Understand ABAP
objects—the object-
oriented extension of
the SAP language

ABAP—in the latest release of SAP NetWeaver 7.5, and its newest advancements. This book begins with the programming of objects in general and the basics of the ABAP language that a developer needs to know to get started. The most important topics needed to perform daily support jobs and ensure successful projects are covered. ABAP is a vast community with developers working in a variety of functional areas. You will be able to apply the concepts in this book to your area. SAP ABAP Objects is goal directed, rather than a collection of theoretical topics. It doesn't just touch on the surface of ABAP objects, but goes in depth from building the basic foundation (e.g.,

classes and objects created locally and globally) to the intermediary areas (e.g., ALV programming, method chaining, polymorphism, simple and nested interfaces), and then finally into the advanced topics (e.g., shared memory, persistent objects). You will know how to use best practices to make better programs via ABAP objects. What You'll Learn Know the latest advancements in ABAP objects with the new SAP Netweaver system Understand object-oriented ABAP classes and their components Use object creation and instance-methods calls Be familiar with the functions of the global class builder Be exposed to advanced topics Incorporate best

practices for making object-oriented ABAP programs Who This Book Is For ABAP developers, ABAP programming analysts, and junior ABAP developers. Included are: ABAP developers for all modules of SAP, both new learners and developers with some experience or little programming experience in general; students studying ABAP at the college/university level; senior non-ABAP programmers with considerable experience who are willing to switch to SAP/ABAP; and any functional consultants who want or have recently switched to ABAP technical.

Whether you're new to ABAP, or you've been developing for years, this is the resource for you. Build your foundation with basic programming concepts and tools, then take it to the next level with modifications and enhancements for your ABAP code. Design reports and screens, develop applications using dialog programming, create interfaces, and more. Your ultimate reference guide to the world of ABAP is here!

a. Everything ABAP
Learn everything there is to know about ABAP. Start with keywords, syntax, tools, data types, and events. Then level up and master user interaction, exception handling, dialog and dynamic programming, and more. b.

Programming Techniques Get to know techniques like object-oriented and procedural programming and how they relate to ABAP. Master modularization, inheritance, data encapsulation, and leverage existing features and functionality without having to reinvent the wheel!

c. Debugging and Testing Writing code is one thing, making it work is another! Learn how to debug code using the classic and new debuggers, and put your programs to the test using tools like ABAP Unit and the code inspector.

1) Architecture and environment
2) Syntax, keywords, structures, and tables
3) User interaction
4) Modularization
5)

Persistent data 6)
Dialog and dynamic
programming 7)

Interface development
9) Modifications and
enhancements 10)
Debugging and testing
SAP ABAP Objects
Edward Elgar
Publishing
SAP ABAP (Advanced
Business Application
Programming) offers a
detailed tutorial on the
numerous features of
the core programming
platform, used for
development for the
entire SAP software
suite. SAP ABAP uses
hands on business
oriented use cases and
a valuable dedicated e-
resource to
demonstrate the
underlying advanced
concepts of the OO
ABAP environment and
the SAP UI. SAP ABAP
covers the latest
version (NetWeaver 7.3

and SAP application
programming release
6.0) of the platform for
demonstrating the
customization and
implementation phases
of the SAP software
implementation. Void
of theoretical
treatments and
preoccupation with
language syntax, SAP
ABAP is a
comprehensive,
practical one stop
solution, which
demonstrates and
conveys the language's
commands and
features through hands
on examples. The
accompanying e-
resource is a take off
point to the book. SAP
ABAP works in tandem
with the accompanying
e-resource to create an
interactive learning
environment where the
book provides a brief
description and an
overview of a specified

feature/command, showing and discussing the corresponding code. At the reader's option, the user can utilize the accompanying e-resource, where a step-by-step guide to creating and running the feature's object is available. The presentation of the features is scenario oriented, i.e. most of the features are demonstrated in terms of small business scenarios. The e-resource contains the scenario descriptions, screen shots, detailed screen cams and ABAP program source to enable the reader to create all objects related to the scenario and run/execute them. The underlying concepts of a feature/command are conveyed through

execution of these hands-on programs. Further exercises to be performed independently by the reader are also proposed. The demonstration/illustration objects including the programs rely on some of the SAP application tables being populated, for example an IDES system which is now a de facto system for all SAP training related activities.

Take a deep dive into SAP Fiori and discover Fiori architecture, Fiori landscape installation, Fiori standard applications, Fiori Launchpad configuration, tools for developing Fiori applications and extending standard Fiori applications. You will learn: Fiori architecture and its applications Setting up a Fiori landscape and Fiori Launchpad Configuring, customizing and enhancing standard Fiori applications Developing Fiori native

applications for mobile Internet of Things-based custom Fiori applications with the HANA cloud platform Since Mathew, a SAP mobility expert working for an MNC in Germany, shows you how SAP Fiori, based on HTML5 technology, addresses the most widely and frequently used SAP transactions like purchase order approvals, sales order creation, information lookup, and self-service tasks. This set of HTML5 apps provides a very simple and accessible experience across desktops, tablets, and smartphones. Prerequisites and steps for setting up a Fiori landscape and Launchpad Fiori standard application configuration Extending and

customizing standard Fiori applications
 Developing custom Fiori applications from scratch Building custom Fiori applications for Internet Of Things using HANA cloud Fiori apps with cordova and kapsel plugins
A Reappraisal SAP PRESS

- Explore practical exercises for programming in SAP Business Workflow
- Utilize step-by-step instructions for adapting data flows, agent determination, event definitions, and more
- Learn from examples, problem solutions, and tips and tricks for daily practice

ABAP developers require special programming skills for workflow-related ABAP development, as well

as very specific process knowledge. With this book, you will acquire both! You'll learn the aspects of the tools that are directly related to the developer's tasks, understanding when it is necessary to use custom code and how to write this code. In the many activities and tutorials this book provides, you'll discover how your work differs from the workflow engine of classic application development, as well as how to influence the behavior of a workflow with its own ABAP programs. Additionally, you'll learn how to customize the workflow environment beyond standard programming.

This book is your guide for analyzing and optimizing ABAP source code. You'll learn about the analysis tools and performance-relevant technologies, and discover how you can analyze existing source code and enhance your programming style. This is the resource you need to ensure that your ABAP programs are fully optimized. 1 Analysis Tools After reading this book, you'll know when and how to use analysis tools properly including Code Inspector, performance trace, ABAP trace, or single records statistics. 2 Programming Technologies Get detailed information on parallel processing, internal tables, SQL data processing, and

much more, and learn how these technologies affect performance. 3 Buffering Explore the different buffers that are available on the SAP NetWeaver Application Server ABAP, and learn the most important buffer options to avoid unnecessary database accesses. 4 Database Tuning You'll obtain a description of the database architecture and the technical background of database accesses, and master the tuning options for database accesses. 5 New Developments Learn from a comprehensive overview of the new developments in ABAP Release 7.0, EhP2, such as Transaction SAT, the innovations of the performance trace, and changes of internal tables.

Unpack your API toolkit with this guide to SAP API Management.

Learn how to use the API Designer to create enterprise APIs and discover how to manage their lifecycle.

Walk through key processes that optimize your APIs and keep them running smoothly: traffic

management, mediation, security, and monetization. Get expert guidance on building applications,

generating integration flows, and running analytics. Master API management from end

to end In this book, you'll learn about: a. API Lifecycle Walk

through API management from end to end: design, management, consumption, and

more. Understand how components such as the Developer Portal and API Gateway support the API

lifecycle. b. Key Processes Make the most of your APIs. See how to monitor traffic; perform message transformation, parsing, and validation; handle API security threats; and monetize API products. c.

Consumption and Analytics Get your APIs working for you. Learn how to consume APIs in SAP Fiori apps,

mobile apps built with SAP Mobile Services, and more. Then, analyze API consumption to gain insight into usage trends and performance.

Highlights Include: 1) Architecture 2) End-to-end lifecycle 3) Design and development 4)
