The Natural History Museum Book of Dinosaurs Hachette Enfants

Il y a de cela 66 millions d'années, les plus terrifiantes créatures à avoir jamais foulé la Terre disparaissaient. À ce jour, les dinosaures sont restés l'une des plus fascinantes énigmes du passé de notre planète. Le Triomphe et la chute des dinosaures offre une perspective inédite sur leurs 200 millions d'années de succès. Le paléontologue américain Steve Brusatte dépeint magistralement le monde de ces titans disparus, mettant au jour leurs énigmatiques origines, leur incroyable évolution, leur étonnante diversité et le legs inattendu qu'ils nous ont laissé. Brusatte retrace le parcours des dinosaures, de leurs humbles débuts en tant que créatures de l'ombre jusqu'à leur domination complète de la planète, peu de temps avant leur extinction. Des milliers d'espèces de dinosaures ont prospéré du Jurassique à la fin du Crétacé, incluant T. rex, Triceratops, Brontosaurus, Velociraptor et bien d'autres, sans parler des dinosaures à ailes, les ancêtres préhistoriques de nos oiseaux modernes. Leur histoire a tragiquement pris fin en même temps que le Crétacé, lorsqu'un astéroïde géant - ou une comète - a frappé la Terre et que presque toutes les espèces de dinosaures se sont éteintes, dans l'une des plus spectaculaires extinctions de masse de l'histoire de la planète. Classique instantané, best-seller mondial, Le Triomphe et la chute des dinosaures est un récit captivant rempli de leçons toujours actuelles, dont la pertinence continuera de s'affirmer dans les années à venir.

Dinosaurs of Italy Weird But True

Scientists have recovered more than a billion fossils, but no discovery has been more breath-

taking than the fossils recently found in northern China, findings which prove that several families of dinosaurs had feathers, or feathery hair-like coverings, adorning their bodies. Now in the beautifully designed Feathered Dinosaurs, paleontologist John Long and illustrator Peter Schouten provide a stunning visual record of these extraordinary prehistoric creatures, illuminating the evolutionary march from primitive, feathered dinosaurs through to the first true flying birds. Schouten, an acclaimed natural history artist, has created 80 full-color paintings that capture the striking physical traits of these feathered dinosaurs. Drawing on his extensive knowledge of the lifestyles of modern birds and mammals, plus the extant scientific data regarding how these dinosaurs might have looked and behaved, Schouten has produced not only the most beautiful but also the most accurate visual representations of these animals in print. Equally important, John Long, a noted paleontologist and widely published science author (with some 24 books to his credit), provides an engaging companion text that places these feathered dinosaurs within the larger family of dinosaurs--for instance, outlining their relationship to T. Rex and Velociraptor, species well known to Jurassic Park fans--and discusses the factual information that can be deduced from their fossil remains, in effect providing an insightful natural history of this remarkable group. A true marriage of art and science, Feathered Dinosaurs presents an unprecedented visual record of one of the most significant breakthroughs in the history of vertebrate paleontology--the discovery that many predatory dinosaurs were cloaked with feathers, perhaps just as colorful and fanciful as those of their living relatives.

Customize your favorite dinosaur drawings from acclaimed artist William Stout with this deluxe all-ages coloring book. For decades, acclaimed illustrator and movie artist William Stout has been transporting viewers into the lost world of the dinosaurs. Through his children's book The Little Blue Brontosaurus, which formed the basis for The Land Before Time animated series, to his murals of prehistoric life and visionary designs for dozens of films, Stout's award-winning artwork immerses you in places real and imagined to encounter fascinating creatures. Now you can personalize dino-master William Stout's thrilling illustrations and create your own prehistoric realm. From long-necked Apatosaurus to horned Zuniceratops and, of course, mighty Tyrannosaurus rex, over eighty dinosaurs are featured within, each of them hand-drawn and precisely rendered in pen and ink among the flora of their era. To journey through time to the kingdom of the dinosaurs, all you need are pens, pencils, and a bit of imagination.

[Le Triomphe et la chute des dinosaures](#) Little Hippo

In The World of Dinosaurs, paleontologist Dr Mark Norell takes a detailed look at everything we know about these wondrous creatures, drawing on the very latest research in the field. Produced in association with the American Museum of Natural History and drawing on their archives, Norell examines every facet of the dinosaur mystery, from the scattering of dinosaur fossils after the breakup of Pangea to the different categorisations of these monstrous reptiles. Even subjects you may think you know about - such as the species' extinction - are looked at in a new light. Illustrated with exceptional scientific recreations of key species, as well as documentary photographs, sketches and notes from dino discoveries, this is the ultimate photographic reference book on dinosaurs.
