As the world's population continues to grow and economic conditions continue to improve, more solid and liquid waste is being generated by society. Improper disposal methods can not only lead to harmful environmental impacts but can also negatively affect human health. To prevent further harm to the world's ecosystems, there is a dire need for sustainable waste

management practices that will safeguard the environment for future generations. Waste Management: Concepts, Methodologies, Tools, and Applications is a vital reference source that examines the management of different types of wastes and provides relevant theoretical frameworks about new waste management technologies for the control of air, water, and soil pollution. Highlighting a range of topics such as contaminant removal, landfill treatment, and recycling, this multi-volume book is ideally designed for environmental engineers, waste authorities, solid waste management companies, landfill operators, legislators, environmentalists, policymakers,

government officials, academicians, researchers, and students.

From domestic to international settings, aid and assistance to less-developed areas has recently been bolstered by a boom in technological advances and new research. *Regional Development: Concepts, Methodologies, Tools, and Applications* presents a vital compendium of research detailing the latest case studies, architectures, frameworks, methodologies, and research on regional development. With over 100 chapters from authors from around the world, this three volume collection presents the most sophisticated research and developments from the field, relevant to researchers, academics, and practitioners alike. In order to stay abreast of the latest research, this book affords a vital look into regional development research.

**The Municipal Journal** Graphic Communications Group

This unique selection of personal correspondence at last fills an extraordinary gap in modern African history. A chronologically structured chronicle of the life and letters of Kwame Nkrumah during his years of exile in Guinea Conakry (1966-1971), compiled by June Milne.

Drawing on anthropology, historical sociology and social-epidemiology, this multidisciplinary book investigates how pharmaceuticals are produced, distributed, prescribed, (and) consumed, and regulated in order to construct a comprehensive understanding of the issues that drive (medicine) pharmaceutical markets in the Global South today. Based on primary research conducted in Benin and Ghana, and additional data collected in

Cambodia and the Ivory Coast, this volume uses artemisinin-based combination therapies (ACTs) against malaria as a central case study. It highlights the influence of the countries colonial and post-colonial history on their models for state regulation, production, and distribution, explores the determining role transnational actors as well as industries from the North but also and increasingly from the South play in influencing local pharmaceutical markets and looks at the behaviour of health care professionals and individuals. Stepping back, the authors then unpick the pharmaceuticalization process and the multiple regulations at stake by looking at the workings of, and linkages between, (biomedical health) pharmaceutical systems, (representatives of companies) industries, actors in private distribution, and consumer practices. Providing a thorough comparative analysis of the advantages and disadvantages of different pharmaceutical systems, it is an important contribution to the literature on pharmaceuticalization and the governance of medication. It is of interest to students, researchers and policy-makers interested in medical anthropology, the sociology of health and illness, global health, healthcare management and pharmacy.

In the next few years, it is expected that most businesses will have transitioned to the use of electronic commerce technologies, namely e-commerce. This acceleration in the acceptance of e-commerce not only changes the face of business and retail, but also has introduced new, adaptive business models. The experience of consumers in online shopping and the popularity of the digital marketplace have changed the way

businesses must meet the needs of consumers. To stay relevant, businesses must develop new techniques and strategies to remain competitive in a changing commercial atmosphere. The way in which e-commerce is being implemented, the business models that have been developed, and the applications including the benefits and challenges to e-commerce must be discussed to understand modern business. The Research Anthology on E-Commerce Adoption, Models, and Applications for Modern Business discusses the best practices, latest strategies, and newest methods for implementing and using e-commerce in modern businesses. This includes not only a view of how business models have changed and what business models have emerged, but also provides a focus on how consumers have changed in terms of their needs, their online behavior, and their use of e-commerce services. Topics including e-business, e-services, mobile commerce, usability models, website development, brand management and marketing, and online shopping will be explored in detail. This book is ideally intended for business managers, e-commerce managers, marketers, advertisers, brand managers, executives, IT consultants, practitioners, researchers, academicians, and students interested in how e-commerce is impacting modern business models.

First published in 1998. As the first of the newly independent nations of Africa, Ghana has received fulsome attention from scholars in many fields. In this intensive case study on educational development by two principal considerations. The documentary materials relating to the earlier history of the Gold Coast and adjacent areas were unusually extensive and well organized. Ghana now possesses the most elaborated school system in sub-Saharan Africa. But the expansion of this system has given rise to many perplexing problems and revealed many unexpected consequences, and the author suggests that similar experiences will be the lot of many other countries, even outside Africa. So this is not just study of Ghanaian education alone but a case study wherein some of the basic processes underlying educational growth in states newly emerging from colonial rule are delineated. This is Volume III of eighteen in a series on the Sociology of Development. Originally published in 1965. As the first of the newly independent nations of Africa, Ghana has received fulsome attention from scholars in many fields. In this intensive case study on educational development by two principal considerations. The documentary materials relating to the earlier history of the Gold Coast and adjacent areas were unusually extensive and well organized. Ghana now possesses the most elaborated school system in sub-Saharan Africa. The rapid development of information communication technologies (ICTs) is having a profound impact across numerous aspects of social, economic, and cultural activity worldwide, and keeping pace with the associated effects, implications, opportunities, and pitfalls has been challenging to researchers in diverse realms ranging from education to competitive intelligence.

**Kwame Nkrumah** IGI Global

Comprises a study of Ghana's first post-colonial prime minister and president Kwame Nkrumah (1909-1972), focusing on his use of religion in the development of national integration and modernization, among other political goals. The author offers a historical account of religion and politics in Ghana, draws on

social, political, and anthropological theories to evaluate Nkrumah's leadership from several different angles, and finally assesses Nkrumah's legacy. Annotation copyrighted by Book News, Inc., Portland, OR
