The Acquis Group - also known as the European Research Group on Existing EC Private Law - pursues the objective of presenting, in a restated form known as the Acquis Principles (ACQP), the large and sometimes incoherent patchwork of existing EC private law. These Principles reflect the current state of EC law in a structure which allows for the identification of commonalities, contradictions, and gaps in the Acquis. The Acquis Principles include: general rules formulated on the basis of existing EC law; an accompanying commentary, outlining the foundations in the Acquis;

and definitions of core legal terms and a glossary on terminology. This present volume is the second of a series. The book combines a revision of the parts of the ACQP published in the first volume - Contract I - with many new rules on remedies for non-performance, as well as certain specific situations or contracts, such as delivery of goods, package travel, and payment services.

Plurality and Citizenship in Israel

LexisNexis/Matthew Bender

As Qatar's aspirations of becoming a key location for international dispute settlement and international trade grow, so too does the importance of understanding private law in Qatar and the Gulf states. In this innovative book, Ilias Bantekas and Ahmed Al-Ahmed provide an original, English-language

treatise on the contract law of Qatar. Using an abundance of case law, the authors combine scholarly and practice-oriented expertise to develop a comprehensive treatment of Qatari contract law. The analysis is drawn from a wealth of judgements from the Qatari Court of Cassation and Court of Appeal, much of which was previously inaccessible to readers. Bringing sophisticated, detailed insights on Qatari law to an English-speaking legal audience, this is a vital text for academics, practitioners and students who wish to comprehend this increasingly influential global player. This title is available as Open Access on Cambridge Core.

Studies in Contract Law CRC Press

This book focuses on the Jewish-Palestinian conflict within the state of Israel and the general issue of the role played by modern states in either mitigating majority-minority conflict or exacerbating it. A comparative study, the chapters that concentrate on theoretical models, and comparable historical, legal or political patterns of development.

Problems in Contract Law Springer

This book examines whether international agreements between non-state actors can be identified as a source of international law using objective criteria. It asks whether, beyond Article 38 of the Statute of the International Court of Justice, there is a system of rules, processes, beliefs or semantics by which these agreements can be objectively identified as a source of international law. Departing from the more usual state-centric analysis, it adopts postmodern legal positivism as its analytical tool. This allows for the reality that international law-making takes place in subjective social landscapes. To test the effectiveness of this approach, it is applied to agreements between petroleum

agencies and corporations which allow two or more states to exploit disputed resources across boundaries looking in particular at arrangements involving China, Vietnam and the Philippines. By so doing it illustrates an alternative way that states can manage disputes, without having to resort to conflict. It will appeal to both scholars and practitioners of public international law, as well as civil servants.

World Class University', its alleged characteristics, and its policy expressions. It offers a broad overview of the historical background and current trajectory of the world-class-university construct. It also deepens the theoretical discussion, and points a way forward out of present impasses resulting from the pervasive use and abuse of the notion of "world-class" and related terms in the discourse of quality assessment. The book includes approaches and results from fields of inquiry not otherwise prominent in Higher Education studies, including philosophy and media studies, as well as sociology, anthropology, educational theory. The growing impact of global rankings and their strategic use in the restructuring of higher education systems to increase global

competitiveness has led to a 'reputation race' and the emergence of the global discourse of world class universities. The discourse of world class universities has rapid uptake in East Asian countries, with China recently refining its strategy. This book provides insights into this process and its future development. *Contract Law Concentrate* Cavendish Pub Limited
