graecarum in usum serenissimi delphini  
et serenissimorum principum ...* Renard  
Press Ltd

This volume examines the treatment and expression of love in medieval literature and art. These nineteen essays, contributed by recognized authorities on medieval romantic expression, consider a wide variety of texts from the following cultures: French, Arabic, Latin, Hispanic, Hebrew, Provençal, and German. Teachers and students of medieval literature will find in this well-researched book cogent, contemporary analyses of written expressions of love in the Middle Ages.  
*Illinois in 1818* Food & Agriculture Org.  
A number of countries in Europe and North America have been using fertilizers heavily for a number of years and particularly since 1945. This high level of fertilizer applications is essential to supply the necessary food for

increasing populations and to meet higher demands for animal and plant products. Effects of fertilizer use on the environment should show first in countries where fertilizers have been used intensively for some time and where consumption is steadily rising. It is the experience gained in such countries which is being discussed below with a view to assessing the impact of fertilizers on the human environment, including the development of methods for recognizing and minimizing any undesirable consequences which may be produced. It should be realized that high densities of human population combined with intensive crop and livestock production have led to the production of organic wastes at a rate too high for natural processes to convert

it in ecologically safe compounds. Therefore both direct and indirect effects of intensive fertilizer use have been reviewed.

"The failure to employ modern methods of lightening labor inside the house is a great hardship on many farms.

Thoughtfully planned, conveniently arranged, and carefully constructed buildings are as essential in the country as in the city. Plumbing is becoming a necessity, not only for comfort and convenience, but even more for health and cleanliness; and the proper disposal of the wastes of the household should not be neglected." -- p.3

Country Builder's Assistant Cambridge University Press

This book revolutionized 19th-century American architecture and changed forever the type of building that was done in our country.

Applewood Books

"Drawing upon new manuscript discoveries, the author shows how Burchard tried to create a new text that would address these problems. He carefully selected and compiled canons from earlier collections and then went on to tamper systematically with the texts he had chosen. By doing so, he created a book of church law that appeared to be based on indisputable authority, that was internally consistent and that was easy to apply through logical extrapolation to new cases. The present study thus provides a window into the development of legal and theological reasoning in the medieval West, and

suggests that, thanks to the work of ambitious bishops, the flowering of law and theology began far earlier, and for different reasons, than scholars have heretofore supposed."--BOOK JACKET.  
*Dictionnaire Des Devises Historiques Et Héraldiques: Dictionnaire des devises nobiliaires et historiques* Rowman & Littlefield

Bars Fight, a ballad telling the tale of an ambush by Native Americans on two families in 1746 in a Massachusetts meadow, is the oldest known work by an African-American author. Passed on orally until it was recorded in Josiah Gilbert Holland's History of Western Massachusetts in 1855, the ballad is a landmark in the history of literature that should be on every book lover's shelves.
