Advances in Case-Based Reasoning

Springer Science & Business Media

This book constitutes the refereed proceedings of the 8th European Conference on Case-Based Reasoning, ECCBR 2004, held in Fethiye, Turkey in September 2006. The book presents 31 revised full papers and 5 revised application papers together with 2 invited papers and 2 abstracts of invited talks. The coverage represents snapshot of

current current issues in case-based reasoning, ranging from theoretical and methodological issues to advanced applications in various fields.

Bosnia Remade Springer Science & Business Media

Discusses the development history and specifications for all Mercedes-Benz models from 1886 to the present.

Hungary Army, National Security and Defense Policy Handbook Volume 1 Strategic Information and Developments Springer

The book reviews our current knowledge about Classical Nova Explosions, including

all the recent advances from both theoretical and observational points of view. The volume covers a large number of topics, such as the astrophysical scenario, the explosion mechanism (including recent multidimensional approaches), light curves and spectra, and observations based on ground and space facilities, covering all wavelength ranges from radio and infrared to X and gamma-rays. Topics include: novae, cataclysmic variables, nucleosynthesis, white dwarfs, observations (optical, IR, radio, UV, x-rays, gamma-rays).

Codenamed W460, the iconic Mercedes-Benz G-Wagen, with its boxy, square edged no frills look, set out to be Stuttgart's answer to the Range Rover. However, by going back to Gottlieb Daimler's premise of "Nothing but the best," it quickly took its place throughout the world as "The Best 4X4." This Essential Buyer's Guide will navigate you through the various model changes, starting from the simple hand-built W460, through to the more luxurious market of the W463. You will find details of model changes, engine specifications, and issues that you may come across when looking to buying one of the best purpose-made vehicles around. Nik Greene has written many feature articles and regular copy for popular classic car and club magazines in the UK and France, and his passion for Mercedes cars has steered him towards researching and writing for one of the elite motor manufacturers. Having restored many cars, his present stable of cars includes the Mercedes W126 S-Class 560SE and his beloved Mercedes G-Wagen, as well as several classic Citroens and Renaults.

The Mercedes 126 S-Class of 1979-1991 remains the most successful premium saloon in the company's history and is considered by many to be one of the best cars in the world. "You don't simply decide to buy an S-Class: it comes to you when fate has ordained that your life should take that course. The door closes with a reassuring clunk - and you have arrived," said the sales brochure of the first real Sonderklasse, the W116. With over 300 colour photos and production histories and specifications for both Generation One and Two models, this is an essential resource

for anyone with an interest in this timeless car. The book covers an overview of the key personalities who drove the development of this model; the initial 116 Sonderklasse and its subsequent evolution; the history and personality of each model and finally detailed analysis of the different engines - both petrol and diesel. This essential resource explores both the technical and social sides of how this legend was born and is superbly illustrated with 314 colour photographs.

^ p="" This highly informative and carefully presented volume highlights the impact behavior of fibre reinforced polymer composites. It begins with a preliminary focus on FRP materials, fabrication processes, micro- and macro-mechanics to calculate FRP laminates properties, damage nodes associated with FRP composites under different loadings. It provides a simple and unified approach to cover aspects of FRP composites behavior with low velocity impact loading. This book offers a valuable guide for those who wish to develop deeper insights into weaving architectures, stacking sequences,

fabrication processes, general damage modes associated with FRP composites. It is a useful volume for students, academia and industry alike. ^

Bosnia Remade is an authoritative account of ethnic cleansing and its partial undoing from the onset of the 1990s Bosnian wars up through the present. Gerard Toal and Carl Dahlman combine a bird's-eye view of the entire war from onset to aftermath

with a micro-level account of three towns that underwent ethnic cleansing and--later--the return of refugees. There have been two major attempts to remake the ethnic geography of Bosnia since 1991. In the first instance, ascendant ethno-nationalist forces tried to eradicate the mixed ethnic geographies of Bosnia's towns, villages and communities. These forces devastated tens of thousands of homes and lives, but they failed to destroy Bosnia-Herzegovina as a polity. In the second attempt, which followed the war, the international community, in league with Bosnian officials, endeavored to reverse the demographic and other consequences of this ethnic cleansing. While progress has been uneven, this latter effort has transformed the ethnic demography of Bosnia and moved the nation beyond its recent segregationist past. By showing how ethnic cleansing was challenged, *Bosnia Remade* offers more than just a comprehensive narrative of Europe's worst political crisis of the past two decades. It also offers lessons for addressing an enduring global problem. Faszination SI - 190 SI (w121) Springer Nature

Designed by Mercedes's head of design Bruno Sacco, the W124 range immediately became the benchmark by which medium-sized car models were judged in the late 1980s due to its engineering excellence and high build quality. There was a model to suit every would-be-buyer, from the taxi driver through the family motorist and on to those who were willing and able to pay for luxury and performance. This book covers: design, development and manufacture of all models of W124 including estates, cabriolets and the stylish coupe range; engines and performance; special editions and AMG models and, finally, buying and owning a W124 today. Superbly illustrated with 264 colour photographs.

Mercedes-Benz G-Class specialist Jörg Sand has written the ultimate book on this all-wheel-drive legend, from its design and development to its extraordinary and diverse career up to the present day. Very few automobiles remain as faithful in their character and appearance as the hardcore, all-wheel-drive Mercedes-Benz G-Class luxury SUV. Even when it comes to

the most recent series, the W 463 A, with its technically profound changes, the designers at Mercedes have barely changed the classic look. And for good reason. From its first year, 1979, the G-Class has always been one of the very few off-road legends. Tourists, firefighters, foresters, race drivers, and boat owners all appreciate the unique qualities of this indestructible force, the "G Wagon," from Graz, Austria.

This book constitutes the refereed proceedings of the 4th European Workshop on Case-Based Reasoning, EWCBR-98, held in Dublin, Ireland, in September 1998. The 41 revised full papers presented were carefully selected and reviewed for inclusion in the proceedings. The contributions address the representation and organization of cases in case-bases, the assessment of case similarity, the efficient retrieval of cases from large case-bases, the adaptation of similar case solutions to fit the current problem, case learning and case-base maintenance, and the application of CBR technology to real-world problems.

This book is the first ever illustrated study on the often photographed but never fully explained mechanical marvel, the Mercedes-Benz G-4 crosscountry touring car, the vehicle that carried Adolf Hitler across much of Europe before and during World War II. Culled from the rich photo archives of Daimler-Benz, as well as from

captured German albums in U.S. archives, this work depicts the G-4 in fascinating images and detailed text.
