Structuring the Information Age provides insight into the largely unexplored evolution of information processing in the commercial

sector and the underrated influence of corporate users in shaping the history of modern technology. JoAnne Yates examines how life insurance firms—where good record-keeping and repeated use of massive amounts of data were crucial—adopted and shaped information processing technology through most of the twentieth century. The book analyzes this process beginning with tabulating technology, the most immediate predecessor of the computer, and continuing through the 1970s with early computers. Yates elaborates two major themes: the reciprocal influence of information technology and its use, and the influence of past practices on the adoption and use of new technologies. In

the 1950s, insurance industry leaders recognized that computers would enable them to integrate processes previously handled separately, but they also understood that they would have to change their ways of working profoundly to achieve this integration. When it came to choosing equipment and applications, most companies ultimately preferred a gradual, incremental migration to an immediate and radical transformation. In tracing this process, Yates shows that IBM's successful transition from tabulators to computers in part reflected that vendor's ability to provide large customers such as insurance companies with the necessary products to allow gradual change. In addition, this detailed industry case study helps explain information technology's so-called productivity paradox, showing that firms took roughly two decades to achieve the initial computerization and process integration that the industry set as objectives in the 1950s.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and

define the nature of the relationship between you and your clients, colleagues and the courts.

Guiding students step-by-step through the research process while simultaneously introducing a range of debates, challenges and tools that feminist scholars use, the second edition of this popular textbook provides a vital resource to those students and researchers approaching their studies from a feminist perspective. Interdisciplinary in its approach, the book covers everything from research design, analysis and presentation, to formulating research questions, data collection and publishing research. Offering the most comprehensive and practical guide to the subject available, the text is now also fully updated to take account of recent developments in the field, including participatory action research, new technologies and methods for working with big data and social media. Doing Feminist Research is required reading for undergraduate and postgraduate courses taking a feminist approach to social science methodology, research design and methods. It is the ideal guide for all students and scholars carrying out feminist research, whether in the fields of international relations, political science, interdisciplinary international and global studies, development studies or gender and women's studies. New to this Edition: - New discussions of contemporary research methods, including participatory action research, survey research and technology, and methods for big data and social media. - Updated to reflect recent developments in feminist and gender theory, with references to the latest research examples and new boxes considering recent shifts in

the social and political sciences. - Brand new boxed examples throughout covering topics including collaborations, femicide, negotiating changing research environments and the pros and cons of feminist participatory action research. - The text is now written in the first (authors) and second (readers) person making the text clearer, more consistent and inclusive from the reader point of view.
