Burlington has welcomed local farms, breweries and distilleries with open arms. The Queen City fosters a unique culture around beer and farm-to-table cuisine. Daniel Standiford established the city's first brewery in 1880. Prohibition ushered in a dry era that remained for more than a century until Greg and Nancy Noonan fought the law and established Vermont Pub & Brewery in the late 1980s. Since then, breweries have popped up, from nationally recognized Magic Hat down to the city's first blendery, House of Fermentology. Authors Adam Krakowski and Jeff S.

Baker II explore Burlington's sudsy history from early newspaper clippings to modern-day tastemakers, along with some delicious recipes.

Before Bunny Yeager was old enough to be one, she fantasized about becoming a Pin-Up girl. She realized her dream and much more. After building a successful modeling career, she moved behind the camera, in the 1950s, to become one of the most renowned glamour photographers in the world. Her work has appeared in magazines, calendars, posters, and several books. This book is a celebration of all the emancipated young women with beautiful faces and figures who posed for her in the 1950s, just as she embarked on her career as a professional photographer. There are nearly 200 photographs, all reproduced

as Bunny took them, including full color and beautiful black and white works. This book will delight aficionados of the Pin-Up, historians of photography, and admirers of the human form.

A General History of Horology describes instruments used for the finding and measurement of time from Antiquity to the 21st century. In geographical scope it ranges from East Asia to the Americas. The instruments described are set in their technical and social contexts, and there is also discussion of the literature, the historiography and the collecting of the subject. The book features the use of case studies to represent larger topics that cannot be completely covered in a single book. The international body of authors have endeavoured to offer a fully world-wide survey accessible to students, historians, collectors, and the general reader, based on a firm understanding of the technical basis of the subject. At the same time as the work offers a synthesis of current knowledge of the subject, it also incorporates the results of some fundamental, new and original research.

Behavioral finance presented in this book is the second-

generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

A look back at vintage magazines and an invitation to enter the spellbinding world of luscious pin-up models. IMAGINED BY MALY SIRI, THIS COFFEE TABLE BOOK IS A REMINDER OF VINTAGE MAGAZINES AND AN INVITATION TO ENTER THE SPELLBINDING WORLD OF PIN-UPS Maly Siri's Pin-up Art Good Girls / Bad Girls raises two themes: - On one side, the "Good Girls": the damsels with soft skin powdering their faces in front of the mirror, the Tahitian girls with enchanting smiles and the brave soldiers... Their charm is due to their sparkling characters and apparent

candour. - And on the other side, the “Bad Girls”: the rouged vamps with sensuous looks, the spies, the melancholic blues singers and other mis ts... The fact that they are aware of their charms makes them even more dangerous... This book is a rich and delicious homage inspired by the iconography of the 1930's to 50's, a concentrate of pure glamour, with a preface by Chantal Thomass.

This volume, which gathers contributions presented at the annual conferences of l'Association pour le développement de l'histoire culturelle (ADHC), questions the subjects and boundaries of cultural history in France - with regard to neighboring approaches such as cultural studies, media studies, and gender studies - to elaborate a "social history of representations." Historians, philosophers and sociologists address a large variety of topics and methodological proposals. Definitions, objects and actors,

memories and cultural transfers: this book depicts the major questions that underlie the historical debate at the beginning of the 21st century.

Play It Loud celebrates the musical instruments that gave rock and roll its signature sound. Seven engrossing essays by veteran music journalists and scholars discuss the technical developments that fostered rock's seductive riffs and driving rhythms; the evolution of the classic lineup of two guitars, bass, and drums; the thrilling innovations and expanded instrumentation musicians have explored to achieve unique effects; the powerful visual impact instruments have had; and the essential role they have played in the most memorable moments of rock and roll history. Abundant photographs depict rock's most iconic instruments—including Jerry Lee Lewis's baby grand piano, Chuck Berry's Gibson ES-350T guitar, John Lennon's twelve-string Rickenbacker 325, Keith Moon's drum set, and the white Stratocaster Jimi Hendrix played at Woodstock—both in performance and as works of art in their own right. Produced in collaboration with the Rock and Roll Hall of Fame, this astounding book goes behind the music to offer a rare, in-depth look at the instruments that inspired the musicians and made possible the songs we know and love.

To boost soldiers' morale and remind them of the stakes of victory, the American military formalized a recreation program that sent respectable young women, along with famous entertainers, overseas. This history of the women who talked and listened, danced and sang, adds an intimate chapter to the story of war and its ties to life in peacetime.

From the first, brief moving images of female nudes in the 1880s to the present, the motion picture camera made the female body a battleground in what we now call the culture wars. Churchmen feared the excitation of male lust; feminists decried the idealization of a body type that devalued the majority of women. This history of Hollywood's treatment of women's bodies traces the full span of the motion picture era. Primitive peepshow images of burlesque dancers gave way to the "artistic" nudity of the 1910s when model Audrey Munson and swimmer Annette Kellerman contended for the title of American Venus. Clara Bow personified the qualified sexual freedom of the 1920s flapper. Jean Harlow, Mae West and the scantily clad chorus girls of the early 1930s provoked the Legion of Decency to demand the creation of a Production Code Administration that turned saucy Betty Boop into a housewife. Things loosened up during World War II when Betty Grable and Rita Hayworth ruled the screen. The postwar years saw the blonde bombshells and "mammary madness" of the 1950s while the 1960's brought bikini-clad sex kittens. With the replacement of the Production Code by a ratings system in 1968, nudity and sex scenes proliferated in the R-rated

movies of the 1970s and 1980s. Recent movies, often directed by women, have pointed the way toward a more egalitarian future. Finally, the #MeToo movement and the fall of Harvey Weinstein have forced the industry to confront its own sexism. Each chapter of this book situates movies, famous and obscure, into the context of changes in the movie industry and the larger society.

For most of the eighteenth century, British protestantism was driven neither by the primacy of denominations nor by fundamental discord between them. Instead, it thrived as part of a complex transatlantic system that bound religious institutions to imperial politics. As Katherine Carte argues, British imperial protestantism proved remarkably effective in advancing both the interests of empire and the cause of religion until the war for American independence disrupted it. That Revolution forced a reassessment of the role of religion in public life on both sides of the Atlantic. Religious communities struggled to reorganize within and across new national borders. Religious leaders recalibrated

their relationships to government. If these shifts were more pronounced in the United States than in Britain, the loss of a shared system nonetheless mattered to both nations. Sweeping and explicitly transatlantic, Religion and the American Revolution demonstrates that if religion helped set the terms through which Anglo-Americans encountered the imperial crisis and the violence of war, it likewise set the terms through which both nations could imagine the possibilities of a new world.

Louis Shabner began his career producing shop window advertising for brands such as Every Ready, Ovaltine and Chivers jams, amongst others, but is best known for his paintings of sultry sirens. During the 1960s and 1970s his prints, which were available through shops such as Boots chemists and by post through Freemans catalogues, adorned lounge walls up and down the UK. Many of his women made it onto hugely popular calendars during the same period. Under the pseudonym Sheldon, Shabner also produced numerous book cover paintings for Pan and other publishers. At the time, mass-produced art of this kind was viewed as having only 'throw away' value, but now Shabner's work - often mentioned in the same breath as that of contemporaries Vladimir Tretchikoff and J H Lynch - is highly sought-after by collectors, with copies of his original prints and calendars being snapped up for high prices. In The Art of Louis Shabner, researcher Stuart Webb presents the most comprehensive account ever published of Shabner's life and work, lavishly illustrated with beautiful colour images of a wealth of his paintings. A 'must buy' for aficionados of vintage art and book cover illustration. COMMENTS ON THE HARDBACK EDITION

"Repeopling Vermont: The Paradox of Development in the Twentieth Century, by historian Paul Searls, traces two distinct but interrelated stories to illuminate the fundamental contradictions and ironies that defined Vermont in the twentieth

century. One is the story of a group of Swedish immigrants who settled in and around Landgrove in the 1890s and their descendants. The other is the story of Samuel R. Ogden, who beginning in 1929 purchased most of the buildings in the main village of Landgrove and set out to revitalize the town. Ogden succeeded in that project and subsequently became an important public servant to Vermont; he was instrumental in the growth of the ski industry, and was a founder of both Vermont Life magazine and the Vermont Natural Resources Council. These intertwined stories reveal the central paradox of Vermont in the twentieth century. The state's leaders simultaneously saw Vermont's overwhelmingly rural character as both a distressing problem in need of a solution, and the state's greatest asset. But their efforts to preserve Vermont's precious rural heritage, it's human and physical landscapes, while at the same time improving the state, also put that same way of life in peril. Those developments continue to reverberate throughout Vermont in the twenty-first century, shaping the experience of everyone who lives in or visits the Green Mountain State today"--
