Persuading Shipwrecked Men BoD – Books on Demand

This book undertakes a fundamental assessment of Menander of Laodicea ('Menander Rhetor'), and of the nature and functions of rhetoric in later antiquity (second to fifth centuries AD). It examines Menander's fragments, collected here for the first time, in detail, showing that he was primarily an expert on judicial and deliberative oratory; a source-critical analysis of the Demosthenes scholia shows that his influential commentary on Demosthenes can be partially reconstructed. It explores the educational practices of the rhetorical schools, and shows that the skills which they taught still had a direct application in the subsequent careers of the rhetoricians' pupils.

The large collection of letters by Pliny the Younger includes a number of women among its addressees, and Pliny also gives us plentiful information about many women of his acquaintance. This book brings together this material to build up a portrait of a peer-group of women in their social setting.

Following France's military defeat in 1940, Marshal Pétain and his Vichy regime drastically expanded upon the role of a top secret organization known as the Postal Surveillance System. The organization served two purposes: to find out how people felt about Vichy's policies, including collaboration with Nazi Germany, and to keep an eye on activities the new government deemed suspicious. Over seventy years later the private letters, telegrams, and phone conversations collected through the Postal Surveillance System provide a wealth of information about the dark years of 1940-1944. *Every Word You Write . . . Vichy Will Be Watching You* draws from these communications to vividly convey what life was like for the French as they coped with intolerable living conditions. It also details the scurrilous treatment handed out to foreign and French-born Jews by Pétain's government. By allowing the stolen words of ordinary French citizens to speak for themselves, Robert W. Parson offers us a view of history that we seldom find in textbooks.

"In this work, Lyn M. Kidson moves away from the traditional interpretation of 1 Timothy as a church manual and argues that the coordinating purpose of the letter is to command 'certain men (and women)' not to teach an educational program that is being promoted by factional leaders Hymenaeus and Alexander."--

From Artisan to Worker examines the largely overlooked debate over the potential reestablishment of guilds that occurred from 1776 to 1821. The abolition of guilds in 1791 overturned an organization of labor that had been in place for centuries. The disorder that ensued - from concerns about the safety of the food supply to a general decline in the quality of goods - raised strong doubts about their abolition and sparked a debate both inside and outside of government that went on for decades. The issue of the reestablishment of guilds, however, subsequently became intertwined with the growing mechanization of production. Under the Napoleonic regime, the government considered several projects to restore guilds in a large-scale fashion, but the counterargument that guilds could impede mechanization prevailed. After Bonaparte's fall, the restored Bourbon dynasty was expected to reorganize guilds, but its sponsorship of an industrial exhibition in 1819 signaled its endorsement of mechanization, and after 1821 there were no further efforts to restore guilds during the Restoration.

Symmachus was a brilliant orator, writer, and statesman, often flatly labeled as one of the last pagan senators. Cristiana Sogno offers a reconstruction of the political career of Symmachus through close analysis of his extensive writings, while also proposing a critical reevaluation of his historical importance. In contrast to traditional interpretation, Sogno's study demonstrates that Symmachus was primarily an influential politician, rather than a mere pagan zealot. By portraying the individual experience of Symmachus, the book sets forth a new approach for interpreting the political aspirations, mentality, and attitudes of Roman senators. The much-studied question of the Christianization of the Western aristocracy has created the illusion of a Christian and a pagan aristocracy rigidly separated from each other. Through her study of Symmachus, Sogno demonstrates the primary importance of politics over religion in the public activity of the late Roman aristocracy. Although the book is specifically addressed to scholars and students of Late Antiquity, it will also be of interest to classicists, ancient historians, and non-specialists who wish to know more about this pivotal period in Roman history. Cristiana Sogno received her Ph.D. in Classics and History from Yale University. Currently she is Townsend Assistant Professor of Classics at Cornell University. P. S. Barnwell examines the development of imperial and royal government in the western part of the Roman Empire and in the early "barbarian" kingdoms that were established within its frontiers - the Visigothic, Burgundian, Frankish, and Vandal nations. Covering the fifth century - the period from the death of the Emperor Theodosius to the death of the Emperor Justinian - Barnwell's book demonstrates the extent to which barbarian government was influenced by its Roman predecessor. Earlier studies have argued implicitly that the fifth century witnessed the disintegration of an ordered Roman governmental system and its replacement by a series of disorganized "Germanic" administrations. Barnwell, by contrast, examines Roman government of the fifth-century western Empire on its own terms, and then analyzes the administrations of individual Barbarian kingdoms in relation to this fifth-century Roman background. He shows that the law and government of the Barbarian kingdoms were more deeply indebted to Roman institutions than most previous historians have realized.

Social housing appears to offer a solution for the housing of poor and disadvantaged people. The French "right to housing" offers poor and disadvantaged citizens priority in social housing allocation, and even a legal action against the State to obtain a social home. Despite this, France is suffering a long-lasting housing crisis with disadvantaged people having particular difficulties of access, often

despite the efforts of local housing actors. This situation is affected by the European Court of Human Rights and EU decisions limiting diverse national housing and rental policies. Between historic French revolutions and the modern riots, negotiated solutions to social dilemmas emerged. Despite progress in constitutional principles, complex local negotiations still ultimately determine who is housed. Local social landlords, mayors and employee and tenant representatives use their privileges to house their insiders: existing tenants, locals and employees, with rent insufficiently subsidized. 'Insider Outsider' theory is used for an economic analysis of exclusion in social housing allocation: its processes, institutional context, and stigmatizing effects. This highlights the spatial effects of nimbysm, excluding disadvantaged outsiders, and concentrating them in deprived areas. Simultaneously, urban regeneration reduced affordable housing stock and 'social mix' became a reason to refuse a social home. History, comparative law, economic theory and local interviews with housing actors give a detailed picture of what happens in and around French social housing allocation for an interdisciplinary housing policy audience. Constitutional principles appear in an unfamiliar guise as negotiating positions, with the "right to property" supporting landlords and the "right to housing" supporting tenants. French debates about the function of social landlords are echoed across Europe and reflected in European policies concerning rights, and the exclusion of disadvantaged minorities.

Pope John XXIII prayed that the Second Vatican Council would prove to be a new Pentecost. The articles gathered here appeared originally in a series solicited by and published in *Theological Studies* (September 2012 to March 2014). The purpose of the series was and remains threefold: • To commemorate the 50th anniversary of the Second Vatican Council • To help readers more fully appreciate its significance not only for the Catholic Church itself but also for the entire world whom the Church encounters in proclamation and reception of ongoing revelation • In their present form, to help readers worldwide engage both the conciliar documents themselves and scholarly reflections on them, all with a view to appropriating the reform envisioned by Pope John XXIII. Sport and physical culture in Occupied France examines the Vichy state's attempts to promote physical education and sports in order to rejuvenate French men and women during the Occupation. Through this cultural lens, it illuminates the central paradox of state power during the Vichy Regime. The state organised a centralised physical cultural programme meant to control and discipline French men and women. However, these activities instead empowered individuals and sporting associations to create spaces for individual expression, protect entrenched business enterprises, preserve republican institutions and organise sites for mutual aid and assistance. Based on extensive archival research, this innovative, multi-city analysis demonstrates how French sporting federations, associations and athletes appropriated Vichy's physical education directives to reshape the ideology of the state and serve their own local agendas.

From 1889 to 1914 nude spectacles increased at an astonishing rate as a result of burgeoning artistic experimentation, the commercialization of the female body, and the rise of urban nightlife. In particular, artists' balls and music halls provided creative spaces in which women, artists, impresarios, and the illustrated press could cast the natural body as a source of sexual pleasure, identity, and reform. Emphasizing the role of erotic entertainment as an outlet and agent of modern sensibilities, *Uncovering Paris: Scandals and Nude Spectacles in the Belle Époque* offers a fresh approach to important topics of the period—Bohemian artists, the New Woman, and press censorship—and reinterprets them through the lens of la femme nue. Having inherited her name from the pictorial female Nude and the Nude's real-life counterpart, the artist's model, la femme nue operated as a screen onto which various groups projected their artistic drives, sexual desires, monetary interests, and cultural anxieties. A struggle to define pornography and art, freedom and censorship, and public and private spheres ensued among artists, theater directors, and moral leagues as a century-long tradition of equating civilization with clothing broke down in the face of performative challenges. In posing, singing, acting, and dancing in naturalist presentations, the artist's model-turned-erotic entertainer engendered crises in ways of seeing the female body that contributed to and was indicative of a changing moral climate within which women were accorded more freedom to corporeally express themselves. Once denigrated and denounced as a sign of vulgar working-class sexuality, the revelation of female flesh became an integral aspect of twentieth-century French body culture. Drawing upon a range of colorful commentaries, dramatic debates, and evocative photos, Lela F. Kerley highlights the importance of nudity in the redrawing of moral boundaries as she uncovers key moments that amounted to a "culture war" in the years leading up to World War I. Through an investigation of street riots, court cases, and anti-pornography campaigns, *Uncovering Paris* offers an interdisciplinary approach to the scholarship on Belle Époque sexual politics and a rich glimpse into the social construction of morality in Belle Époque France.
