Crime Scene Asia: when forensic evidence becomes the silent witness is a casebook of fascinating true stories from Singapore, Malaysia, HK, The Philippines and Indonesia. Its opening case begins when the body of a woman is found in a Singapore nature park. Nobody has reported her missing. Nobody knows who she is. The only clue to her identity is a set of tiny numbers etched into a series of implants in her teeth. Police door-knock the dentists of Singapore until they find the one who treated her. Then, following a trail of numbers called from her phone, they unmask her killer. In another case, set 300 kms away, in Kuala Lumpur, a married man is arrested for the murder of his mistress. Police are adamant that he is her killer. But the man's lawyer can point to forensic evidence that tells a different story altogether. Meanwhile one of the book's Hong Kong cases tells the story of a humble truck driver facing jail for his apparent involvement in a bombing plot allegedly masterminded by two of the former British colony's most notorious gangsters. Then the evidence of a forensic scientist sets him free.

Crime scene investigation involves the use and integration of scientific methods, physical evidence, and deductive reasoning in order to determine and establish the series of events surrounding a crime. The quality of the immediate crime scene response and the manner in which the crime scene is examined are critical to the success of the investigation. Evidence that is missed or corrupted by incomplete or improper handling can have a devastating effect on a case and keep justice from being served. The Practice of Crime Scene Investigation covers numerous aspects of crime scene investigation, including the latest in education and training, quality systems accreditation, quality assurance, and the application of specialist scientific disciplines to crime. The book discusses a range of basic and advanced techniques such as fingerprinting, dealing with trauma victims, photofit technology, the role of the pathologist and ballistic expert, and signal processing. It also reviews specialist crime scene examinations including clandestine laboratories, drug operations, arson, and explosives.

In the contemporary fascination with images of crime, violence gets under our skin and keeps us enthralled. The Scene of Violence explores the spectator's encounter with the cinematic scene of violence - rape and revenge, homicide and serial killing, torture and terrorism. Providing a detailed reading of both classical and contemporary films - for example, Kill Bill, Blue Velvet, Reservoir Dogs, The Matrix, Psycho, The Accused, Elephant, Seven, Thelma & Louise, United 93, Zodiac, and No Country for Old Men - Alison Young returns the affective processes of the cinematic image to the study of law, crime and violence. Engaging with legal theory, cultural criminology and film studies, the book unfolds both our attachment to the authority of law and our identification with the illicit. Its original contribution is to bring together the cultural fascination of crime with a nuanced account of what it means to watch cinema. The Scene of Violence

shows how the spectator is bound by the laws of film to the judgment of the crime-image.
