Candide is a French satire by Voltaire, a philosopher of the Age of Enlightenment. It begins with a young man, Candide, who is living a sheltered life in an Edenic paradise and being indoctrinated with Leibnizian optimism (or simply Optimism) by his mentor, Pangloss. The work describes the abrupt cessation of this lifestyle, followed by Candide's slow,

painful disillusionment as he witnesses and experiences great hardships in the world. Voltaire concludes with Candide, if not rejecting optimism outright, advocating a deeply practical precept, "we must cultivate our garden", in lieu of the Leibnizian mantra of Pangloss, "all is for the best in the best of all possible worlds". Candide is characterized by its sarcastic tone, as well as by its erratic, fantastical and fast-moving plot. A picaresque novel it parodies many adventure and romance clichés, the struggles of which are caricatured in a

tone that is mordantly matter-of-fact. Still, the events discussed are often based on historical happenings, such as the Seven Years' War and the 1755 Lisbon earthquake. As philosophers of Voltaire's day contended with the problem of evil, so too does *Candide* in this short novel, albeit more directly and humorously. Voltaire ridicules religion, theologians, governments, armies, philosophies, and philosophers through allegory; most conspicuously, he assaults Leibniz and his optimism. As expected by Voltaire, *Candide* has enjoyed both great success and great scandal. Immediately after its secretive publication, the book was widely banned because it contained religious blasphemy, political sedition and intellectual hostility hidden under a thin

veil of naïveté. However, with its sharp wit and insightful portrayal of the human condition, the novel has since inspired many later authors and artists to mimic and adapt it. Today, *Candide* is recognized as Voltaire's magnum opus and is often listed as part of the Western canon; it is arguably taught more than any other work of French literature. It was listed as one of The 100 Most Influential Books Ever Written.

For Freud, dreams were the royal road to the unconscious: through the process of interpretation, the manifest and sometimes bewildering content of dreams can be traced back to the unconscious representations underlying it. But can we understand dreams in another way by considering how the unconscious is structured by our social experiences? This is hypothesis that underlies this highly original book by Bernard Lahire, who argues that dreams can be interpreted sociologically by seeing the dream as a nocturnal form of self-to-self communication. Lahire rejects Freud's view that the manifest dream content is the result of a process of censorship: as a form of self-to-self communication, the dream is the symbolic arena most completely freed

from all forms of censorship. In Lahire's view, the dream is a message which can be understood only by relating it to the social world of the dreamer, and in particular to the problems that concern him or her during waking life. As a form of self-to-self communication, the dream is an intimate private diary, providing us with the elements of a profound and subtle understanding of who and what we are. Studying dreams enables us to discover our most deep-seated and hidden preoccupations, and to understand the thought processes that operate within us, beyond the reach of our volition. The study of dreams and dreaming has largely been the preserve of psychoanalysis, psychology and neuroscience. By showing how dreams are connected to the lived experience of

individuals in the social world, this highly original book puts dreams and dreaming at the heart of the social sciences. It will be of great value to students and scholars in sociology, psychology and psychoanalysis and to anyone interested in the nature and meaning of dreams.

"Paolo Sorrentino, the director of *Il Divo* (2008) and *The Great Beauty* (2013) and the creator of the HBO series *The Young Pope* (2016) (and *The New Pope* (2019)), has in recent years emerged as one of the most popular figures in 21st century

European filmmaking. Critics, however, remain sharply divided in their opinions of his films and what tradition his work can be placed in. Questions of what his stylistic relationship to Neorealism, the touchstone of virtually all Italian cinema, his local/national identity, and the posturing of his films vis a vis gender and a seemingly reactionary conceptualization of masculinity, his embracing or subverting of the role of art house "auteur," surround his films, with little consensus as to the answers. He is a confounding figure that seems to occupy contradictory roles in each of his films. In taking up the question of how best to contextualize Sorrentino's work, this book tracks his progressive departure from the localized world of Neapolitan and middlebrow "quality

cinema" tropes in favor of a more expansive and transnational approach to filmmaking. Sorrentino's more recent work explicitly engages late-capitalist spaces and aesthetics and problematizes authorial interpretation, the idea of the "foreign" film, the supposed dichotomy between the "realist" ethos that has, in the past, dominated Italian cinema, and a "post-realist"/"post-modernist" emphasis on style. Critically, Kilbourn tracks two key themes through Sorretino's oeuvre: the idea of "impegno" - often translated as "commitment" and referring to the social activist aims of Neorealism - and the director's repeated attempts to create a distinctive kind of subjectivity. Though often thought to be mutually exclusive with the flamboyant and de-

subjectivized style in much of contemporary art cinema, Sorrentino continues to find ways to merge these themes in his work"--

 Because of their spectacular, naturalistic pictures of plants and the human body, Leonhart Fuchs's *De historia stirpium* and Andreas Vesalius's *De humani corporis fabrica* are landmark publications in the history of the printed book. But as *Picturing the Book of Nature* makes clear, they do more than bear witness to the development of book publishing during the Renaissance and to the prominence attained by the fields of medical botany and anatomy in European medicine. Sachiko Kusakawa examines these texts, as well as Conrad Gessner's unpublished *Historia*

plantarum, and demonstrates how their illustrations were integral to the emergence of a new type of argument during this period—a visual argument for the scientific study of nature. To set the stage, Kusakawa begins with a survey of the technical, financial, artistic, and political conditions that governed the production of printed books during the Renaissance. It was during the first half of the sixteenth century that learned authors began using images in their research and writing, but because the technology was so new, there was a great deal of variety of thought—and often disagreement—about exactly what images could do: how they should be used, what degree of authority should be attributed to them, which graphic elements were bearers of that authority,

and what sorts of truths images could and did encode. Kusakawa investigates the works of Fuchs, Gessner, and Vesalius in light of these debates, scrutinizing the scientists' treatment of illustrations and tracing their motivation for including them in their works. What results is a fascinating and original study of the visual dimension of scientific knowledge in the sixteenth century.

Available for the first time in an English translation, this selection of René Magritte's writings gives non-Francophone readers the chance to encounter the many incarnations of the

renowned Belgian painter--the artist, the man, the aspiring noirist, the fire-breathing theorist--in his own words. Through whimsical personal letters, biting apologia, appreciations of fellow artists, pugnacious interviews, farcical film scripts, prose poems, manifestos, and much more, a new Magritte emerges: part Surrealist, part literalist, part celebrity, part rascal. While this book is sure to appeal to admirers of Magritte's art and those who are curious about his personal life, there is also much to delight readers interested in the history and theory of art, philosophy and politics, as well as lovers of creativity and the inner workings of a probing, inquisitive mind unrestrained by genre, medium, or fashion.

"What determines the significance of a work of art? Does it abide eternally within the work? Or is it continually constructed and reconstructed from the outside, through the work's presentation? The historical shift from autonomous modernist object to postmodernist critique of institutions, from artwork to discursive context, is the subject of Douglas Crimp's essays and Louise

Lawler's photographs in *On the Museum's Ruins*. Taking the museum as paradigmatic institution of artistic modernism, Crimp surveys its historical origins and current transformations. The new paradigm of postmodernism is elaborated through analyses of art practices broadly conceived--not only the practices of artists but also those of critics and curators, of international exhibitions, and of new or refurbished museums."--back cover.

Knitting and crochet have long been considered forms of folk art, but in the 21st century, these time-honoured crafts are breaking away from the outdated stereotype of cosy domesticity. Whether miniature or oversized, multi-coloured or monochrome, abstract or naturalistic, intimate or exhibitionist, knitted works are now invading galleries, museums and other public spaces. Yarn has become a medium for artistic expression as valid and multifaceted as painting, sculpture or photography. Showcasing

forty international artists who incorporate knitting, crochet and more into their practice, this book provides a survey of yarn work in contemporary art, illustrating the huge range of ways in which these techniques have been embraced as a form of creative expression. Some artists evoke a kind of nostalgia, rediscovering skills that have fallen from fashion or promoting the value of ancient handicrafts in an industrialized world of mass-production. Others push the boundaries of knitting by using non-traditional materials such as rope or wire, or by using its sculptural potential to tackle themes that are political, personal or transgressive. Although often associated with feelings of warmth, enclosure and familial love, yarn can also represent the ties that

bind us together or a membrane that protects us from the world. Packed with striking images, this book demonstrates how knitting needles and crochet hooks can create works of art that are challenging and unique, forcing us to take a fresh look at our own lives and beliefs and at the objects that surround us every day.

In *Pink Globalization*, Christine R. Yano examines the creation and rise of Hello Kitty as a part of Japanese Cute-Cool culture. Yano argues that the international popularity of Hello Kitty is one aspect of what she calls pink globalization—the spread of goods and images labeled cute (kawaii) from Japan to other parts of the industrial world. The concept of pink globalization connects the expansion of Japanese companies to overseas markets, the enhanced

distribution of Japanese products, and the rise of Japan's national cool as suggested by the spread of manga and anime. Yano analyzes the changing complex of relations and identities surrounding the global reach of Hello Kitty's cute culture, discussing the responses of both ardent fans and virulent detractors. Through interviews, Yano shows how consumers use this iconic cat to negotiate gender, nostalgia, and national identity. She demonstrates that pink globalization allows the foreign to become familiar as it brings together the intimacy of cute and the distance of cool. Hello Kitty and her entourage of marketers and consumers wink, giddily suggesting innocence, sexuality, irony, sophistication, and even sheer happiness. Yano reveals the edgy power

in this wink and the ways it can overturn, or at least challenge, power structures. [On the Museum's Ruins](#) MIT Press This major new book on René Magritte offers fresh interpretations of the artist's use of symbols and imagery to articulate his particular brand of surrealism. In this beautiful monograph, a collection of revelatory essays focuses on five common images in René Magritte's work--fire, shadows, curtains, words, and the fragmented body. Featuring vibrant reproductions of more than 100 works, this book helps readers understand how the artist employed these images in ways both deceptive and realistic. The book explores how he distorted accepted interpretations of classic symbols; why he so often used words as elements of his paintings; and how he applied

aspects of the theater in his works. As Magritte's paintings have become subsumed by the very commercialism they sought to ridicule, this volume takes a fresh look at an artist whose familiarity masks an incredible gift for deception and rapier-like intellect.

Ayurveda, the ancient art of healing, has been practiced in India for more than two thousand years and survives today as a living medical tradition whose principles are at the heart of many "alternative" therapies now used in the West. This "science of longevity" has parallels with Buddhist thought, and advocates a life of moderation through which the three humors of the body will be brought into balance. The writings selected for this volume are taken from

Sanskrit medical texts written by the first Ayurvedic physicians, who lived between the fifth century b.c. and the fourteenth century a.d. Here readers will find wide-ranging and fascinating advice on the benefits of garlic therapy, prayers for protection against malevolent disease deities, surgical techniques, exercise regimens, the treatment of poisons, the interpretation of dreams, and more. Au Québec et au Canada, comme aux États-Unis et dans nombre de pays européens, l'étude des idées politiques constitue l'un des principaux champs institutionnalisés de la recherche et de l'enseignement en science politique. Toutefois, à la différence des chercheuses et chercheurs des autres champs de la science politique, et plus généralement des sciences humaines et sociales, les spécialistes du champ des idées politiques se sont relativement peu arrêtés à une réflexion explicite, systématique et approfondie sur le découpage de leur objet d'étude (le

"quoi"), sur leurs méthodes (le "comment") et sur les fins de leur entreprise (le "pourquoi"). Autrement dit, comparé à d'autres champs, les chercheuses et chercheurs en idées politiques sont étonnamment peu loquaces sur tout ce qui concerne leurs approches. Sans doute symptomatique de ce déficit de réflexivité, la dénomination même du champ est l'objet d'un certain flou. Lorsque l'on parle d'étude des idées politiques, il peut s'agir de philosophie politique, d'histoire des idées politiques, de théorie politique, ou encore de pensée politique. Nous rencontrons régulièrement ces différentes appellations dans la pratique et dans les livres. Elles sont parfois confondues, parfois distinguées, souvent reçoivent des définitions contradictoires.

En plus de proposer en introduction une interprétation de ce qui rassemble et de ce qui distingue les pratiques associées au champ, cet ouvrage présente un état des lieux des principales approches à l'étude des idées politiques.

Cedric loves me, I know he does. He loves me. So believes Chloe, so much so that this mantra becomes a way of surviving. A way of denying Cedric's sometimes cruel behavior. Because when he takes her in his arms, she is close to understanding love, is sure she will never again feel abandoned. Never mind the insults and screams, never mind a few small bruises or unsettling sexual requests. Eventually Cedric's sexual abuse becomes more tolerable

than his verbal scorn and emotional instability. Chloe forgets how to use the word "no", learning quickly that "yes" will grant her respite, and even sometimes the love for which she yearns. Like the bull in a bullfight, Chloe is blinded by Cedric's manipulative game. Like the doomed animal, Chloe lowers her head and surrenders. Following the ritualized acts of a corrida, "BullShit: this is not a love story" draws the reader into the darker side of human nature. A suffocating and emotional auto-fiction thriller, this page-turning debut auto-fiction novel by Nicole Kranz is a gripping portrait of a narcissistic pervert. Who will win: the matador or the bull? Cedric or Chloe?

Magritte, Ideas and Images Pantheon Ad Reinhardt is probably best known for

his black paintings, which aroused as much controversy as admiration in the American art world when they were first exhibited in the 1950s. Although his ideas about art and life were often at odds with those of his contemporaries, they prefigured the ascendance of minimalism. Reinhardt's interest in the Orient and in religion, his strong convictions about the value of abstraction, and his disgust with the commercialism of the art world are as

fresh and valid today as they were when he first expressed them.
