An introduction to the mathematical skills needed to understand finance and make better financial decisions *Mathematical Finance* enables readers to develop the mathematical skills needed to better understand and solve financial problems that arise in business, from small entrepreneurial operations to large corporations, and to also make better personal financial decisions. Despite the availability of automated tools to perform financial calculations, the author demonstrates that a basic grasp of the underlying mathematical formulas and tables is essential to truly understand finance. The book begins with an introduction to the most fundamental mathematical concepts, including numbers, exponents, and logarithms; mathematical progressions; and statistical measures. Next, the author explores the mathematics of the time value of money through a discussion of simple interest, bank discount, compound interest, and annuities. Subsequent chapters explore the mathematical aspects of

various financial scenarios, including: Mortgage debt, leasing, and credit and loans Capital budgeting, depreciation, and depletion Break-even analysis and leverage Investing, with coverage of stocks, bonds, mutual funds, options, cost of capital, and ratio analysis Return and risk, along with a discussion of the Capital Asset Pricing Model (CAPM) Life annuities as well as life, property, and casualty insurance Throughout the book, numerous examples and exercises present realistic financial scenarios that aid readers in applying their newfound mathematical skills to devise solutions. The author does not promote the use of financial calculators and computers, but rather guides readers through problem solving using formulas and tables with little emphasis on derivations and proofs. Extensively class-tested to ensure an easy-to-follow presentation, *Mathematical Finance* is an excellent book for courses in business, economics, and mathematics of finance at the upper-undergraduate and graduate levels. The book is also appropriate for consumers and entrepreneurs who need to build their mathematical skills in order to better understand financial problems and make better financial choices.

Master the practical aspects of the CFA Program curriculum with expert instruction for the 2019 exam. The same official curricula that CFA Program candidates receive with program registration is now publicly available for purchase. CFA Program Curriculum 2019 Level II, Volumes 1-6 provides the complete Level II curriculum for the 2019 exam, with practical instruction on the Candidate Body of Knowledge (CBOK) and how it is applied, including expert guidance on incorporating concepts into practice. Level II focuses on complex analysis with an emphasis on asset valuation, and is designed to help you use investment concepts appropriately in situations analysts commonly face. Coverage includes ethical and professional standards, quantitative analysis, economics, financial reporting and analysis, corporate finance, equities, fixed income, derivatives, alternative investments, and portfolio management organized into individual study sessions with clearly defined Learning Outcome Statements. Charts, graphs, figures, diagrams, and financial statements illustrate complex concepts to facilitate retention, and practice questions with answers allow you to gauge your understanding while reinforcing important concepts. While Level I introduced you to basic foundational investment skills, Level II requires more complex techniques and a strong grasp of valuation methods. This set dives deep into practical application, explaining complex topics to help you understand and retain critical concepts and processes. Incorporate analysis skills into case evaluations. Master complex calculations and quantitative techniques. Understand the international standards used for valuation and analysis. Gauge your skills and understanding against each Learning Outcome Statement. CFA Institute promotes the highest standards of ethics, education, and professional excellence among investment professionals. The CFA Program curriculum guides you through the breadth of knowledge required to uphold these standards. The three levels of the program build on each other. Level I provides foundational knowledge and teaches the use of investment tools; Level II focuses on application of concepts and analysis, particularly in the valuation of assets; and Level III builds toward synthesis across topics with an emphasis on portfolio management.

Basic Accounting John Wiley & Sons

The current economic situation has highlighted deficiencies in corporate governance while also showing the importance of stakeholder relations. It has also raised the profile of the debates regarding corporate social responsibility and shown the inter-relationship with governance. And the two together are essential for sustainable business. The social and environmental contexts of business are generally considered to be as significant as the economic and financial contexts and good governance will address all of these aspects. The combination of these aspects offers long term benefits for a firm, such as reducing risk and attracting new investors, shareholders and more equity as well as sustainable performance. Written by experts from all over the world, *A Handbook of Corporate Governance and Social Responsibility* is the most authoritative single-volume guide to the relationship between good governance and social responsibility and the reality of managing both. In addition to the theory and practice of governance and CSR, the book includes case studies from large and small organizations and NGOs to highlight examples of good and bad practice, and to show international and cultural similarities and differences while at the same time furthering the debate regarding the relationship between good governance and social responsibility.

MARPOL VI was developed through the International Maritime

Organization (IMO), a United Nations agency that deals with maritime safety and security, as well as the prevention of marine pollution from ships. MARPOL is the main international agreement covering all types of pollution from ships. Annex VI aims to reduce emissions from ships through international regulations. Regulation 14 - Restricts SOx emissions from ships by introducing a maximum sulphur content in marine fuels of 4.5 per cent. In addition, MARPOL Annex VI identifies SOx emission control areas (SECA)

This volume provides the most up-to-date analysis of the ethnic cleansing of the Crimean Tatars, their exile in Central Asia and their struggle to return to the Crimean homeland. It also traces the formation of this diaspora nation from Mongol times to the collapse of the Soviet Union. A theme which emerges through the work is the gradual construction of the Crimea as a national homeland by its indigenous Tatar population. It ends with a discussion of the post-Soviet repatriation of the Crimean Tatars to their Russified homeland and the social, emotional and identity problems involved.
