GRANT SIERRA

A New Theory of Urban Design Oxford University Press
You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, "lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely." The three books are *The Timeless Way of Building*, *The Oregon Experiment*, and this book, *A Pattern Language*. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain "languages," which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. "Patterns," the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five

hundred years as they are today.

Hollow Places: an Unusual History of Land and Legend Center for Environmental Struc

It's widely accepted that our environment is in crisis. Less widely recognized is that three quarters of environmental damage is due to cities - the places where most of us live. As this powerful new book elucidates, global sustainability is therefore directly dependent on urban design. In *Living Architecture, Living Cities* Christopher Day and Julie Gwilliam move beyond the current emphasis on technological change. They argue that eco-technology allows us to continue broadly as before and only defers the impending disaster. In reality, most negative environmental impacts are due to how we live and the things we buy. Such personal choices often result from dissatisfaction with our surroundings. As perceived environment has a direct effect on attitudes and motivations, improving this can achieve more sustainable lifestyles more effectively than drastic building change - with its notorious performance-gap limitations. As it's in places that our inner feelings and material reality interact, perceived environment is place-based. Ultimately, however, as the root cause of unsustainability is attitude, real change requires moving from the current focus on buildings and technology to an emphasis on the non-material. Featuring over 400 high quality illustrations, this is essential reading for anyone who believes in the value and power of good design. Christopher Day's philosophy will continue to inspire students with an interest in sustainable architecture, urban planning and related fields.

The Journey of Little Charlie Yearling

Sir Christopher Wren (1632-1723) is now mostly remembered as a genius of architecture - but he was also an accomplished polymath, who only came to architecture quite late in life. Most famous as the mastermind behind the rebuilding of St Paul's Cathedral and more than fifty parish churches after the Great Fire of London, among his countless other projects Wren also designed the Royal Hospital at Chelsea, the Royal Naval Hospital at Greenwich, and much of Hampton Court Palace. Replete with colourful images of his buildings, this concise biography tells the story of a man whose creations are still popular tourist attractions

to this day, but also casts light on Wren's credentials as an intellectual and a founding member of the Royal Society.

The Enchanted Places Scholastic Inc.

Investigates how architecture, technology, politics, and urban planning came together in French architect Victor Baltard's creation of the Central Markets of Paris. Presents a case study of the historical process that produced modern Paris between 1840 and 1870.

Environment and Children New York : Oxford University Press
California is called the "Golden State" with good reason, and not simply because it was birthed by the '49 Gold Rush. From sun-kissed, seaside San Diego and the desert oasis of Palm Springs in the south, to misty redwood forests and snow-capped volcanoes in the north, the state is blessed with shining superlatives. The cities are chockfull of world-class museums, fabulous architectural and historic sites, plus cosmopolitan restaurants and chic rooftop bars. You could spend a lifetime exploring and not discover it all. But what if you only have 24 hours in any one place? California is blessed with so many amazing things to see and do, it's hard to know what to start. *Perfect Day California* is your handy guide to honing in on the quintessential experiences. Watch polar bears frolic in the water behind a giant glass screen at San Diego Zoo. Experience the thrill of a VIP behind-the-scenes tour at Paramount Studios. Hear and see firsthand the enthralling inside scoop on space exploration at the NASA Jet Propulsion Laboratory. Whether your activity of choice is marveling at contemporary art in the Getty Museum or wandering beneath the soaring Coast redwoods, steeping in a hot mud bath spa or panning for gold in the Sierra foothills, California has a perfect day for every taste and desire. Local author Christopher P. Baker knows California like the back of his hand. Here he shares with you his knowledge and insights to make the most of your visits to destinations throughout the state. He provides invaluable and inspirational insider tips that condense 24 hours in each place into the most rewarding experience possible.

Spirit and Place Tor Books

From the author of *The Italian Teacher*, this acclaimed debut novel set in Rome follows the topsy-turvy lives of the denizens of

an English language newspaper. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Janet Maslin, The New York Times • The Economist • NPR • Slate • The Christian Science Monitor • Financial Times • The Plain Dealer • Minneapolis Star Tribune • St. Louis Post-Dispatch • The Kansas City Star • The Globe and Mail • Publishers Weekly Look in the back of the book for a conversation between Tom Rachman and Malcolm Gladwell Fifty years and many changes have ensued since the paper was founded by an enigmatic millionaire, and now, amid the stained carpeting and dingy office furniture, the staff's personal dramas seem far more important than the daily headlines. Kathleen, the imperious editor in chief, is smarting from a betrayal in her open marriage; Arthur, the lazy obituary writer, is transformed by a personal tragedy; Abby, the embattled financial officer, discovers that her job cuts and her love life are intertwined in a most unexpected way. Out in the field, a veteran Paris freelancer goes to desperate lengths for his next byline, while the new Cairo stringer is mercilessly manipulated by an outrageous war correspondent with an outsize ego. And in the shadows is the isolated young publisher who pays more attention to his prized basset hound, Schopenhauer, than to the fate of his family's quirky newspaper. As the era of print news gives way to the Internet age and this imperfect crew stumbles toward an uncertain future, the paper's rich history is revealed, including the surprising truth about its founder's intentions. Spirited, moving, and highly original, *The Imperfectionists* will establish Tom Rachman as one of our most perceptive, assured literary talents.

A Pattern Language Bloomsbury Publishing

The *New Lives of Teachers* examines the varied, often demanding commitments on teachers' lives today as they attempt to pursue careers in primary and secondary education. Building upon Huberman's classic study, it probes not only teachers' everyday lives, but also the ways in which they negotiate the pitfalls of professional development and the different life and work 'scenarios' that challenge their sense of identity, well-being and effectiveness. The authors provide a new evidence-based framework to investigate and understand teachers' lives. Using a range of contemporary examples of teaching, they demonstrate that it is the relative success with which teachers manage various personal, work and external policy challenges that is a key factor in the satisfaction, commitment, well-being and effectiveness of

teachers in different contexts and at different times in their work and lives. The positive and negative influences upon career and professional development and the influences of school leadership, culture, colleagues and conditions are also shown to be profound and relate directly to teacher retention and the work-life balance agenda. The implications of these insights for teaching quality and teacher retention are discussed. This book will be of special interest to teachers, teachers' associations, policy makers, school leaders, and teacher educators, and should also be of interest to students on postgraduate courses.

The Imperfectionists Anchor Canada

The Newberry Medalist brings humor and heart to this story of a Civil War-era boy struggling to do right in the face of history's cruelest evils. Twelve-year-old Charlie is down on his luck: His sharecropper father just died, and Cap'n Buck—the most fearsome man in Possum Moan, South Carolina—has come to collect a debt. Fearing for his life, Charlie strikes a deal with Cap'n Buck and agrees to track down some folks accused of stealing from the cap'n and his boss. It's not too bad of a bargain for Charlie . . . until he comes face-to-face with the fugitives and discovers their true identities. Torn between his guilty conscience and his survival instinct, Charlie needs to figure out his next move—and soon. It's only a matter of time before Cap'n Buck catches on. Praise for *The Journey of Little Charlie* A National Book Award Finalist "This is a compelling and ugly story for middle-grade readers told with genuine care. Little Charlie is a product of his Southern upbringing, yet in Curtis's skillful hands he learns the world is not as he'd thought . . . Christopher Paul Curtis does it again." —Historical Novel Society "A characteristically lively and complex addition to the historical fiction of the era from Curtis." —Kirkus Reviews

A New Pattern Language for Growing Regions Routledge

In today's frantic 24/7 world, the Sabbath - a day devoted to rest and contemplation - has never been more necessary. *A Day Apart* offers a portrait of a truly timeless way to escape the everyday world and add meaning to our lives.

A Day Apart William Collins

Americans are voting with their feet to abandon strip malls and suburban sprawl, embracing instead a new type of community where they can live, work, shop, and play within easy walking distance. In *The Option of Urbanism* visionary developer and

strategist Christopher B. Leinberger explains why government policies have tilted the playing field toward one form of development over the last sixty years: the drivable suburb. Rooted in the driving forces of the economy—car manufacturing and the oil industry—this type of growth has fostered the decline of community, contributed to urban decay, increased greenhouse gas emissions, and contributed to the rise in obesity and asthma. Highlighting both the challenges and the opportunities for this type of development, *The Option of Urbanism* shows how the American Dream is shifting to include cities as well as suburbs and how the financial and real estate communities need to respond to build communities that are more environmentally, socially, and financially sustainable.

Black Chalk Springer Science & Business Media

Master storyteller Christopher Paul Curtis's Newbery Honor novel, featuring his trademark humor and unique narrative voice, is now part of the Scholastic Gold line! Elijah of Buxton, recipient of the Newbery Honor and winner of the Coretta Scott King Award, joins the Scholastic Gold line, which features award-winning and beloved novels. This edition includes exclusive bonus content! Eleven-year-old Elijah lives in Buxton, Canada, a settlement of runaway slaves near the American border. Elijah's the first child in town to be born free, and he ought to be famous just for that -- not to mention for being the best at chunking rocks and catching fish. Unfortunately, all that most people see is a "fra-gile" boy who's scared of snakes and tends to talk too much. But everything changes when a former slave steals money from Elijah's friend, who has been saving to buy his family out of captivity in the South. Now it's up to Elijah to track down the thief -- and his dangerous journey just might make a hero out of him, if only he can find the courage to get back home.

The Timeless Way of Building Reedy Press LLC

Connecticut boasts some of the oldest and most distinctive architecture in New England, from Colonial churches and Modernist houses to refurbished nineteenth-century factories. The state's history includes landscapes of small farmsteads, country churches, urban streets, tobacco sheds, quiet maritime villages, and town greens, as well as more recent suburbs and corporate headquarters. In his guide to this rich and diverse architectural heritage, Christopher Wigren introduces readers to 100 places across the state. Written for travelers and residents alike, the

book features buildings visible from the road. Featuring more than 200 illustrations, the book is organized thematically. Sections include concise entries that treat notable buildings, neighborhoods, and communities, emphasizing the importance of the built environment and its impact on our sense of place. The text highlights key architectural features and trends and relates buildings to the local and regional histories they represent. There are suggestions for further reading and a helpful glossary of architectural terms. A project of the Connecticut Trust for Historic Preservation, the book reflects more than 30 years of fieldwork and research in statewide architectural survey and National Register of Historic Places programs.

Elijah of Buxton (Scholastic Gold) Dial Press

"[A] tense and nimbly crafted psychological thriller," about a father accused of murder, the daughter defending him, and the victim's alluring boyfriend (Publishers Weekly). Ashlee Parker is dead, and Emily Shepherd's dad is accused of the crime. A former soldier suffering from PTSD, he emerges from the woods carrying the girl's broken body. "Gone," he says, then retreats into silence. What really happened that wild night? Emily knows in her bones that her father is innocent—isn't he? Before he's convicted, she's got to find out the truth. Does Damon Hilary, Ashlee's charismatic boyfriend, have the answers? Or is he only playing games with her—the kinds of games that can kill? "A gripping, heartbreaking, emotionally substantial look at war wounds and the allure of danger." —Kirkus Reviews

Perfect Day California Routledge

The definitive edition of this classic.

The New Lives of Teachers Scholastic Inc.

How does the built environment affect children - their health, their behaviour, education and development? To support them, what do we need to consider and what do we need to do? Can our surroundings foster environmental and social awareness and responsibility? Based on Christopher Day's experiences designing schools and early childhood centres in the United States and Britain, this groundbreaking book sets out to answer these questions and to offer solutions. Children all too often find themselves living in alien surroundings designed with the needs of adults in mind, cut off not just from the natural environment but also childhood itself. Society's reaction - to cocoon children from the outside world or to resort to drugs to control behaviour -

fails to address the fundamental causes of problems which lie in the environment not the children themselves. One of the world's leading thinkers on the impact of buildings on people, Christopher Day's insights offer new light on one of the most important issues for today's society.

Places of the Soul Routledge

Now the subject of major Disney film starring Ewan McGregor, this is Christopher Robin in his own words. Millions of readers throughout the world have grown up with the stories and verses of A. A. Milne; have envied Christopher Robin in his enchanted world; laughed at Pooh - a bear of very little brain - and worried about Piglet and his problems. But what was it like to be the small boy with the long hair, smock and wellington boots? At the age of fifty-four Christopher Milne recalled his early childhood, remembering 'the enchanted places' where he used to play in Sussex. The Hundred Acre Wood, Galleon's Lap and Poohsticks Bridge existed not only in the stories and poems but were part of the real world surrounding the Milne home at Cotchford Farm. With deftness and artistry Milne draws a memorable portrait of his father, and an evocative reconstruction of a happy childhood in London and Sussex. *The Enchanted Places* is a story told with humour and modesty.

The Option of Urbanism Oxford University Press

Based on a DfES funded study of 300 teachers in 100 primary and secondary schools in England, the authors identify different patterns of influence and effect between groups of teachers, which provide powerful evidence of the complexities of teachers' work, lives, identity and commitment, in relation to their sense of agency, well-being, resilience and pupil attitudes and attainment. This, in turn, provides a clear message for teachers, teachers' associations, school leaders and policy makers internationally, in understanding and supporting the need to build and sustain school and classroom effectiveness.

Connecticut Architecture Routledge

The venerable cities of the past, such as Venice or Amsterdam, convey a feeling of wholeness, an organic unity that surfaces in every detail, large and small, in restaurants, shops, public gardens, even in balconies and ornaments. But this sense of wholeness is lacking in modern urban design, with architects absorbed in problems of individual structures, and city planners preoccupied with local ordinances, it is almost impossible to

achieve. In this groundbreaking volume, architect and planner Christopher Alexander presents a new theory of urban design which attempts to recapture the process by which cities develop organically. To discover the kinds of laws needed to create a growing whole in a city, Alexander proposes here a preliminary set of seven rules which embody the process at a practical level and which are consistent with the day-to-day demands of urban development. He then puts these rules to the test, setting out with a number of his graduate students to simulate the urban redesign of a high-density part of San Francisco, initiating a project that encompassed some ninety different design problems, including warehouses, hotels, fishing piers, a music hall, and a public square. This extensive experiment is documented project by project, with detailed discussion of how each project satisfied the seven rules, accompanied by floorplans, elevations, street grids, axonometric diagrams and photographs of the scaled-down model which clearly illustrate the discussion. *A New Theory of Urban Design* provides an entirely new theoretical framework for the discussion of urban problems, one that goes far to remedy the defects which cities have today.

Developing Teachers Scholastic Inc.

A stunning debut novel with an intriguing literary hook: written in part as a letter from a victim to her abductor. Sensitive, sharp, captivating! Gemma, 16, is on layover at Bangkok Airport, en route with her parents to a vacation in Vietnam. She steps away for just a second, to get a cup of coffee. Ty--rugged, tan, too old, oddly familiar--pays for Gemma's drink. And drugs it. They talk. Their hands touch. And before Gemma knows what's happening, Ty takes her. Steals her away. The unknowing object of a long obsession, Gemma has been kidnapped by her stalker and brought to the desolate Australian Outback. *STOLEN* is her gripping story of survival, of how she has to come to terms with her living nightmare--or die trying to fight it.

The Production of Houses Scholastic Inc.

Now a New York Times and USA Today bestseller! Winner of Best Science Fiction in the 2020 Goodreads Choice Awards! *To Sleep in a Sea of Stars* is a brand new epic novel from #1 New York Times bestselling author of *Eragon*, Christopher Paolini. Kira Navárez dreamed of life on new worlds. Now she's awakened a nightmare. During a routine survey mission on an uncolonized planet, Kira finds an alien relic. At first she's delighted, but elation turns to

terror when the ancient dust around her begins to move. As war erupts among the stars, Kira is launched into a galaxy-spanning odyssey of discovery and transformation. First contact isn't at all

what she imagined, and events push her to the very limits of what it means to be human. While Kira faces her own horrors, Earth and its colonies stand upon the brink of annihilation. Now, Kira might be humanity's greatest and final hope . . . The Fractalverse

Series To Sleep in a Sea of Stars Fractal Noise At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
