 This book provides a comprehensive overview of the fundamental principles and applications of semiconductor diode laser arrays. All of the major types of arrays are discussed in detail, including coherent, incoherent, edge- and surface-emitting, horizontal- and vertical-cavity, individually addressed, lattice- matched and strained-layer systems. The initial chapters cover such topics as lasers, amplifiers, external-cavity control, theoretical modeling, and operational dynamics. Spatially incoherent arrays are then described in detail, and the uses of vertical-cavity surface emitter and edge-emitting arrays in parallel optical-signal processing and multi-channel optical recording are discussed. Researchers and graduate students in solid state physics and electrical engineering studying the properties and applications of such arrays will find

this book invaluable.

**An Introduction to Crystal Analysis** Good Press  
 This book presents the most up-to-date research and information regarding the origin, chemistry, fate and health impacts of airborne particulate matter in urban areas, a topic which has received a great deal of attention in recent years due to documented relationships between exposure and health effects such as asthma. With internationally recognised researchers and academics presenting their work and key concepts and approaches from a variety of disciplines, including environmental and analytical chemistry, biology, toxicology, mineralogy and the geosciences, this book addresses the topic of urban airborne particulate matter in a comprehensive, multidisciplinary manner. Topics and research addressed in the book range from common methodological approaches used to sample and analyse the composition of airborne particulates to our knowledge regarding their potential to impact human health and the various policy approaches taken internationally to regulate particulate matter levels.

 Women suffer from headaches far more than men. According to the World Health Organization, migraine is one of the most disabling medical conditions. The understanding of the pathophysiology of migraine has changed dramatically over the past decade, leading to more rational and targeted treatments. Since most migraineurs are young women, use of contraception, management of headaches with menstruation, pregnancy,

lactation, and menopause are important issues addressed in this text. Headaches are often inherited, and, as such, the book also discusses genetic issues, particularly relevant in this era of customized medicine. The hormonal management of transgenders is important as many will experience severe headaches during their transitions. Comorbidities, including psychiatric syndromes and strokes, are also presented in detail. This text will be of interest to all practitioners who manage women with headaches.

 International Freight Transport presents the key changes and issues in the fast-moving industries of trade and transport. It includes coverage of regional trade groupings, the emergence of new large economies (i.e. BRIC countries), and pivotal regions such as the Middle East and Central America where major projects, such as new and widened canals, are underway or planned. These changes could redraw the trade map with major implications for transport patterns and solutions. Blending geography, economics, politics and trade, International Freight Transport provides insight into a wide range of topics, including: globalisation; demand versus supply; buyers and sellers; transport regulation, geography, modes and methods; transport ownership; alliances; and safety and security. The book is the only comprehensive and accessible book on international transport available.

**Diode Laser Arrays** Springer Science & Business Media  
 Think of As a Matter of Course as a philosophical manifesto for women who embrace traditional roles and values in the family and in the wider world. In this collection, the popular nineteenth-century magazine columnist Annie Payson Call addresses a broad range of issues and matters spiritual and practical in nature, issuing advice that is both thought-provoking and timeless in its wisdom.

**The Chinese Consumer Market**  
 This book features a complete list of members of the prestigious Porcellian Club at Harvard University, one of the oldest social and literary clubs in the country. Founded in 1791, the Porcellian Club has been a hub of intellectual, social, and political activity for generations of Harvard students. The book provides valuable insights into the club's history, and its roster of distinguished alumni, which includes US Presidents, Supreme Court justices, and numerous other prominent figures in American history. A must-read for Harvard alumni or anyone interested in the history of higher education in America. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it.
