Much more than a book on compiling
grant proposals, *Grant Management:
Funding for Public and Nonprofit
Programs* presents grant writing in its
broader organizational management
framework. This text takes a
comprehensive approach to external
funding for public and nonprofit
agencies. The book begins with an

introduction to grants, their types, their
history and their key characteristics to
inform the next stage the search for
funding. A key part of any management
process, an entire chapter considers the
purpose and approaches to evaluation
that should be considered in conjunction
with grant-funded programs. The book
concludes with a chapter that considers
the process in reverse how to go about
distributing funds as a grant maker
rather than a grant seeker. This text
leads the reader through the technical
steps of preparing an application,
explaining the process used to make
decisions, key aspects of grant
management, and includes a summary
of important factors directly pertaining
to grant funds. Written from the
perspective of community development,
With information drawn from core
theories and tools of public
administration, *Grant Management:
Funding for Public and Nonprofit
Programs* addresses overarching
theoretical issues for public
management as well as offers an applied
perspective of grant funding and
management. This is an ideal text for
students and public and nonprofit
managers alike.
