Benjamin Garcia makes a stunning debut with *Thrown in the Throat*. In a sex-positive incantation that retextures what it is to write a queer life amidst troubled times, Garcia writes boldly of citizenship, family, and Adam Rippon's butt. Detailing a childhood spent undocumented, one speaker recalls nights when "because we cannot sleep / we dream with open eyes." Garcia delves with both English and Spanish into how one survives a country's long love affair with anti-immigrant cruelty. Rendering a family working to the very end to hold each other, he writes the kind of family you both survive and survive with. With language that arrives equal parts regal and raucous, *Thrown in the*

*Throat* shines brilliant with sweat and an iridescent voice. "Sometimes even a diamond was once alive" writes Garcia in a collection that National Poetry Series judge Kazim Ali says "has deadly superpowers." And indeed these poems arrive to our hands through touch-me-nots and the slight cruelty of mothers, through closets both real and metaphorical. These are poems complex, unabashed, and needed as survival. Garcia's debut is nothing less than exactly the ode our history and present and our future call for: brash and unmistakably alive. Real-World Writers shows teachers how they can teach their pupils to write well and with pleasure, purpose and power. It demonstrates how classrooms can be transformed into genuine communities of writers where talking, reading, writing and sharing give children confidence, motivation

and a sense of the relevance writing has to their own lives and learning. Based on their practical experience and what research says is the most effective practice, the authors share detailed guidance on how teachers can provide writing study lessons drawing on what real writers do and how to teach grammar effectively. They also share a variety of authentic class writing projects with accompanying teacher notes that will encourage children to use genres appropriately, creatively and flexibly. The authors’ simple yet comprehensive approach includes how to teach the processes and craft knowledge involved in creating successful and

meaningful texts. This book is invaluable for all primary practitioners who wish to teach writing for real.

This goal allies her with poets from Spain's symbolist past, who acknowledge the insufficiency of language yet pursue elusive meaning.

Canelo's poetry advances their struggle, since, through a method ecofeminist Carol Bigwood has called "nonlinguistic silent presencing," she is able to finesse an apparent fusion between nature and the word."--Jacket.

This book assembles lectures and essays on literature (William Wordsworth, Walter Benjamin, Chinese mountain poetry, Friedrich Nietzsche, the Tao Te Ching), art (Paleolithic cave art, Vincent Van Gogh, American landscape painting), and Japanese poetry forms (haiku,

haibun, tanka) that were originally presented and published between 2000 and 2007. The essays identify strategies to counter the so-called postmodern condition. Matters of will, ethics, and consciousness are examined in comparative contexts with the aim of formulizing models of enlightened states of being and their aesthetic expressions. This study focuses on Wordsworth's rainbow epiphany; Walter Benjamin's «aura» and «monad»; Chinese mountain poetry's cosmic emptiness; Nietzsche's Hyperborean; Paleolithic cave art's transpersonal expression; Van Gogh's «dizzy heights» of natural beauty;

American landscape painters' depiction of the sublime; haiku's absolute metaphor epiphany; and tanka's connection between natural beauty and erotic feeling. The collection is a re-examination of Ralph Waldo Emerson's «fundamental unity» between humanity and nature, as well as an examination of often-unmediated affective experience and its expression in this context through literature and art. *CliffsNotes on Emily Dickinson's Poems* Milkweed Editions Nature poetry discovers the deep connection between humanity and nature. Beyond describing the wild beauty found in nature, the poetry

discusses nature's impact on humans and people's impact on nature. Author Sheila Griffin Llanas explores eight poems and poets, with chapters on William Wordsworth, Emily Dickinson, Walt Whitman, and five others. Accompanied by biographical information on the poet and end-of-chapter questions for further study, Llanas closely examines each poem, including detailed analysis of form, content, poetic technique, and theme, encouraging readers to develop the tools to understand and appreciate poetry.

Through lyrical, interconnected stories, she grapples with the tragedy that has haunted her family, attempting to make sense of her older sister's death using the color white. From trying to imagine her mother's first time producing breast milk to watching the snow fall and meditating on the impermanence of life, she weaves a poignant, heartfelt story of the omnipresence of grief and the ways we perceive the world around us. This book investigates the origins of figurative language in literary discourse within a cognitive framework. It represents an interface between linguistics and literature and develops a 6-tier theoretical model which analyses the different factors contributing to the creation of figurative words and expressions. By examining features ranging from language structure to figurative thought, cultural

history, reference, narrative and the personal experience of authors, it develops a global overview of the processes involved. Due to its particularly innovative characteristics in literature, the theme of death is explored in relation to universal concepts such as love and time. These aspects are discussed in the light of well-known authors in comparative literature such as D.H. Lawrence, Simone De Beauvoir, Hermann Hesse and Jorge Luis Borges. The origins can involve complex conceptual mappings in figures of speech such as metaphor and symbolism. They are often at the roots of an author's personal desires or represent the search for answers

to human existence. This approach offers a wide variety of new ideas and research possibilities for postgraduate and research students in modern languages, linguistics and literature. It would also be of interest to academic researchers in these disciplines as well as the general public who would like to delve deeper into the relevant fields.

Reading Poetry offers a comprehensive and accessible guide to the art of reading poetry. Discussing more than 200 poems by more than 100 writers, ranging from ancient Greece and China to the twenty-first century, the book introduces readers to the skills and the

critical and theoretical awareness that enable them to read poetry with enjoyment and insight. This third edition has been significantly updated in response to current developments in poetry and poetic criticism, and includes many new examples and exercises, new chapters on 'world poetry' and 'eco-poetry', and a greater emphasis throughout on American poetry, including the impact traditional Chinese poetry has had on modern American poetry. The seventeen carefully staged chapters constitute a complete apprenticeship in reading poetry, leading readers from specific features of form and figurative language to larger concerns with

genre, intertextuality, Caribbean poetry, world poetry, and the role poetry can play in response to the ecological crisis. The workshop exercises at the end of each chapter, together with an extensive glossary of poetic and critical terms, and the number and range of poems analysed and discussed – 122 of which are quoted in full – make Reading Poetry suitable for individual study or as a comprehensive, self-contained textbook for university and college classes.

*Nature's Colloquy with the Word* Peter Lang

The book explores the relations between Wallace Stevens' poetry and issues in general philosophy, philosophy of language, and

figurativeness. The chapters move from the question of the relation between poetry and philosophy to investigating the role of metaphor in Stevens' poems.

Bloomsbury Publishing Ecocritics and other literary scholars interested in the environment have tended to examine writings that pertain directly to nature and to focus on subject matter more than expression. In this book, Scott

Knickerbocker argues that it is time for the next step in ecocriticism: scholars need to explore the figurative and aural capacity of language to evoke the natural world in powerful ways.

"Nezhukumatathil's poems contain elegant twists of a very sharp knife. She writes about the natural world and how we live in it, filling each poem, each page with a true sense of wonder." —Roxane Gay  
"Cultural strands are woven into the DNA of her strange, lush... poems.

Aphorisms...from another dimension."

—The New York Times  
"With unparalleled ease, she's able to weave each intriguing detail into a nuanced, thought-provoking poem that also reads like a startling modern-day fable." —The Poetry Foundation  
"How wonderful to watch a writer who was already among the

best young poets get even better!"

—Terrance Hayes  
With inquisitive flair, Aimee Nezhukumatathil creates a thorough registry of the earth's wonderful and terrible magic. In her fourth collection of poetry, she studies forms of love as diverse and abundant as the ocean itself. She brings to life a father penguin, a C-section scar, and the Niagara Falls with a powerful force of reverence for life and living things. With an encyclopedic range of subjects and unmatched sincerity, *Oceanic* speaks to each reader as a cooperative part of the earth, an extraordinary neighborhood to which we all belong. From "Starfish and Coffee":  
And that's how you feel after tumbling like sea

stars on the ocean floor over each other. A night where it doesn't matter which are arms or which are legs or what radiates and how— only your centers stuck together.

Poems—specifically romantic poems, such as those by Thomas Gray, William

Wordsworth, and John Keats—link what goes unremembered in our

reading to ethics. In "Tintern Abbey," for example, Wordsworth finds in "little . . .

unremembered . . .

acts" the chance to hear the "still, sad

music of humanity."In

The Poetics of

Unremembered Acts,

Brian McGrath shows

that poetry's capacity

to address its reader

stages an ethical

dilemma of continued

importance. Situating romantic poems in relation to Enlightenment debate over how to teach reading, specifically debate about the role of poetry in the process of learning to read, *The Poetics of Unremembered Acts* develops an alternative understanding of poetry's role in education. McGrath also explores the ways poetry makes ethics possible through its capacity to pass along what we do not remember and cannot know about our reading.

Boethius *Oceanic Haiku, Other Arts, and Literary Disciplines* investigates the genesis and development of haiku in Japan and determines the relationships between

haiku and other arts, such as essay writing, painting, and music, as well as the backgrounds of haiku, such as literary movements, philosophies, and religions that underlie haiku composition. By analyzing the poets who played major roles in the development of haiku and its related genres, these essays illustrate how Japanese haiku poets, and American writers such as Emerson and Whitman, were inspired by nature, especially its beautiful scenes and seasonal changes. Western poets had a demonstrated affinity for Japanese haiku which bled over into other art mediums, as these chapters discuss. Nature-study: Or, The Art of Attaining Those

Teaching to Complexity Great Medieval Thinkers

This book is a study of the relation between cognitive linguistics and literary theory. Theory of literary interpretation is reinterpreted in terms of current debate in cognitive science. While research in the

humanities and social sciences is reasonably concerned with charting the power of culture to structure and constrain, Spolsky suggests that it is worthwhile to investigate the role of biological materialism as co-legislator of human life and understanding. The inevitable slippage we have come to acknowledge between words and the world has at least an analogue, and presumably also a source, in the workings of the human brain.
