[Italiano]: Le Università, in quanto enti di formazione e di ricerca, sono tenute a

mettere in atto azioni e politiche volte a garantire la parità di genere e a rimuovere gli ostacoli che impediscono la piena realizzazione personale e professionale di uomini e donne. A tale scopo il Bilancio di Genere è lo strumento d'elezione per

perseguire gli obiettivi di parità. Ma più che di un documento, si tratta di un vero e proprio articolato processo che richiede un significativo coinvolgimento della governance di Ateneo, attraverso un percorso di istituzionalizzazione

dell'approccio alle questioni di genere. Il volume presenta gli esiti del secondo bilancio di genere della Federico II di Napoli, redatto secondo le Linee Guida elaborate dalla Conferenza dei Rettori delle Università Italiane. Oltre all'analisi di contesto, che consente di evidenziare i punti di forza e gli elementi di criticità dell'Ateneo federiciano rispetto alla parità di genere, il documento illustra il livello di integrazione della prospettiva di genere nei documenti strategici di

Ateneo, la rete di organismi preposti alle tematiche di genere e il repertorio delle azioni messe in atto nel quinquennio precedente. L'analisi di genere degli impegni economico-finanziari, realizzata a partire dalla riclassificazione del bilancio, ha consentito inoltre di esplorare nel dettaglio le risorse espressamente destinate agli obiettivi di parità, identificando gli ambiti in cui è necessario investire maggiormente. Il documento include inoltre

una prima analisi in ottica di genere dei questionari di rilevazione delle opinioni degli studenti e delle studentesse, che può essere adoperata come utile strumento per fornire spunti per la definizione di azioni positive destinate alla popolazione studentesca. Il quadro che emerge dall'analisi proposta è quello di un Ateneo che ha intrapreso un serio percorso di istituzionalizzazione dell'intero ciclo del Bilancio di Genere, attestato dall'impegno

nella promozione di processi culturali ed organizzativi inclusivi volti a perseguire concretamente gli obiettivi di uguaglianza e di parità nella formazione, nella ricerca e nel lavoro./[English]: Universities, as training and research institutions, are required to implement actions and policies aimed at ensuring gender equality and at removing obstacles that prevent the full personal and professional fulfilment of men and women. To this end, the Gender

Responsive Budgeting is the fundamental tool to pursue the objectives of equality. But more than a document, it is an articulated process that requires a significant involvement of the governance of the University, through a path of institutionalization of the approach to the gender issues. The volume presents the results of the second gender report of the University Federico II of Naples, drawn up according to the Conference of Rectors of

Italian Universities Guidelines. In addition to the context analysis, which allows to highlight strengths and critical issues of the University with respect to gender equality, the document illustrates the level of integration of the gender perspective in the University's strategic documents, the network of bodies responsible for gender issues and the repertoire of actions implemented in the previous five years. The gender analysis of economic and financial

commitments, carried out through the reclassification of the budget, has also made it possible to explore in detail the resources expressly allocated to the equality objectives, identifying the areas in which greatest investments are needed. The document also includes a preliminary gender analysis of student opinion questionnaires, which can be used as a useful tool to provide insights into the definition of positive actions for the student population. The

picture that emerges from the proposed analysis is of a University that has embarked on a serious path of institutionalization of the gender budget process, attested by the commitment to promote inclusive cultural and organizational processes aimed at concretely pursuing equality objectives in training, research and work.

With more than 2,080 vibrant, full-color clinical photographs, this book presents the Italian

Academy of Conservative Dentistry's authoritative coverage of endodontics, cosmetics, prosthodontics, traumatology, and general operative principles with unparalleled visual detail. This atlas-style resource guides you step-by-step through essential procedures and presents realistic case scenarios to help you deepen your understanding of restorative principles and successfully apply your knowledge to patient treatment. More than

2,200 world-class photographs provide rich clinical detail to enhance your understanding of commonly encountered conditions. Step-by-step procedures in each chapter are integrated with interesting case studies to clarify techniques and help you confidently apply concepts in the clinical setting. Summary boxes provide fast access to key chapter content. Clinical approach reflects the trusted expertise of the Accademia Italiana di Conservativa (Italian

Academy of Conservative Dentistry) and familiarizes you with the latest scientific research and treatment techniques. Discover the latest edition of the cornerstone reference on periodontology and implant dentistry that combines scholarship and science with practical clinical instruction The Seventh Edition of Lindhe's Clinical Periodontology and Implant Dentistry brings together a distinguished team of periodontal

specialists and academics who deliver another must-have resource for students, researchers, and practitioners specializing in periodontal care and implant dentistry. Seamlessly integrating the foundational science behind periodontology with practical clinical protocols in two comprehensive volumes, the chapters cover anatomy, microbiology, occlusion trauma, pathology, tissue regeneration, treatment planning protocols,

infection control, reconstructive therapy, occlusal and prosthetic therapy, and more. The Seventh Edition of Lindhe's Clinical Periodontology and Implant Dentistry: Provides an introduction to anatomy, including periodontal tissues, the edentulous ridge, the mucosa at teeth and implants, and osseointegration Discusses the epidemiology of periodontal and peri-implant diseases Explores the microbiology,

including dental biofilms and calculus, periodontal infections, peri-implant infections, the pathogenesis of gingivitis and periodontitis, and the genetic susceptibility to periodontal disease  
Includes the latest peri- and peri-implant disease classifications  
Contains updated evidence-based preventive and treatment modalities for the treatment of periodontal and peri-implant diseases  
Features the latest evidence-based therapeutic alternatives on the use of dental

implants to rehabilitate the lost dentition  
Perfect for postgraduate dental students, researchers, and practitioners specializing in periodontal care and implant dentistry, Lindhe's Clinical Periodontology and Implant Dentistry continues to be the cornerstone reference work on periodontology.

Music therapy is recognised as being applicable to a wide range of healthcare and social contexts. Since the first

edition of *Music Therapy: An art beyond words*, it has extended into areas of general medicine, mainstream education and community practice. This new edition revises the historical and theoretical perspectives and recognises the growing evidence and research base in contemporary music therapy. Leslie Bunt and Brynjulf Stige document the historical evolution of music therapy and place the practice within seven current perspectives: medical, behavioural,

psychoanalytical, humanistic, transpersonal, culture-centred and music-centred. No single perspective, individual or group approach is privileged, although the focus on the use of sounds and music within therapeutic relationships remains central. Four chapters relate to areas of contemporary practice across different stages of the lifespan: child health, adolescent health, adult health and older adult health. All include case narratives and detailed examples underpinned by

selected theoretical and research perspectives. The final two chapters of the book reflect on the evolution of the profession as a community resource and the emergence of music therapy as an academic discipline in its own right. A concise introduction to the current practice of music therapy around the world, *Music Therapy: An art beyond words* is an invaluable resource for professionals in music therapy and music education, those working in the psychological

therapies, social work and other caring professions, and students at all levels.

[It] Il volume è un contributo originale al dibattito sugli interventi a favore della parità di genere nell'Università e nella ricerca. Presenta i risultati della ricerca-azione condotta, insieme alla sperimentazione del programma pilota di mentoring, nell'ambito del progetto europeo GENOVATE@UNINA. Ponendosi in interlocuzione con le

ricerche europee più recenti - sviluppate entro la cornice culturale e il quadro di riferimento degli interventi per il cambiamento strutturale, promossi attraverso il Settimo Programma Quadro e Horizon assume, come quadro di riferimento interpretativo, i processi di cambiamento globale che investono la regolazione del sistema scientifico-accademico. La trattazione si sviluppa seguendo un percorso lineare, che dal dibattito sulle politiche per la parità di genere conduce al

disegno dello schema pilota di mentoring (il primo esclusivamente al femminile, nell'università italiana) e, quindi, alla ricerca che ha accompagnato il progetto nel suo percorso. L'interpretazione dei risultati, sorretta da interviste biografico-narrative sui percorsi di carriera e da focus group con mentori e mentee, rivela attraverso quali pratiche e quali processi si producono e riproducono le disuguaglianze di genere nell'accademia e nella

ricerca. Con gli strumenti dell'indagine valutativa, questi risultati sono quindi messi a fuoco per ricostruire il funzionamento del mentoring come pratica di genere capace di decostruire i processi che producono disuguaglianza e produrre effetti trasformativi del contesto scientifico-accademico. [Eng] The volume is an original contribution to the debate on interventions in favour of gender equality in universities and in research. The book

presents the results of the research-action carried out together with the experimentation of the pilot mentoring program, within the European project GENOVATE@UNINA. By establishing a dialogue with the latest European researches - developed in the cultural context and in the framework for structural change interventions, promoted through the Seventh Framework Program and Horizon 2020 - this work assumes, as an interpretative framework,

the processes of global change that involve the settings of the scientific-academic system. The discussion develops along a linear pathway, moving from the debate on gender equality policies, it leads to the design of the mentoring pilot scheme (the first one to be exclusively women addressed, in the Italian universities) and, therefore, the research that has accompanied the project on its path is also described. The interpretation of results, supported by

biographical-narrative interviews on career paths and focus groups with mentors and mentees, reveals through which practices and processes are produced and reproduced gender inequalities in academia and research. Using the tools of the survey, these results have been analysed in order to reconstruct the mentoring functioning as a gender practice capable of deconstruct processes that produce inequality and produce transformational effects of the scientific-

academic context.

 Colloids are submicron particles that are ubiquitous in both natural and industrial products. Colloids and colloidal systems play a significant role in human health as well as commercial and industrial situations. Colloids have important applications in medicine, sewage disposal, water purification, mining, photography, electroplating, agriculture,

and more. This book gathers recent research from experts in the field of colloids and discusses several aspects of colloid morphology, synthesis, and applications. The book is divided into three sections that cover different techniques for the synthesis of colloids, the structure, dynamic and stability of colloids, and applications of colloidal particles, respectively.

This authoritative reference presents the modern concepts of mesenchymal stem cells (MSCs) and biomaterials as they pertain to the dental field. The book is organized around three main topics: MSCs biology, advanced biomaterials, and clinical applications. The chapters present basic information on stem cell biology and physiology, modern biomaterials that improve bone tissue regeneration, the biomatrices like platelet-rich fibrin (PRF) used to functionalize the

biomaterials surface, the strategic and safe intraoral seats of harvesting, the new sources for MSCs, as well as the future perspectives and new challenges in these exciting fields. The contributors are top scientists with a great deal of experience in regenerative dentistry and biomedical research. They offer an international perspective and are richly cross-disciplinary, representing academia, research, and industry. MSCs and Innovative Biomaterials in Dentistry

is indispensable reading for students, researchers, and clinicians who need to stay up-to-date on the cutting-edge developments of tissue engineering and regenerative medicine applied to dental sciences.

The association between periodontitis and systemic diseases has become a hot topic in recent years. This comprehensive book reviews the clinical evidence and biological plausibility of the many systemic diseases that have been linked to periodontitis. Edited by Dr Josefine Hirschfeld and Prof Iain L.C. Chapple, experts in each field

discuss the mechanisms at work, citing the available key literature and clearly summarising current knowledge and understanding of the associations between periodontitis and diabetes mellitus, cardiovascular diseases, chronic kidney disease, inflammatory bowel diseases, rheumatoid arthritis, respiratory diseases, pregnancy and fertility, malignancy, neurodegenerative diseases, stress and depression, and autoimmunity. Each

chapter critically appraises the existing evidence, providing comprehensive, contemporary and well-considered insights into the clinical evidence and biological plausibility of each condition, as well as the limitations of existing studies and how these can be overcome in the future. Periodontitis and Systemic Diseases: Clinical Evidence and Biological Plausibility is an indispensable reference for both clinicians and researchers.

 In 2006, when my colleague Andrea Renda proposed multiple primary malignancies (MPM) as the subject of the Biennial Report to the 2008 Congress of the Italian Society of Surgery, I, together with the Steering Committee, quickly agreed. Recent progress in our understanding of the etiopathology of these neoplasms has led to innovative and significant progress on the clinical level. Importantly, the incidence of the onset of two or more tumors in the

same patient suggests a more than casual relationship. Furthermore, the occurrence of MPM derives from several different mechanisms—viral, iatrogenic, immunologic, environmental, and hereditary—such that any form of treatment must take into account the etiology of these tumors. After an epidemiological introduction, this monograph analyzes various aspects of multitumoral syndromes based on the experience of the Department of

Surgical Sciences, along with that of other clinical departments of the University Federico II of Naples. In the discussion of inherited tumors, reference is made to the series of patients treated at the Department of Surgery at the University of Siena. The many topics that comprise this volume range from carcinogenesis to diagnostic strategies, and from epidemiology to innovations in imaging and endoscopic techniques. Among the clinical aspects, particular emphasis is given to

sporadic and hereditary syndromes, as these patients are frequently treated by general surgery departments.

Il Bilancio di Genere è un documento che analizza e valuta le scelte politiche e gli impegni economico-finanziari di una amministrazione in un'ottica di genere, con l'obiettivo di perseguire una gestione delle risorse efficiente, trasparente, equa e consapevole. La produzione del primo

documento di Bilancio di Genere dell'Ateneo Federico II è stata realizzata nell'ambito del progetto europeo GENOVATE: Transforming Organizational Culture for Gender Equality in Research and Innovation. Il documento contiene un'ampia analisi di contesto che attraversa la tripla anima dell'Ateneo: studenti, personale docente e personale tecnico amministrativo, restituendo una fotografia della composizione degli organici in cui il divario di genere non appare ancora

superato. I dati raccolti ed elaborati evidenziano e confermano l'esistenza di ostacoli culturali e strutturali che determinano, da un lato, l'abbandono della carriera scientifica da parte delle donne, dall'altro il persistere di meccanismi di segregazione orizzontale e verticale, con alcune aree e posizioni riservate esclusivamente a un genere. L'auspicio è che il Bilancio di Genere possa diventare prassi consolidata dell'Ateneo e assolvere alla propria

funzione di strumento trasformativo nell'ottica del gender mainstreaming. GENOVATE è un progetto finanziato dalla Commissione Europea nell'ambito del Settimo Programma Quadro (FP7), bando Science in Society (SiS 2012 2.1.1-1). Il volume è stato realizzato con il cofinanziamento dell'Unione Europea.

 As the name suggests this book discusses how nanotechnology has influenced the provision of

implant treatment from surgery to prosthetic reconstruction and post treatment biological complications. This book is a sequel to the earlier book "Dental Applications of Nanotechnology" published by Springer. It aims to present both the nanotechnology and allied research along with the clinical concepts of almost every different aspect of implantology in one volume. These two fraternities promote the translation of the research ideas and product development into fruitful

practicalities. The first section covers nanobiomaterials in implant applications, in bone regeneration, prosthetic rehabilitation, to control biofilm and peri-implantitis, bone grafting and tissue engineering. The second section explores applications of such new technologies in the field of implantology that gives this book a unique feature by bringing science and technology into clinical application. It covers implant stability, peri-implantitis, lasers,

CAD/CAM technology, impressions, 3D printing, reconstruction with bone grafts and zygomatic implants. Comprehensive coverage includes both simple and complicated clinical cases, with practical guidance on how to apply the latest research, diagnostic tools, treatment planning, implant designs, materials, and techniques to provide superior patient outcomes. The book is well written and structured making it easy for experienced clinicians and those new to dental

implantology as well as students, researchers, scientists and faculties of dental universities

Expand your skills in the rapidly growing field of laser dentistry! Principles and Practice of Laser Dentistry uses a concise, evidence-based approach in describing protocols and procedures. Dr. Robert A. Convissar, a renowned lecturer on this subject, has assembled a diverse panel of international contributors; he's also one of the first

general dentists to use lasers in his practice. The book covers the history of lasers in dentistry and laser research, plus the use of lasers in periodontics, periodontal surgery, oral pathology, implantology, fixed and removable prosthetics, cosmetic procedures, endodontics, operative dentistry, pediatrics, orthodontics, and oral and

maxillofacial surgery. Full-color images show the latest laser technology, surgical techniques, and key steps in patient treatment. Full-color photos and illustrations demonstrate surgical techniques and key teaching points. A Laser Fundamentals chapter describes the physics of lasers and the

wavelengths that can produce better outcomes. Introducing Lasers into the Dental Practice chapter provides guidelines on investing in laser technology and in marketing this new procedure. Clinical Tip and Caution boxes include advice and alerts that can only be offered by a seasoned practitioner of 27 years.
