The Nineteenth Century in the Prado Verlag Barbara Budrich
 An accessible account of the contradictory life and work of the modernist Catalan architect. The celebrated art nouveau architect Antoni Gaudí was a contradictory figure: a deeply religious, politically right-wing man who nevertheless built revolutionary buildings. This book explores Gaudí's life, work, and influences from Catalan nationalism to the industrial revolution. Michael Eade expertly guides readers through Gaudí's dozen great works, including the Sagrada Família that attracts millions of tourists each year. Gaudí's life is also chronicled from his provincial upbringing in Reus to his time in Barcelona. He later suffered a nervous breakdown, became obsessively religious, and fused Gothic, Baroque, and Orientalist architecture into his unique style. This brief biography offers an accessible introduction to this perplexing and fascinating life.

Barcelona, the exuberant capital of Catalonia and host of the 1992 Olympics, is here explored and exposed by its greatest contemporary author. Manuel Vazquez Montalban's anecdotal history takes us on an imaginary tour of the city, from its most secret corners to its most famous monuments. An erudite and impassioned guide, Montalban finds a controversy in every building, a story in every street, illuminating the city's rich history and turbulent politics, its art, gastronomy and football. There are many Barcelonas, and Montalban knows them all: the lavish art-nouveau houses in Vallvidrera where he himself lives; the labyrinthine squalor of the Barri Xino, setting for Genet's Thief's Journal; the Barri Gotic where the independent Catalan Kingdom between the eleventh and fifteenth centuries created a nationalist consciousness which has endured for half a millennium; the oneiric Parc Guell, designed by the city's most celebrated architect, Antoni Gaudí. But this definitive survey is one unlikely to be endorsed by the Oficina de Turismo. For Montalban is fiercely critical of the values of the new 'Olympic' Barcelona: the misery of the inner-city slums where one person dies every second day from a heroin overdose; the speculation which has compounded overcrowding in a metropolis with the highest population density in Europe; the ravaging of working-class suburbs to make way for an aseptic international centre. Once Europe's most utopian city, Barcelona, he argues, 'has become a market, and everything is up for sale'. For visitors, Barcelonas will prove a stimulating, indispensable companion. And for everyone interested in art and architecture, politics and sport, it will provide an enthralling introduction to the great European city.

Understanding how medieval textual cultures engaged with the heritage of antiquity (transmission and translation) depends on recognizing that reception is a creative cultural act (transformation). These essays focus on the people, societies and institutions who were doing the transmitting, translating, and transforming -- the "agents". The subject matter ranges from medicine to astronomy, literature to magic, while the cultural context encompasses Islamic and Jewish societies, as well as Byzantium and the Latin West. What unites these studies is their attention to the methodological and conceptual challenges of thinking about agency. Not every agent acted with an agenda, and agenda were sometimes driven by immediate needs or religious considerations that while compelling to the actors, are more opaque to us. What does it mean to say that a text becomes "available" for transmission or translation? And why do some texts, once transmitted, fail to thrive in their new milieu? This

collection thus points toward a more sophisticated "ecology" of transmission, where not only individuals and teams of individuals, but also social spaces and local cultures, act as the agents of cultural creativity.

The remarkable story of the famous painting by Picasso and its diverse meanings from its conception to the present day 'Enthralling ... This is high-action drama, told like the rest within a huge frame of reference, theme interlocked with theme ... A painting which began its life within a particular political context has emerged as a universal statement on the ever-present horror and suffering of war. Van Hensbergen has treated an extraordinary subject admirably' Evening Standard Of all the great paintings in the world, Picasso's Guernica has had a more direct impact on our consciousness than perhaps any other. In this absorbing and revealing book, Gijs van Hensbergen tells the story of this masterpiece. Starting with its origin in the destruction of the Basque town of Gernika in the Spanish Civil War, the painting is then used as a weapon in the propaganda battle against Fascism. Later it becomes the nucleus of the Museum of Modern Art in New York and the detonator for the Big Bang of Abstract Expressionism in the late 1940s. This tale of passion and politics shows the transformation of this work of art into an icon of many meanings, up to its long contested but eventually triumphant return to Spain in 1981.

El llibre El fons d'art de la Universitat Rovira i Virgili recull les obres de més de 100 artistes que conformen aquesta col·lecció de la Universitat, formada al llarg de 15 anys. Les peces del conjunt són fruit, en alguns casos, d'encàrrecs específics, però majoritàriament han estat donades generosament a la institució pels mateixos artistes o per persones properes a ells. El volum l'encapçala una d'aquestes obres, la que ens identifica arreu: l'emblema creat per Antoni Tàpies.

The first woman to achieve wide recognition as a poet in Renaissance Italy, Vittoria Colonna was known for her ardent, but also deeply spiritual, verses. This volume reproduces ten of her sonnets in the original Italian alongside new English versions of compelling simplicity, and complements both with a sequence of moving black and white photographs. Governor General's Award winner Jan Zwicky gives Colonna's spiritual insights a contemporary voice, while photographer and noted mathematician Robert Moody paces her words against a visual meditation on the Passion story, as conveyed by Subirachs' sculptures for the basilica of the Sagrada Família in Barcelona. The volume's juxtaposition of poetry and photography illuminates the passion, reverence, and timelessness of both Subirachs' and Colonna's work.

En el contexto de un Estado económicamente autárquico y políticamente dictatorial, se genera en España, inesperadamente, con el apoyo institucional del Régimen, la vanguardia artística

más innovadora del panorama internacional. El profesor Gabriel Ureña analiza los móviles y eventos que hicieron posible que el franquismo potenciara las más atrevidas alternativas del movimiento artístico, entrando en el estudio tanto de los códigos creativos formales como de las matrices ideológicas, estéticas y culturales que afirmaron el triunfo de la neofiguración, abstracción e informalismo sobre los rancios postuados de la Academia y ofreciendo una inédita antología de textos de inapreciable valor para conocer la complejidad problemática del arte que no es coetáneo. La revisión interpretativa, el desplazamiento de los tópicos, la perspicacia crítica, una gran arsenal informativo y la claridad narrativa son las armas de que se vale el autor para replantear las relaciones Vanguardia-Poder en un marco histórico de obligada interconexión y autonomía.
