composition notebook,
makes a great gift!

Enlightenment

Underground Walter de
Gruyter GmbH & Co KG

This book at hand
explores emerging
scientific and
technological areas in
which Intelligent
Computing Systems
provide efficient solutions
and, thus, may play a role
in the years to come. It
demonstrates how
Intelligent Computing
Systems make use of
computational
methodologies that mimic
nature-inspired processes
to address real world
problems of high
complexity for which
exact mathematical
solutions, based on
physical and statistical
modelling, are intractable.
Common intelligent
computational
methodologies are
presented including

artificial neural networks,
evolutionary computation,
genetic algorithms,
artificial immune systems,
fuzzy logic, swarm
intelligence, artificial life,
virtual worlds and hybrid
methodologies based on
combinations of the
previous. The book will be
useful to researchers,
practitioners and
graduate students dealing
with mathematically-
intractable problems. It is
intended for both the
expert/researcher in the
field of Intelligent
Computing Systems, as
well as for the general
reader in the fields of
Artificial and
Computational
Intelligence who wishes to
learn more about the field
of Intelligent Computing
Systems and its
applications. An extensive
list of bibliographic
references at the end of
each chapter guides the
reader to probe further
into application area of
interest to him/her.

Coffin Break Springer
Harry G. Frankfurt begins
his inquiry by asking,
"What is it about human
beings that makes it
possible for us to take
ourselves seriously?"
Based on *The Tanner
Lectures in Moral
Philosophy, Taking
Ourselves Seriously and
Getting It Right* delves

into this provocative and
original question. The
author maintains that
taking ourselves seriously
presupposes an inward-
directed, reflexive
oversight that enables us
to focus our attention
directly upon ourselves,
and "[it] means that we
are not prepared to
accept ourselves just as
we come. We want our
thoughts, our feelings, our
choices, and our behavior
to make sense. We are
not satisfied to think that
our ideas are formed
haphazardly, or that our
actions are driven by
transient and opaque
impulses or by mindless
decisions. We need to
direct ourselves—or at
any rate to believe that
we are directing
ourselves—in thoughtful
conformity to stable and
appropriate norms. We
want to get things right."
The essays delineate two
features that have a
critical role to play in this:
our rationality, and our
ability to love. Frankfurt
incisively explores the
roles of reason and of love
in our active lives, and
considers the relation
between these two
motivating forces of our
actions. The argument is
that the authority of
practical reason is less
fundamental than the
authority of love. Love, as

the author defines it, is a volitional matter, that is, it consists in what we are actually committed to caring about. Frankfurt adds that "The object of love can be almost anything—a life, a quality of experience, a person, a group, a moral ideal, a nonmoral ideal, a tradition, whatever." However, these objects and ideals are difficult to comprehend and often in conflict with each other. Moral principles play an important supporting role in this process as they help us develop and elucidate a vision that inspires our love. The first section of the book consists of the two lectures, which are entitled "Taking Ourselves Seriously" and "Getting It Right." The second section consists of comments in response by Christine M. Korsgaard, Michael E. Bratman, and Meir Dan-Cohen. The book includes a preface by Debra Satz.

This funny Celebrate Excellent pun 74th Birthday Gift Journal / Diary / Notebook is an IDEAL gift idea! It is 6 x 9 inches in size with 110 blank lined pages with a Floral theme for writing

down thoughts, notes, ideas, or even sketching. Perspective! Mohr Siebeck
In the Typic chapter of the Critique of Practical Reason, Kant aims to enable moral judgment by means of the law of nature, which serves as the 'type', or formal analogue, of moral law. The present monograph is the first comprehensive study of this key text. It provides a detailed commentary on the Typic, situates it within Kant's ethics and his theory of symbolic representation, and critically engages with the relevant secondary literature. Pitman Shorthand Paper Springer
The essays in this volume, structured like a small dictionary, investigate some themes philosophically relevant to the public sphere, such as: common sense, death, individuation, liberty, public/private, responsibility, secularization, social justice, and work. They explore some philosophical lines of thought, some paths, within that sphere, which inevitably cross one another, from one essay to the next. Their aim is to show the relevance of philosophical reflection on the public sphere - the

place in which philosophy ultimately finds its historical a priori and its very reason for being. (Series: Philosophy: Research and Science / Philosophie: Forschung und Wissenschaft - Vol. 44) [Subject: Philosophy] *Regularization Methods for Item Response and Paired Comparison Models* Springer
Historically speaking, the majority of efforts in the study of ancient Greek physics have traditionally been devoted either to the analysis of the surviving evidence concerning Presocratic philosophers or to the systematic examination of the Platonic and the Aristotelian oeuvre. The aim of this volume is to discuss the notion of space by focusing on the most representative exponents of the Hellenistic schools and to explore the role played by spatial concepts in both coeval and later authors who, without specifically thematising these concepts, made use of them in a theoretically original way. To this purpose, renowned scholars investigate the philosophical and historical significance of the different conceptions of space endorsed by various thinkers ranging

from the end of the Classical period to the middle Imperial age. Thus, the volume brings to light the problematical character of the ancient reflection on this topic.

Academic Showcases

Springer

This volume is the first collection of articles dedicated to Ludwig Wittgenstein's thoughts on colour, focusing in particular on his so-called *Remarks on Colour*, a piece of writing that has received comparably little attention from Wittgenstein scholars. The book provides the reader with the state of the art in research on Wittgenstein's thoughts on colour and brings out some of the intricate relations between the *Remarks on Colour* and other works by Wittgenstein. The articles in the book discuss why Wittgenstein wrote so intensively about colour during the last years of his life, what significance these remarks have for understanding his philosophical work in general, as well as the upshot of his thoughts on colour. Contributors to the volume are Andrew Lugg, Joachim Schulte, Gabriele Mras, Richard Heinrich, Herbert Hrachovec, Barry Stroud, Martin Kusch,

Frederik Gierlinger and Gary Kemp.

Pitman Shorthand Paper

(UK) Book There are a

number of different

shorthand systems (also

known as stenography or

steno) Pitman is popular

in the UK while Gregg is

the most common in the

US Shorthand systems are

a way of writing using

squiggles and

abbreviations for speed

and they may be based

on spelling or phonetics A

trained shorthand writer is

able to write as fast as

people can speak which makes it ideal for taking dictation Shorthand is still sometimes used by secretaries and secretarial schools but also by closed captioners, by court reporters and by journalists and news reporters It may also have military and law enforcement use or be used by anyone else who has to take notes fast 'Stenopads' or Steno paper is ruled down the center of the page to help the writer work quickly Instead of using the full length of the book, write in the first column to the middle line which saves time on hand traveling across the whole line before using the second column Page Count: 100 Dimensions: 7.50" x 9.25" (19.05cm x 23.50cm)

Not All Magic Wands Are Pointy Sticks

O Books

The book consists of a series of chapters on Carnap's ideal of explication as an alternative to the naturalistic conceptions of science, setting it in its historical context, discussing specific cases of explications, and enriching the on-going debate on conceptual engineering and naturalism in analytic philosophy.

Wellhausen and

Kaufmann John Wiley & Sons

Der Sammelband enthält zwischen den Jahren 2003 und 2015 entstandene Aufsätze von Matthias Konradt zu Fragen der historischen Situierung des Matthäusevangeliums und der matthaischen Theologie. Die Aufsätze sind in drei Rubriken gegliedert. Im ersten Teil "Matthaus im Kontext" wird sowohl das Verhältnis der matthaischen Gemeinde(n) zum Judentum als auch der theologiegeschichtliche Standort des Matthäusevangeliums innerhalb des entstehenden Christentums erörtert. Die Aufsätze in der zweiten Rubrik kreisen um die Themen Christologie und Israeltheologie, während der dritte Teil - neben einer Studie zur Rede vom Glauben - Arbeiten zu grundlegenden Aspekten matthaischer Ethik versammelt. Neben bereits veröffentlichten Aufsätzen, die für diesen Sammelband durchgesehen, aktualisiert und zum Teil erheblich überarbeitet wurden, bietet der Band auch Studien, die hier zum ersten Mal erscheinen.

Selected Exaggerations

Walter de Gruyter GmbH & Co KG

While there have been various studies examining the contents of the evangelistic proclamation in Acts; and various studies examining, from one angle or another, individual persuasive phenomena described in Acts (e.g., the use of the Jewish Scriptures); no individual studies have sought to identify the key persuasive phenomena presented by Luke in this book, or to analyse their impact upon the book's early audiences. This study identifies four key phenomena - the Jewish Scriptures, witnessed supernatural events, the Christian community and Greco-Roman cultural interaction. By employing a textual analysis of Acts that takes into account both narrative and socio-historical contexts, the impact of these phenomena upon the early audiences of Acts - that is, those people who heard or read the narrative in the first decades after its completion - is determined. The investigation offers some unique and nuanced insights into evangelistic proclamation in Acts; persuasion in Acts,

persuasion in the ancient world; each of the persuasive phenomena discussed; evangelistic mission in the early Christian church; and the growth of the early Christian church. *Sudoku Hyper Pocket Edition* Cuvillier Verlag
A main aspect in psychometric modeling is the measurement of latent traits. This dissertation focuses on two popular methods to analyze latent traits, namely item response methods and paired comparisons. In conventional models for item response (e.g. the Rasch model) or paired comparison data (e.g. the Bradley-Terry model) no covariate information is used. This thesis is concerned with the inclusion of different types of covariates into item response and paired comparison models. The increased flexibility of the proposed models also leads to a higher complexity of the models. Regularization methods prove to be an effective instrument to deal with the increased number of parameters and to differentiate between necessary and unnecessary parameters. The proposed methods are illustrated in various

simulations and real data applications. Ein Hauptaspekt der psychometrischen Modellierung liegt in der Messung latenter Eigenschaften. Diese Arbeit beschäftigt sich hauptsächlich mit zwei weit verbreiteten Methoden um latente Eigenschaften zu analysieren, nämlich Item Response Daten und Paarvergleiche. In gebräuchlichen Modellen für Item Response Daten (z.B. dem Rasch Modell) oder Paarvergleichsdaten (z.B. dem Bradley-Terry Modell) wird keine Information aus Kovariablen berücksichtigt. Diese Arbeit behandelt die Einbeziehung verschiedener Arten von Kovariablen in Item Response Modellen und Paarvergleichsmodellen. Die größere Flexibilität der vorgeschlagenen Methoden führt aber auch zu einer größeren Komplexität der Modelle. Regularisierungsmethoden erweisen sich als probates Instrument um mit der größeren Anzahl an Parametern umzugehen und um zwischen notwendigen und unnötigen Parametern zu unterscheiden. Die vorgeschlagenen

Methoden werden anhand von verschiedenen Simulationen und Anwendungen auf echte Daten veranschaulicht. Vanessa Let Your Smile Change the World, But Don't Let the World Change Your Smile. Palgrave Macmillan Peter Sloterdijk's reputation as one of the most original thinkers of our time has grown steadily since the early 1980s. This volume of over thirty conversations and interviews spanning two decades illuminates the multiple interconnections of his life and work. In these wide-ranging dialogues Sloterdijk gives his views on a variety of topics, from doping to doxa, design to dogma, media to mobility and the financial crisis to football. Here we encounter Sloterdijk from every angle: as he expounds his ideas on the philosophical tradition and the latest strands of contemporary thought, as he analyses the problems of our age and as he provides a new and startling perspective on everyday events. Through exaggeration, Sloterdijk draws our attention to crucial issues and controversies and makes us aware of their implications for society

and the individual. Always eager to share his knowledge and erudition, he reveals himself equally at home in ancient Babylon, in the channels of the mass media and on the ethical and moral terrain of religion, education or genetic engineering. Appealing both to the seasoned reader of Sloterdijk and to the curious newcomer, these dialogues offer fresh insight into the intellectual and political events of recent decades. They also give us glimpses of Sloterdijk's own life story, from his early passionate love of reading and writing to his journeys in East and West, his commitment to Europe and his acceptance and enjoyment of the role of a public intellectual and philosopher in the twenty-first century. The Hegelian Return to the Barbarism of Reflection in the Light of the Vichian Imagination of Power Harper Collins The imposing scope and penetrating insights of German philosopher Nicolai Hartmann's work have received renewed interest in recent years. The papers collected in this volume explore his ethics, ontology, aesthetics, and philosophy of nature,

bringing his philosophy into conversation with that of his peers, the history of philosophy, and with contemporary philosophical trends, from philosophy of science and bioethics, to psychology and education.

Philosophy in the Present

Answers to Your Biggest Questions About Creating a Dynamic Classroom
University of Virginia Press

The controversy between Wellhausen and Kaufmann concerning the history of ancient Israel and the question of historical reconstruction has prompted this study. While Wellhausen's hypothesis introduces a synthesis of the religious development of ancient Israel, Kaufmann's work emphasizes the singularity of the Israelite religion. Their respective works, which represent the methodologies, presuppositions and the

ideologies of their times, remain an impetus to further inquiry into the history of ancient Israel and its religion. Both Wellhausen and Kaufmann applied the historical-critical method, but were divided as to its results. They agree that the Old Testament/Hebrew Bible is the primary source on which to base writing about the history of ancient Israel, but differ concerning the authority of its text. This book illustrates the real clash between Wellhausen and Kaufmann, with the aim of providing some basis for reaching a middle ground between these two poles. As becomes clear in this study, Wellhausen reconstructed the religion of Israel in the framework of its history. Kaufmann, by contrast, proposed that monotheism emerged in Israel as a new creation of the spirit of Israel.

My Diary Verso Books
"This book will serve as the non-content area, general teaching methods book in the Five To Thrive series, which launches in the Fall of 2021 with *Answers To Your Biggest Questions About Teaching Elementary Mathematics*. It will follow the same general format: a presentation of 5 critical

areas of general practice, with 10-15 questions answered in each section. Each question/answer will be featured on a 2-page spread. The five topic areas include: building an affirming classroom community; keeping students at the center; designing effective, fun, and engaging learning for students; making assessments work for you and your students; and "shh! uncovering the answers to what we often don't talk about," which includes work/life balance, asking for support from administrators, navigating difficult parent conversations"--
Wittgenstein on Colour
Walter de Gruyter GmbH & Co KG
What if you could see a loved one who has died, not in a future spiritual realm, but here and now, in this lifetime? It is possible, says Carol Bowman, author of *Children's Past Lives* and a pioneer in reincarnation studies. Based on in-depth research and direct observation of very young children, she shows in this groundbreaking book how common it is for beloved relatives to reincarnate into the same family. Typical families share how their children -- some as young as two and still in

diapers -- speak spontaneously of intimate details from the lives of a family member they never knew. These true stories shed new light on age-old

questions of family relationships: Do we choose our parents? What relationships survive death? What happens to

the soul after a miscarriage or abortion? Bowman offers hope for anyone who has lost a beloved relative and longs to be reunited again.
