information in an easy-to-use electronic format Concise introductory articles describe the salient features of each commodity and help put the quantitative information in perspective Articles on key markets and important issues concerning the commodity industry. The 2007 Yearbook features articles by CRB Chief Economist, Richard W. Asplund, including: Commodity Prices Extend 2001-06 Bull Market to New Highs Fed Engineers a Soft-Landing for the U.S.

Economy in 2006 World Economic Expansion Continues Through 2006 U.S. Housing Bubble Bursts and Faces Long Recovery Road Strong Ethanol Demand Drives Corn Prices to 10-Year Highs For anyone dealing in commodities, The CRB Commodity Yearbook 2007 offers an abundance of valuable information and indispensable guidance for decision making.

In *Maya Political Science: Time, Astronomy, and the Cosmos*, Prudence M. Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256-year calendar cycle known as the May. This fundamental connection between timekeeping and Maya political organization sparked Rice's interest in the origins of the two major calendars used by the ancient lowland Maya, one 260 days long, and

the other having 365 days. In *Maya Calendar Origins*, she presents a provocative new thesis about the origins and development of the calendrical system. Integrating data from anthropology, archaeology, art history, astronomy, ethnohistory, myth, and linguistics, Rice argues that the Maya calendars developed about a millennium earlier than commonly thought, around 1200 BC, as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter-gatherer-collectors throughout what became Mesoamerica. She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early rulers, who could thereby claim "control" over supernatural cosmic

forces. Rice shows how time became materialized—transformed into status objects such as monuments that encoded calendrical or temporal concerns—as well as politicized, becoming the foundation for societal order, political legitimization, and wealth. Rice's research also sheds new light on the origins of the Popol Vuh, which, Rice believes, encodes the history of the development of the Mesoamerican calendars. She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region, who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems.

Issues in Pathology, Diagnostics, and Disease: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Pathology, Diagnostics, and Disease. The editors have built Issues in Pathology, Diagnostics, and Disease: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Pathology, Diagnostics, and Disease in this eBook to be deeper than what you can access

anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Pathology, Diagnostics, and Disease: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Long, long ago, the ancient people of the forest gathered around warm fires and told the tale of a time long past, when the land known as "Michigane" was covered with ice and snow. For thousands of years the cruel North Wind ruled the land North of Up North, chasing away the gentle, benevolent winds from the East, West and South. Winter stayed the whole year round, so nothing could live in Michigane. Not until an old warrior and a young boy traveled through the frigid cold with nothing but warm hearts and an old pair of mittens was there hope that the frozen land would eventually come to life. Trinkka Hakes Noble is the noted author of numerous award-winning picture books including The Scarlet Stockings Spy, the ever-popular Jimmy's Boa series and

Meanwhile Back at the Ranch (both featured on Reading Rainbow). Her many awards include ALANotable Children's Book, Booklist Children's Editors' Choice, IRA-CBC Children's Choice, Learning: The Year's Ten Best, and several Junior Literary Guild Selections. Trinka makes her home in Bernardsville, New Jersey. The Legend of Michigan is the 20th book that Gijsbert van Frankenhuyzen has illustrated for Sleeping Bear Press. His other titles include The Legend of Sleeping Bear, the #1 Midwest bestselling Legend of the Petoskey Stone, and Texas Bluebonnet runner-up Mercedes and the Chocolate Pilot. Gijsbert and his family live in Bath, Michigan.

Etienne Nodet examines the Samaritans and their religion, using Jewish and Christian sources, including rabbinic literature and the latest archaeology. Nodet tells the story of the Samaritans and their religion, showing how they were faithful to a classical form of monotheism. Nodet traces the Samaritan story from more recent to more ancient times. He begins by looking at the importance of the Samaritans in the time of Josephus and the New Testament, taking in the area formed by Galilee, Samaria, and Judea and recognizing how this corresponds approximately to Canaan at the time of Joshua, between the Jordan and the Mediterranean. He then examines the account of 2 Kings 17, which shows the Samaritans as descendants of the settlers sent by the

Assyrians, who were initiated to a certain Yahwism after the fall of the kingdom of Israel (North) in 721 BC. Next Nodet looks at the time of the Maccabean crisis, when the Samaritans separated from the Jews, showing how before then there was a peaceful coexistence. Finally, Nodet turns to the Persian period, showing how after the return from exile there was a restoration of the Babylonian-derived form of religion, which the local Israelites (including the Samaritans) opposed. Nodet contends that, as such, the Samaritan religion, with its succession of high priests up to the present day, and is of 'immemorial permanence', linking to the earliest worship of YHWH in Israel.

Legislative Calendar

Containing an urgently needed archival

database of historical evidence, this volume includes both a consolidated presentation of the documentary records of black people in Tudor and Stuart England, and an interpretive narrative that confirms and significantly extends the insights of current theoretical excursus on race in early modern England. Here for the first time Imtiaz Habib collects the scattered references to black people-whether from Africa, India or America-in sixteenth- and seventeenth-century England, and arranges them into a systematic, chronological descriptive index. He offers an extended historical and theoretical interpretation of the records in six chapters, which serve as an introductory guide to the index even as they articulate a specific argument

about the meaning of the records. Both the archival information and interpretive scholarship provide a strong framework from which future historical debates on race in early modern England can proceed.

Winds of Change

Report evaluates how the federal judicial system has implemented the Judicial Conduct and Disability Act of 1980. Committee members include Justice Stephen Breyer (committee chair), U.S. District Judge Sarah Evans Barker, U.S. Circuit Judge Pasco M. Bowman, U.S. District Judge D. Brock Hornby, U.S. Circuit Judge J. Harvie Wilkinson III, and Sally M. Rider, Administrative Assistant to the Chief Justice.

Prologue

We've completely misunderstood the

purpose of the pyramids. They weren't built primarily as tombs, instead they were intended to be used by Pharaoh while he was still alive. In very ancient times, the king was only allowed to rule for 30 years--then he'd be ritually killed! They didn't want an old man in charge. One day, a Pharaoh was nearing his 30th year and decided he didn't want to die, so came up with a set of rituals that would enable him to live on. It was called 'Heb Sed'. This sacred ceremony was more than just a life-saver though, it also enabled the king to merge with the Sun-god. After death, Egyptian kings were believed to board the Sun-boat where they would shine down on their subjects for all eternity. However, many things could go awry in this process, particularly under the eyes of a

successor. What if they bungled the funeral? What if they were a rival? Heb Sed enabled all this to occur while the king was still alive so that he could preside over proceedings, ensuring its success. And the bonus of being able to do this while alive is that some part of the Pharaoh would board the Sun-boat and in doing so, the king would become a divinity--the Pharaoh became a living God-king! But all this could only happen if they built a strange, pyramid-shaped structure to enable this potent magic to take place. So they built pyramids. And they got bigger and more magnificent with the passing of each King. This madness came to a head with Pharaoh Snefru who built two massive pyramids; the two biggest man-made structures in the World! How do you outdo this? While

his son 'Khufu' only managed to build one pyramid, it was the most impressive structure ever built by humans. Still is, in my book. And yes, it might have functioned as his tomb, although Strabo and Diodorus swear black and blue that it wasn't, however, it was entirely geared to the Sun-god, as you will find out... it was entirely geared for the King's Heb Sed. This book is the sequel to Architecture of Ra, but can be read independently of it. It also delves into the myths of Egypt as well as those of other cultures (Jason & the Argonauts, Icarus, Jonah, Thor, Hercules...). I don't like calling these stories 'myths' because they actually belonged to living religions and to make that grade, the stories had to include information seminal to that culture. And if the texts contain this

knowledge, then so did their religious buildings. The knowledge encoded in Egyptian legends is also encoded in their pyramids!
