Each fall and spring,
millions of birds travel the
Pacific Flyway, the
westernmost of the four
major North American bird
migration routes. The
landscapes they cross

vary from wetlands to
farmland to concrete,
inhabited not only by
wildlife but also by
farmers, suburban
families, and major cities.
In the twentieth century,
farmers used the
wetlands to irrigate their
crops, transforming the
landscape and putting
migratory birds at risk.
The U.S. Fish and Wildlife
Service responded by
establishing a series of

refuges that stretched
from northern Washington
to southern California.
What emerged from these
efforts was a hybrid
environment, where the
distinctions between
irrigated farms and
wildlife refuges blurred.
Management of the
refuges was fraught with
conflicting priorities and
practices. Farmers and
refuge managers
harassed birds with

shotguns and flares to keep them off private lands, and government pilots took to the air, dropping hand grenades among flocks of geese and herding the startled birds into nearby refuges. Such actions masked the growing connections between refuges and the land around them. *Seeking Refuge* examines the development and management of refuges in the wintering range of migratory birds along the Pacific Flyway. Although this is a history of efforts to conserve migratory

birds, the story Robert Wilson tells has considerable salience today. Many of the key places migratory birds use — the Klamath Basin, California’s Central Valley, the Salton Sea — are sites of recent contentious debates over water use. Migratory birds connect and depend on these landscapes, and farmers face pressure as water is reallocated from irrigation to other purposes. In a time when global warming promises to compound the stresses on water and migratory species,

Seeking Refuge demonstrates the need to foster landscapes where both wildlife and people can thrive. *The Rotarian Army War* College Press
Film censorship has always been a controversial matter, particularly in jurisdictions with restrictive state-based censorship systems. This book reviews the film censorship system in the Asia-Pacific by comparing the systems used in Malaysia, Hong Kong and Australia. It identifies the

key issues and concerns that arise from the design and implementation of the system by examining the censorship laws, policies, guidelines and processes. The book evaluates film practitioners' and censors' opinion of, and experience in, dealing with those issues, and goes on to develop reform proposals for the film censorship system.

Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

Asia-Pacific Taylor & Francis
 Official art book of Seasons 1 and 2 of the anime series Pacific Rim: The Black, featuring concept art created during the development of the series. The Art of Pacific Rim: The Black retraces Taylor and Hayley's dramatic odyssey from the perspectives of the talented producers, directors, writers and animators who created this immensely popular series. They provide fascinating insight into

how the series came about, the development of the characters, the design of the Kaiju and Jaegers, and much more. This lush, coffee table hardback book is packed with stunning images from the series, including sketches, concept art and final renders. With an exclusive foreword from showrunner Greg Johnson and visuals covering Seasons 1 and 2, there has never been a better time to dive deeper into 'The Black'!

Four: The Pacific, Guadalcanal to Saipan, August 1942 to July 1944
 Rowman & Littlefield
 This book explores presidential justifications of every major American military conflict from the War of 1812 to the Second Gulf War. It generates two important findings. First, presidents employ a specific standard (the Necessity Standard) publicly to justify decisions to go to war, and privately to make decisions regarding war and peace. The Necessity Standard holds

that major military force should be used if no viable alternatives are available to protect vital interests or discharge duties. Second, when addressing the Necessity Standard, presidents have disclosed military and security policies that vary considerably in their patience with alternatives and their definitions of vital interests and duties. The book concludes by characterizing wars, categorizing presidential policies, and outlining how the central position of the Necessity Standard in the

American politics of war and peace might affect policymaking processes, conflict management, and the public's perceptions of wars and foreign policy. *Fodor's Walt Disney World and Universal Orlando with Kids 2006* World Scientific Inside this new edition is all the information you need to have the family vacation of a lifetime at the Orlando theme parks. Up-to-date and written with the help of more than 500 families, this guide is packed with details on all the attractions at Walt

Northwest Palala Press
This book focuses on the variety of strategies

developed by women athletes in the Pacific Islands to claim contested sporting spaces – in particular, rugby union, soccer, beach volleyball, recreational sports and exercise – as a prism to explore grassroots women’s engagement with heavily entrenched postcolonial (hetero)patriarchy. Based on primary research conducted in Fiji, Samoa, Solomon Islands, and Vanuatu, the book investigates contested sporting spaces as sites of infrapolitics intersected

primarily by gender and also by other markers of inequality, including ethnicity, sexuality, class and geopolitics. Contrary to historical and contemporary representations of Pacific Island women as victims of gender injustice, it explores how these athletes and those who support them actively carve out space for their transformative agency. Pacific Island Women and Contested Sporting Spaces: Staking Their Claim focuses on a region underexamined by sport

or gender studies researchers and will be of key interest to scholars and students in Gender Studies, Sport Studies, Sociology and Pacific Studies as well as sport practitioners and policymakers. *Condition Red* Random House Digital, Inc. The best way to enjoy California's spectacular coastline is to drive it! Packed with information about charming seaside communities and featuring all new photographs, this beautiful four-color guide takes you along the 1,100-mile stretch of Highway 1. Whether you're looking for a short, one-day jaunt or an extended tour of the

entire coastline, Scenic Routes & Byways Pacific Coast California shows you the best places in the area to eat, stay, shop, and play.

Pacific Rowman & Littlefield

Introduced in the Pacific Northwest in 1883, professional wrestling has a long and storied history in the region and has contributed significantly to Northwest culture. This entertaining account of the wrestling industry in Oregon, Washington, and British Columbia provides a detailed look at more

than 130 years of events in the ring and behind the scenes. The author draws connections between developments in wrestling and the changing identity of the Pacific Northwest.

The Last Real World Champion

Macmillan
Dr. David Lai provides a timely assessment of the geostrategic significance of Asia-Pacific. His monograph is also a thought-provoking analysis of the U.S. strategic shift toward the region and its implications. Dr. Lai judiciously offers the

following key points. First, Asia-Pacific, which covers China, Northeast Asia, and Southeast Asia, is a region with complex currents. On the one hand, there is an unabated region-wide drive for economic development that has been pushing Asia-Pacific forward for decades. On the other, this region is troubled with, aside from many other conflicts, unsettled maritime disputes that have the potential to trigger wars between and among Asia-Pacific nations. Second, on top of these mixed

currents, China and the United States compete intensely over a wide range of vital interests in this region. For better or for worse, the U.S.-China relationship is becoming a defining factor in the relations among the Asia-Pacific nations. Third, the U.S. strategic shift toward Asia-Pacific is, as President Obama puts it, not a choice but a necessity. Although conflicts elsewhere, especially the ones in the Middle East, continue to draw U.S. attention and consume U.S. foreign

policy resources, the United States is turning its focus toward China and Asia-Pacific. Fourth, in the mid-2000s, the United States and China made an unprecedented strategic goodwill exchange and agreed to blaze a new path out of the tragedy that often attends great power transition. Fifth, at this time of U.S. strategic reorientation and military rebalancing toward Asia-Pacific, the most dangerous consideration is that Asia-Pacific nations having disputes with China can misread U.S.

strategic intentions and overlay the “U.S. card” to pursue their territorial interests and challenge China. Finally, territorial dispute is becoming an urgent issue in the Asia-Pacific.

The Art of Pacific Rim: The Black Fodors Travel Publications

This chilling account of the “warm war” over control of the South China Sea—one that is threatening to flare into full-scale conflict—presents a “telling picture of the operational challenges the

US Navy faces in the western Pacific” (Wall Street Journal) from an award-winning journalist with unprecedented access to the highest naval officers in America and China. Out in the Pacific Ocean, there is a war taking place. It is a “warm war,” a shoving match between the United States, the uncontested ruler of the seas since WWII, and China, which now possesses the world’s largest navy. The Chinese regard the Pacific, and especially the South China

Sea, as their ocean, and they’re ready to defend it. Each day the heat between the two countries increases as the Chinese try to claim the South China Sea for their own, and the United States insists on asserting freedom of navigation. Throughout Southern Asia, countries are responding with outrage and growing fear as China turns coral reefs into manmade islands capable of supporting airstrips and then attempts to enforce twelve-mile-radius, shoot-down zones. The

immediate danger is that the five trillion dollars in international trade that passes through the area will grind to a standstill. The ultimate danger is that the US and China will be drawn into all-out war. Pulitzer Prize-nominated journalist Michael Fabey has had unprecedented access to the Navy's most exotic aircraft carriers, cruisers, destroyers, aircraft, and submarines, as well as those who command them. In his "well-informed, readable treatment" (Library Journal, starred review),

Fabey offers "good...reporting from both sides of the conflict. He gives his Chinese sources a thorough workout, the little emperors and true believers alike, and he has a sharp eye for what faces the American fleet if push comes to shove" (Kirkus Reviews). Fabey predicts the next great struggle between military superpowers will play out in the Pacific, and *Crashback*, more than any other book, is an accurate preview of how that conflict might unfold.

 Established in 1911, *The Rotarian* is the official magazine of Rotary International and is circulated worldwide. Each issue contains feature articles, columns, and departments about, or of interest to, Rotarians. Seventeen Nobel Prize winners and 19 Pulitzer Prize winners – from Mahatma Gandhi to

Kurt Vonnegut Jr. - have written for the magazine. **Pacific Lady** Fodors Travel Publications
 Though life on earth is the history of dynamic interactions between living things and their surroundings, certain powerful groups would have us believe that nature exists only for our convenience. One consequence of such thinking is the apparent fate of the Pacific salmon - a key resource and preeminent symbol of America's wildlife - which is today threatened with

extinction. Drawing on abundant data from natural science, Pacific coast culture, and a long association with key individuals on all sides of the issue, Joseph Cone employs a clear narrative voice to tell the human and natural history of an environmental crisis in its final chapter. As inevitable as the November rains, countless millions of wild salmon returned from the ocean to spawn in the streams of their birth. In the wake of an orgy of dam building and habitat

destruction, the salmon's majestic abundance has been reduced to a fleeting shadow. Neglect is the word the author uses to describe more recent losses, "by exactly the ones - state and federal fish managers - who should have acted". To signal a new awareness that action is needed, scientists charged with restocking the Columbia River Basin are receiving significant support, while ordinary citizens are beginning to recognize the relationship between cheap power and the

absences of chinook, coho, sockeye, and other species from the coasts of Oregon and Washington and from Idaho's Snake River. As desperate as the salmon's future appears, the book is not an elegy for a lost resource. Instead, it bears witness to hope. In addition to concrete plans for the wild salmon's renewal, the reader will hear a growing chorus of informed individuals of differing values and beliefs who recognize that our fate is inextricably bound to the salmon's; for many it is a

new understanding.

Evolving Identities of Pacific Peoples in Aotearoa/New Zealand
ECW Press

This volume is an attempt to capture the essence of the state-of-the-art of intelligent agent technology and to identify the new challenges and opportunities that it is or will be facing. The most important feature of the volume is that it emphasizes a multi-faceted, holistic view of this emerging technology, from its computational foundations — in terms of

models, methodologies, and tools for developing a variety of embodiments of agent-based systems — to its practical impact on tackling real-world problems.

Fodor's Walt Disney World with Kids

McFarland

Investigates alleged communist control of the publications and international information exchange programs of the Institute of Pacific Relations. Also investigates alleged communist attempts to influence U.S. Far East

policy. Includes discussion of Communist Party activities in Nazi Germany.
