Economics for Real People
Vintage

New essays on theological, political, and contemporary themes, by the Pulitzer Prize winner Marilynne Robinson has plumbed the human spirit in her renowned novels, including *Lila*, winner of the National Book Critics Circle Award, and *Gilead*, winner of the Pulitzer Prize and the National Book Critics Circle Award. In this new essay collection she trains her incisive mind on our modern political climate and the mysteries of faith. Whether she is investigating how the work of great thinkers about America like Emerson and Tocqueville inform our political consciousness or discussing the way that beauty informs and disciplines daily life, Robinson's peerless prose and boundless humanity are on full display. *What Are We Doing Here?* is a call for Americans to continue the tradition of those great thinkers and

to remake American political and cultural life as "deeply impressed by obligation [and as] a great theater of heroic generosity, which, despite all, is sometimes palpable still."

The Future of Capitalism
Duke University Press
#1 NEW YORK TIMES
BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the

challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach.

Lean Logic New
Directions Publishing
What is tango? Dance,
music, and lyrics of
course, but also a
philosophy, a strategy, a
commodity, even a
disease. This book

explores the politics of tango, tracing tango's travels from the brothels of Buenos Aires to the cabarets of Paris and the shako dansu clubs of Tokyo. The author is an Argentinean political theorist and a dance professor at the University of California at Riverside. She uses her 'tango tongue' to tell interwoven tales of sexuality, gender, race, class, and national identity. Along the way she unravels relations between machismo and colonialism, postmodernism and patriarchy, exoticism and commodification. In the end she arrives at a discourse on decolonization as intellectual 'unlearning.' Marta Savigliano's voice is highly personal and political. Her account is at once about the exoticization of tango and about her own fate as a Third World woman intellectual. A few sentences from the preface are indicative: 'Tango is my womb and my tongue, a trench where I can shelter and resist the colonial invitations to 'universalism,' a stubborn fatalist mood when technocrats and theorists offer optimistic

and seriously revised versions of 'alternatives' for the Third World, an opportunistic metaphor to talk about myself and my stories as a success' of the civilization-development-colonization of Am ca Latina, and a strategy to figure out through the history of the tango a hooked-up story of people like myself. Tango is my changing, resourceful source of identity. And because I am where I am outside tango hurts and comforts me: 'Tango is a sad thought that can be danced.' Savigliano employs the tools of ethnography, history, body-movement analysis, and political economy. Well illustrated with drawings and photos dating back to the 1880s, this book is highly readable, entertaining, and provocative. It is sure to be recognized as an important contribution in the fields of cultural studies, performance studies, decolonization, and women-of-color feminism.

Surviving the Future

HarperCollins
Bridge the Gap and Reach the Why Generation If you've ever struggled to motivate the young people in your sphere of influence, Answering Why

is the game-changer you've been looking for. From the urgent skills gap crisis to the proven strategies to inspire our youngest generations, Answering Why addresses the burning questions faced by educators, employers, and parents everywhere. Author, CEO, and generational expert Mark C. Perna shares his wide experience and profound success as both a single dad and performance consultant for education and workforce development across North America. Readers will be empowered to:

- Embrace the branch-creak crisis moments of life
- Make meaningful, productive connections with the Why Generation (anyone under 40 today)
- Bring relevance, self-discovery, and passion to the learning process

The Why Generation is asking a serious question, and it's time to answer it. This book will help awaken the incredible potential of young people everywhere and spur them to increased performance on all fronts, so they can make a bigger difference—which is exactly what they want. [Building a Second Brain](#) Berrett-Koehler Publishers "Building a second brain is

getting things done for the digital age. It's a ... productivity method for consuming, synthesizing, and remembering the vast amount of information we take in, allowing us to become more effective and creative and harness the unprecedented amount of technology we have at our disposal"--

Nora Webster John Wiley & Sons

Lean Logic is David Fleming's masterpiece, the product of more than thirty years' work and a testament to the creative brilliance of one of Britain's most important intellectuals. A dictionary unlike any other, it leads readers through Fleming's stimulating exploration of fields as diverse as culture, history, science, art, logic, ethics, myth, economics, and anthropology, being made up of four hundred and four engaging essay-entries covering topics such as Boredom, Community, Debt, Growth, Harmless Lunatics, Land, Lean Thinking, Nanotechnology, Play, Religion, Spirit, Trust, and Utopia. The threads running through every entry are Fleming's deft and original analysis of how our present market-

based economy is destroying the very foundations--ecological, economic, and cultural--on which it depends, and his core focus: a compelling, grounded vision for a cohesive society that might weather the consequences. A society that provides a satisfying, culturally-rich context for lives well lived, in an economy not reliant on the impossible promise of eternal economic growth. A society worth living in. Worth fighting for. Worth contributing to. The beauty of the dictionary format is that it allows Fleming to draw connections without detracting from his in-depth exploration of each topic. Each entry carries intriguing links to other entries, inviting the enchanted reader to break free of the imposed order of a conventional book, starting where she will and following the links in the order of her choosing. In combination with Fleming's refreshing writing style and good-natured humor, it also creates a book perfectly suited to dipping in and out. The decades Fleming spent honing his life's work are evident in the lightness and mastery with which Lean Logic

draws on an incredible wealth of cultural and historical learning--from Whitman to Whitefield, Dickens to Daly, Kropotkin to Kafka, Keats to Kuhn, Oakeshott to Ostrom, Jung to Jensen, Machiavelli to Mumford, Mauss to Mandelbrot, Leopold to Lakatos, Polanyi to Putnam, Nietzsche to Næss, Keynes to Kumar, Scruton to Shiva, Thoreau to Toynbee, Rabelais to Rogers, Shakespeare to Schumacher, Locke to Lovelock, Homer to Homer-Dixon--in demonstrating that many of the principles it commends have a track-record of success long pre-dating our current society. Fleming acknowledges, with honesty, the challenges ahead, but rather than inducing despair, Lean Logic is rare in its ability to inspire optimism in the creativity and intelligence of humans to nurse our ecology back to health; to rediscover the importance of place and play, of reciprocity and resilience, and of community and culture. ----- Recognizing that Lean Logic's sheer size and unusual structure could be daunting, Fleming's long-time collaborator Shaun Chamberlin has also selected and edited one

of the potential pathways through the dictionary to create a second, stand-alone volume, *Surviving the Future: Culture, Carnival and Capital in the Aftermath of the Market Economy*. The content, rare insights, and uniquely enjoyable writing style remain Fleming's, but presented at a more accessible paperback-length and in conventional read-it-front-to-back format.

Baker Books

Today, most Americans are working in the gig economy--mixing together short-term jobs, contract work, and freelance assignments. Learn how to embrace the independent and self-sufficient world of freelance! *The Gig Economy* is your guide to this uncertain but ultimately rewarding world. Packed with research, exercises, and anecdotes, this eye-opening book supplies strategies--ranging from the professional to the personal--to help you leverage your skills, knowledge, and network to create your own career trajectory. In this book, you will learn how to: Construct a life based on your priorities and vision of success Cultivate

connections without networking Create your own security Build flexibility into your financial life Face your fears by reducing risk Corporate jobs are not only unstable--they're increasingly scarce. It's time to take charge of your own career and lead the life you want, one immune to the impulsive whims of an employer looking only at today's bottom line. Start mapping out your place in the gig economy today! *The Creative Economy* McGraw Hill Professional An indispensable roadmap and a refreshingly optimistic take on our economic future: Award-winning *New Yorker* staff writer and brilliant creator of NPR's *Planet Money* shows us how the 21st century economic paradigm offers unprecedented opportunities for curious, ambitious individuals to combine the things they love with their careers. From 'Focus on Intimacy at Scale' to 'Find Your Valuable Five Percent' and 'The Harder Your Core Customer Is to Reach, The Better You Will Do', Adam Davidson lays down the Ground Rules for success in the new economy. Drawing on inspiring case studies - a sweatshop-

owner's daughter fighting for better working conditions, an Amish craftsman meeting the technological needs of his fellow farmers - as well as the latest academic research, he shows us how the twentieth-century economy of scale has given way in this century to an economy of passion. Davidson's special talent for breaking down daunting economic terminology and making theory accessible have won him not only respect as an economics guru but also most of broadcast journalism's highest honours. In this breath-of-fresh-air book, he inspires us all to see that with intimacy, insight, attention, automation, and of course, passion, we can succeed in this new economic world.

The Passion According to G.H. Ludwig von Mises Institute

Steve Layne shows teachers practical ways to engage and inspire readers from kindergarten through high school, to develop readers who are not only motivated to read great books, but also love reading in its own right. --from publisher description.

[Answering Why](#) Oxford University Press, USA Probing the ominous side

of career advice to "follow your passion," this data-driven study explains how the passion principle fails us and perpetuates inequality by class, gender, and race; and it suggests how we can reconfigure our relationships to paid work. "Follow your passion" is a popular mantra for career decision-making in the United States. Passion-seeking seems like a promising path for avoiding the potential drudgery of a life of paid work, but this "passion principle"—seductive as it is—does not universally translate. *The Trouble with Passion* reveals the significant downside of the passion principle: the concept helps culturally legitimize and reproduce an exploited, overworked white-collar labor force and broadly serves to reinforce class, race, and gender segregation and inequality. Grounding her investigation in the paradoxical tensions between capitalism's demand for ideal workers and our cultural expectations for self-expression, sociologist Erin A. Cech draws on interviews that follow students from college into the workforce, surveys of US workers, and experimental data to

explain why the passion principle is such an attractive, if deceptive, career decision-making mantra, particularly for the college educated. Passion-seeking presumes middle-class safety nets and springboards and penalizes first-generation and working-class young adults who seek passion without them. The ripple effects of this mantra undermine the promise of college as a tool for social and economic mobility. The passion principle also feeds into a culture of overwork, encouraging white-collar workers to tolerate precarious employment and gladly sacrifice time, money, and leisure for work they are passionate about. And potential employers covet, but won't compensate, passion among job applicants. This book asks, What does it take to center passion in career decisions? Who gets ahead and who gets left behind by passion-seeking? *The Trouble with Passion* calls for citizens, educators, college administrators, and industry leaders to reconsider how we think about good jobs and, by extension, good lives. [How to Avoid a Climate Disaster](#) Bold Type Books Featuring 15 explosive

new chapters, this new edition of the New York Times bestseller brings the story of *Economic Hit Men* up-to-date and, chillingly, home to the U.S.—but it also gives us hope and the tools to fight back. The previous edition of this now-classic book revealed the existence and subversive manipulations of "economic hit men. John Perkins wrote that they are highly paid professionals who cheat countries around the globe out of trillions of dollars. Their tools include fraudulent financial reports, rigged elections, payoffs, extortion, sex, and murder. In Perkins's case the tool was debt-convincing strategically important countries to borrow huge amounts of money for enormous, development projects that served the very rich while driving the country deeper into poverty and debt. And once indebted, these countries could be controlled. In this latest edition, Perkins provides revealing new details about how he and others did their work. But more importantly, in an explosive new section he describes how the EHM tools are being used around the world more widely than ever—even in

the U. S. itself. The cancer has metastasized, yet most people still aren't aware of it. Fear and debt drive the EHM system. We are hammered with messages that terrify us into believing that we must pay any price, assume any debt, to stop the enemies who, we are told, lurk at our doorsteps. The EHM system-employing false economics, bribes, surveillance, deception, debt, coups, assassinations, unbridled military power-has become the dominant system of economics, government, and society today. It has created what Perkins calls a Death Economy. But Perkins offers hope: he concludes with dozens of specific, concrete suggestions for actions all of us can take to wrest control of our world away from the economic hit men, and help give birth to a Life Economy.

Tango And The Political Economy Of Passion

Hachette UK

"One summer, a couple buddies and I decided to hit the road. We were graduating from college and had no idea what we wanted to do with our lives. The solution to our 'what should I do with my life' dilemma was to travel

around the country and interview people who had jobs they loved. We hoped their insight and advice would help us find our way" -- p.12.

The Expertise Economy

Penguin UK

From New York Times business reporter Nelson D. Schwartz comes a gripping investigation of how a virtual velvet rope divides Americans in every arena of life, creating a friction-free existence for those with money on one side and a Darwinian struggle for the middle class on the other side. In nearly every realm of daily life--from health care to education, highways to home security--there is an invisible velvet rope that divides how Americans live. On one side of the rope, for a price, red tape is cut, lines are jumped, appointments are secured, and doors are opened. On the other side, middle- and working-class Americans fight to find an empty seat on the plane, a place in line with their kids at the amusement park, a college acceptance, or a hospital bed. We are all aware of the gap between the rich and everyone else, but when we weren't looking, business innovators stepped in to

exploit it, shifting services away from the masses and finding new ways to profit by serving the privileged. And as decision-makers and corporate leaders increasingly live on the friction-free side of the velvet rope, they are less inclined to change--or even notice--the obstacles everyone else must contend with. Schwartz's "must read" book takes us on a behind-the-scenes tour of this new reality and shows the toll the velvet rope divide takes on society.

The Passion Economy

Grand Central Publishing

Since the end of World War II, most people around the world regarded the United States as the land of opportunity. The baby boomers and Generation X knew it best as "the land of milk and honey." It was a place where people could easily raise a family and with hard work could achieve anything they set their mind to. The American Dream, a dream of a land where life is better, richer and fuller for everyone, was alive. Much has changed, though, in the past four decades. Most Americans today do not realize that since the early 1990s, when the world markets

began to merge and globalization took place, America went through a significant transformation. Today, the America of yesterday, a place where children grew up to ultimately earn more than their parents, is no longer reality but, in most cases, just wishful thinking. In today's globalized world, working in America no longer feels any different than earning a living in Europe or Japan. Indeed, income levels and employment opportunities now appear to be similar. Are they, though? Do Americans still have the edge or has the American Dream finally slipped away? Is it possible to conceive that American workers could be disadvantaged when compared to those living and working in other countries? While most people live their everyday lives never knowing, one thing is clear. Recently, political catchphrases such as "Make America Great Again," deeply resonated with frustrated Americans on both sides of the political divide, more so than election pollsters and the media anticipated during the 2016 presidential election. Undoubtedly, anxiety about the future is in the air, but what causes

it? Can the past be restored? One thing is certain. Americans cannot afford to remain complacent with the status quo. Visit the author's webpage [HERE](#).

Let's Take the Long Way Home Simon and Schuster

Bill Gates's Five Books for Summer Reading 2019 From world-renowned economist Paul Collier, a candid diagnosis of the failures of capitalism and a pragmatic and realistic vision for how we can repair it. Deep new rifts are tearing apart the fabric of the United States and other Western societies: thriving cities versus rural counties, the highly skilled elite versus the less educated, wealthy versus developing countries. As these divides deepen, we have lost the sense of ethical obligation to others that was crucial to the rise of post-war social democracy. So far these rifts have been answered only by the revivalist ideologies of populism and socialism, leading to the seismic upheavals of Trump, Brexit, and the return of the far-right in Germany. We have heard many critiques of capitalism but no one has laid out a realistic way to fix it, until now. In a

passionate and polemical book, celebrated economist Paul Collier outlines brilliantly original and ethical ways of healing these rifts—economic, social and cultural—with the cool head of pragmatism, rather than the fervor of ideological revivalism. He reveals how he has personally lived across these three divides, moving from working-class Sheffield to hyper-competitive Oxford, and working between Britain and Africa, and acknowledges some of the failings of his profession. Drawing on his own solutions as well as ideas from some of the world's most distinguished social scientists, he shows us how to save capitalism from itself—and free ourselves from the intellectual baggage of the twentieth century.

The National System of Political Economy

Anchor

A deeply-reported examination of why "doing what you love" is a recipe for exploitation, creating a new tyranny of work in which we cheerily acquiesce to doing jobs that take over our lives. You're told that if you "do what you love, you'll never work a day in your

life." Whether it's working for "exposure" and "experience," or enduring poor treatment in the name of "being part of the family," all employees are pushed to make sacrifices for the privilege of being able to do what we love. In *Work Won't Love You Back*, Sarah Jaffe, a preeminent voice on labor, inequality, and social movements, examines this "labor of love" myth—the idea that certain work is not really work, and therefore should be done out of passion instead of pay. Told through the lives and experiences of workers in various industries—from the unpaid intern, to the overworked teacher, to the nonprofit worker and even the professional athlete—Jaffe reveals how all of us have been tricked into buying into a new tyranny of work. As Jaffe argues, understanding the trap of the labor of love will empower us to work less and demand what our work is worth. And once freed from those binds, we can finally figure out what actually gives us joy, pleasure, and satisfaction.

New Rules for the New Economy John Murray
 NEW YORK TIMES
 BESTSELLER They met over their dogs. Gail Caldwell and Caroline

Knapp (author of *Drinking: A Love Story*) became best friends, talking about everything from their love of books and their shared history of a struggle with alcohol to their relationships with men. Walking the woods of New England and rowing on the Charles River, these two private, self-reliant women created an attachment more profound than either of them could ever have foreseen. Then, several years into this remarkable connection, Knapp was diagnosed with cancer. With her signature exquisite prose, Caldwell mines the deepest levels of devotion, and courage in this gorgeous memoir about treasuring a best friend, and coming of age in midlife. Let's Take the Long Way Home is a celebration of the profound transformations that come from intimate connection—and it affirms, once again, why Gail Caldwell is recognized as one of our bravest and most honest literary voices.

The Orange Economy
 Inter-American Development Bank
 In this addition to the award-winning Church and Postmodern Culture series, respected theologian Daniel Bell

compares and contrasts capitalism and Christianity, showing how Christianity provides resources for faithfully navigating the postmodern global economy. Bell approaches capitalism and Christianity as alternative visions of humanity, God, and the good life. Considering faith and economics in terms of how desire is shaped, he casts the conflict as one between different disciplines of desire. He engages the work of two important postmodern philosophers, Deleuze and Foucault, to illuminate the nature of the postmodern world that the church currently inhabits. Bell then considers how the global economy deforms desire in a manner that distorts human relations with God and one another. In contrast, he presents Christianity and the tradition of the works of mercy as a way beyond capitalism and socialism, beyond philanthropy and welfare. Christianity heals desire, renewing human relations and enabling communion with God.

The Trouble with Passion
 AMACOM
 In looking at the behavior of the "me-generation" the author acknowledges the occurrence of selfless

acts and argues that looking out for number one may require looking out for others too

What Matters Now
Nicholas Brealey
From one of contemporary literature's bestselling, critically acclaimed, and beloved authors: a "luminous" novel (Jennifer Egan, *The New York Times Book Review*) about a fiercely compelling young widow navigating grief, fear, and longing, and finding her own voice—"heartrendingly transcendent" (*The New York Times*, Janet Maslin). Set in Wexford, Ireland, Colm Tóibín's magnificent

seventh novel introduces the formidable, memorable, and deeply moving Nora Webster. Widowed at forty, with four children and not enough money, Nora has lost the love of her life, Maurice, the man who rescued her from the stifling world to which she was born. And now she fears she may be sucked back into it. Wounded, selfish, strong-willed, clinging to secrecy in a tiny community where everyone knows your business, Nora is drowning in her own sorrow and blind to the suffering of her young sons, who have lost their father. Yet she has

moments of stunning insight and empathy, and when she begins to sing again, after decades, she finds solace, engagement, a haven—herself. Nora Webster "may actually be a perfect work of fiction" (*Los Angeles Times*), by a "beautiful and daring" writer (*The New York Times Book Review*) at the zenith of his career, able to "sneak up on readers and capture their imaginations" (*USA TODAY*).
"Miraculous...Tóibín portrays Nora with tremendous sympathy and understanding" (Ron Charles, *The Washington Post*).
