New York Times and USA TODAY bestselling author DIANA PALMER is back with a thrilling new story featuring the Kirk brothers

of Wyoming. Former border agent Dalton Kirk thought his life was over—literally—when a gang of smugglers left him for dead. Defying all odds, he survives his ordeal and returns to his Wyoming ranch ready to dedicate his future to a more peaceful home on the range. Until lovely Merissa Baker knocks on his door. Merissa is well aware of her reputation as the local eccentric—she knows things before they happen—and she's had a vision that Dalton is in danger. Even though her beliefs clash with Dalton's cowboy logic, she's determined to save the handsome rancher she's secretly loved forever. Visions? It's all ridiculous to Dalton...until things start happening that prove Merissa right. And now Dalton is not the only target—so is Merissa. Can Dalton be bold enough to trust the unknown? Is this Wyoming man ready to love?

Loves & Miracles of Pistola Henry Holt and Company (BYR)

When he wrote *Survival Guns* in 1979, Mel Tappan demonstrated that having the right weapons for securing food and providing personal defense is the key to sustaining life on an independent basis, whether or not a catastrophe occurs. This is even more true today. *Survival Guns* became the standard in its own time and went through several printings. When it finally went out of print, it graduated from a classic to a sought-after collector's item, because the principles and advice in this well-reasoned volume are sound and perennially valuable. Some new guns and some new calibers have become available since this book was first published, but its principles, advice, and

value remain unchanged. Having more choices only increases the value of advice on how to choose what is best for you. As used copies of this book became harder and harder to find, Paladin received numerous requests to bring Tappan's classic back into print. We are pleased to make the most well-known survival firearms book ever published available once more to a new generation of concerned citizens facing the same threats Tappan chronicled during his lifetime. Survival Guns remains the definitive book for anyone interested in the practical use of firearms and related weapons for defense, food gathering, and predator and pest control under conditions of long-term, self-sufficient living.

 Formally adopted by the U.S. Army in 1911 and continuing in service for

over 100 years, the Government Model 1911 pistol has undergone remarkably few changes throughout its long history yet remains relevant today. Known by many simply as "America's Pistol," the 1911 has been trusted by soldiers on battlefields spanning two centuries, carried by law enforcement, refined in small custom shops across the U.S., and revered by firearms enthusiasts and collectors as a work of art. Larry Vickers - renown combat veteran, firearms instructor and small arms expert - takes you on a one of a kind tour of some of history's finest examples of the 1911, as he shares pistols from his own personal collection as well as those of his friends and other firearms specialists. Along the way, he gives the reader a glimpse into the secretive world of U.S. Special Operations weapons development, highlights the details of some of history's most valued production and custom guns, and opens the door to premiere 1911 builders and custom shops. Included are rare and unique pistols made by Colt, Kimber, Pachmayr, Springfield Armory, STI, Wilson Combat, and a

number of custom builders such as Jason Burton, Jim Garthwaite, John Harrison, Richard Heinie, Paul Liebenberg, Steve Nastoff, Wayne Novak, Armand Swenson and Larry Vickers. Additional insight is provided by firearms expert and instructor Ken Hackathorn, world champion shooter Rob Leatham and custom builder Jason Burton. *Vickers Guide: 1911* presents this highly curated collection of 1911 handguns in never before seen detail on larger than life, wide format, full color prints in a linen covered hardback. *Vickers Guide: 1911* is the next best thing to having these exceptional collector's grade handguns in your own personal collection, and is a must-have for any serious firearms enthusiast. In a tiny Italian village, life in the 1950s is a daily pageant of small human dramas. There are lippy signoras and earthy farmworkers. There is a coffin maker, a silkworm farmer and those who catch frogs for the town's local delicacy: frog risotto. And then there's Pistola, a teenage boy in love with

his second cousin Teresa, a girl who is sadly destined to marry the village thug. To escape his heartache, young Pistola accepts the offer of a lifetime: to travel to South Africa to work on the trains. In lively Johannesburg, he and a group of compatriots are trained as stewards and taught to speak English – and Afrikaans. It's not all work, mind you. The Italians set up home in Hillbrow and go partying in Sophiatown with the likes of Miriam Makeba. When Pistola falls for the spunky Malikah, a political activist, the apartheid police watch every breath of their passionate, illicit relationship. Flash forward a few years, when Pistola, no longer the gauche village boy, must return home to make a decision that will define his future. Witty, affectionate and vivid, this coming-of-age novel pays homage to the 110 young Italian men who were recruited to work on the South African Railways and introduced Italian cuisine to the nation.

Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to

condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking

us, and what we should do about it.

encourage shooters to opt for guns of less power, especially CO2-powered guns. Several airgun shooters are not required to go through the traditional buying procedures of high-powered pistols and rifles, such as background checks and waiting periods. Plus, companies such as Colt, Smith & Wesson, and Walther manufacture high quality CO2 products that are visually indistinguishable from their traditional firearms. In this new guide to CO2-powered pistols and rifles, James E. House offers a comprehensive history of CO2 guns, dating back to the 1930s, and a discussion of propulsion, pellets, and sights. Beginning shooters are introduced to the market with a complete analysis on performance and accuracy of currently available products. Airgun enthusiasts are reunited with CO2 classics no longer being manufactured. This book also offers additional sections on target shooting, games, and varmints. Offers a comprehensive history of CO2 pistols and rifles dating back to the 1930s Includes a categorical review of BB pistols, .177

caliber pistols, .20 and .22 caliber pistols, and rifles Discover products currently available only on the secondary market
