RODERICK DYER

Recueil Des Cours, Collected Courses 1939 OUP Oxford

Examining general principles of law provides one of the most instructive examples of the intersection between EU law and comparative law. This collection draws on the expertise of high-profile and distinguished scholars to provide a critical examination of this interaction. It shows how general principles of EU law need to be responsive to national laws. In addition, it is clear that the laws of the Member States have no choice but to be responsive to the general principles which are developed through EU law. Viewed through the perspective of proportionality, legal certainty, and fundamental rights, the dynamic relationship between the ingenuity of the Court of Justice, the legislative process and the process of Treaty revision is comprehensively illustrated.

Principes de droit civil français Martinus Nijhoff Publishers

Fifty years on from its original publication, HLA Hart's *The Concept of Law* is widely recognized as the most important work of legal philosophy published in the twentieth century, and remains the starting point for most students coming to the subject for the first time. In this third edition, Leslie Green provides a new introduction that sets the book in the context of subsequent developments in social and political philosophy, clarifying misunderstandings of Hart's project and highlighting central tensions and problems in the work.

Traité des principes généraux du droit et de la législation Bloomsbury Publishing

The Academy is an institution for the study and teaching of public and private international law and related subjects. Jubilee Book Martinus Nijhoff Publishers

The book provides an overview of how international law is today constructed through diverse macro and microprocesses that expand its traditional subjects and sources, with the attribution of sovereign capacity and power to the international plane (moving the international toward the national). Simultaneously, national laws approximate laws of other nations (moving among nations or moving the national toward the international) and new sources of legal norms emerge, independent of states and international organisations. This expansion occurs in many subject areas, with specific structures: commercial, environmental, human rights, humanitarian, financial, criminal and labor law contribute to the formation of post national law with different modes of functioning, different actors and different sources of law that should be understood as a new complexity of law.

100 principes juridiques Martinus Nijhoff Publishers

Netherlands. Volume commemorating the 50th anniversary of the Hague Academy of International Law and its historical evolution as an educational institution - covers research activities, enrolment patterns, administrative aspects, the organization of training courses, etc. References and statistical tables. *Festschrift Hague Academy of International Law (1923-1973)*.

Principes du droit des gens Martinus Nijhoff Publishers

This volume offers a critical analysis and illustration of the challenges and promises of 'stateless' law

thought, pedagogy and approaches to governance - that is, understanding and conceptualizing law in a post-national condition. From common, civil and international law perspectives, the collection focuses on the definition and role of law as an academic discipline, and hybridity in the practice and production of law. With contributions by a diverse and international group of scholars, the collection includes fourteen chapters written in English and three in French. Confronting the 'transnational challenge' posed to the traditional theoretical and institutional structures that underlie the teaching and study of law in the university, the seventeen authors of *Stateless Law: Evolving Boundaries of a Discipline* bring new insight to the ongoing and crucial conversation about the future shape of legal scholarship, education and practice that is emblematic of the early twenty-first century. This collection is essential reading for academics, institutions and others involved in determining the future roles, responsibilities and education of jurists, as well as for academics interested in Law, Sociology, Political Science and Education.

Hague yearbook of international law Martinus Nijhoff Publishers

The International Court of Justice (in French, the *Cour internationale de justice*), also commonly known as the World Court or ICJ, is the oldest, most important and most famous judicial arm of the United Nations. Established by the United Nations Charter in 1945 and based in the Peace Palace in the Hague, the primary function of the Court is to adjudicate in disputes brought before it by states, and to provide authoritative, influential advisory opinions on matters referred to it by various international organisations, agencies and the UN General Assembly. This new work, by a leading academic authority on international law who also appears as an advocate before the Court, examines the Statute of the Court, its procedures, conventions and practices, in a way that will provide invaluable assistance to all international lawyers. The book covers matters such as: the composition of the Court and elections, the office and role of ad hoc judges, the significance of the occasional use of smaller Chambers, jurisdiction, the law applied, preliminary objections, the range of contentious disputes which may be submitted to the Court, the status of advisory opinions, relationship to the Security Council, applications to intervene, the status of judgments and remedies. Referring to a wealth of primary and secondary sources, this work provides international lawyers with a readable, comprehensive and authoritative work of reference which will greatly enhance understanding and knowledge of the ICJ. The book has been translated and lightly updated from the French original, R Kolb, *La Cour internationale de Justice* (Paris, Pedone, 2013), by Alan Perry, Solicitor of the Senior Courts of England and Wales. Winner of the 2014 American Society of International Law Certificate of Merit for High Technical Craftsmanship and Utility to Practicing Lawyers and Scholars: 'Robert Kolb's International Court of Justice provides a magisterial, lucid study of its

subject. The breadth and depth of the treatment are impressive: Kolb takes the reader from the history of the Court, to its role in international society, to the more technical questions concerning its composition, powers and procedures, to the development of its jurisprudence, and to its future. The finely grained discussion provides much more than a mere survey of the Court's constitutive instruments and decisions. It engages the Court as an institution and asks how it actually operates, and secures efficacy and authority in doing so. The book's careful and detailed coverage of the Court's legal framework and operation will benefit practitioners and scholars alike. There is no doubt that Kolb's volume immediately takes a place among the authoritative references on the Court.' ASIL Book Awards Committee This title is included in Bloomsbury Professional's International Arbitration online service.
