This history of the Romanian Communist Party (RCP) traces its origins as a tiny, clandestine revolutionary organization in the 1920s, to its years in national power from 1944 to 1989, and to the post-1989 metamorphoses.

Talking to My Mum is an activity pack for five-eight-year-olds whose families have experienced domestic abuse to help and encourage them to open up to their mothers about their distressing experiences. Based on the authors' work with families who have experienced domestic abuse, the book is full of illustrated worksheets featuring animal characters who encourage the young reader to explore a range of memories, such as changes in the family's living arrangements or happy memories with siblings or favourite toys that each prompt a particular emotion. These activities are accompanied by guidance on how to use them appropriately. Talking to My Mum is designed for children and their mothers to complete together, and will assist both child and mother with improving communication about the past, present and future. This activity pack will be an essential tool for families with children who have lived through domestic abuse, as well as social workers and other professionals working with them.

Throughout Christian history, apocalyptic visions of the approaching end of time have provided a persistent and enigmatic theme for history and prophecy. Apocalyptic literature played a particularly important role in the medieval world, where legends of the Antichrist, Gog and Magog, and the Last Roman Emperor were widely circulated. Although scholars have long recognized that a body of Byzantine prophetic literature served as the source for these ideas, the Byzantine textual tradition, its sources, and the way in which it was transmitted to the West have never been thoroughly understood. For more than fifteen years prior to his death in 1977, Paul J. Alexander devoted his energies to the clarification of the Byzantine apocalyptic tradition. These studies, left uncompleted at his death, trace the development of a textual tradition that passed from Syriac through Greek to Slavonic and Latin literature. Using a combination of philological and historical detection, the author establishes the time, place, and circumstances of composition for each of the major surviving texts, identifying lost works known only through descriptions. In showing how Byzantine prophecy served as a bridge between ancient eschatological works and the medieval West, Alexander demonstrates that apocalyptic literature represents a creative source for the expression of political and religious thought in the medieval world. " . . . a comprehensive look at an enigmatic era . . . " —Choice "This provocative collection of essays certainly takes some of the polish off Soviet socialism's golden age." —Journal of Interdisciplinary History "The authors and editors of this splendid volume deserve great praise. Their work moves the field of Soviet history several large steps forward." —Slavic Review Lenin's New Economic Policy of the 1920s, although a relatively free and open potential alternative to Soviet communism, was also a time of extreme tension, as Russian society and culture were rocked by the forces of resistance and change. These essays examine the social and cultural dimensions of NEP in urban and rural Russia in the years before Stalin and rapid industrialization.

This book provides an interdisciplinary, unified view of sensual cognition and its cultural manifestations. The contributors favour an ecological perspective and revisit and problematize some of the core assumptions in Cognitive Linguistics. One of the original tenets of CL states that human thinking is grounded in experiential gestalts as well as in interaction between peoples' embodied minds and their various environments or cultures. In addition to looking in detail at this tenet, the volume provides major insights into the methodological and theoretical dimensions of Cognitive Linguistics research and describes applications of the paradigm in diverse contexts and cultures.

Human Communication Theory and Research introduces students to the growing body of theory and research in communication, demonstrating the integration between the communication efforts of interpersonal, organizational, and mediated settings. This second edition builds from the foundation of the original volume to demonstrate the rich array of theories, theoretical connections, and research findings that drive the communication discipline. Robert L. Heath and Jennings Bryant have added a chapter on new communication technologies and have increased depth throughout the volume, particularly in the areas of social meaning, critical theory and cultural studies, and organizational communication. The chapters herein are arranged to provide insight into the breadth of studies unique to communication, acknowledging along the way the contributions of researchers from psychology, political science, and sociology. Heath and Bryant chart developments and linkages within and between ways of looking at communication. The volume establishes an orientation for the social scientific study of communication, discussing principles of research, and outlining the requirements for the development and evaluation of theories. Appropriate for use in communication theory courses at the advanced undergraduate and graduate level, this text offers students insights to understanding the issues and possible answers to the question of what communication is in all forms and contexts.

Ce înseamnă să mori cu demnitate? Medicina modernă poate că găseștemoduri din ce în ce mai eficiente de alupta cu bătrânețea și cu moartea,dar, în cele din urmă, cu toții suntem muritori. Întrebarea pe care o puneautorul este ce poate face medicina pentru a îmbunătăți nu doar viața, ciși sfârșitul acesteia. Pentru că, prea adesea, oamenii își trăiesc bătrânețea în scaune cu rotile, în aziluri în care sunt tratați ca niște copii, sau mor din cauza unor boli grave, chinuiți de medici care nu vor să recunoască faptul că au fost învinși și care insistăsă încerce pe pacient cele mai revoluționare tratamente, în ciuda suferințelorinimaginabile prin care acestatrebuie să treacă inutil. Atul Gawande argumentează că ultimele săptămâni sau luni din viața unui om pot fi trăite cu demnitate, alături de cei dragi și în mediul care l-a făcut fericit. Pentru că, de fapt, scopul principal nu ar trebui să fie o moarte bună, ci o viață bună – până la sfârșitul ei. O carte înțeleaptă și curajoasă, ce pune probleme la care nimeni dintre noi nu vrea să se gândească. The Sunday Times Dr. Gawande arată cum pacienții în faza terminală a bolii lor pot păstra aspecte importante ce țin de calitatea vieții. Wall Street Journal

"Nicholas Cabasilas' Commentary on the Divine Liturgy is a remarkable product of Byzantium's last great flowering of theology. The work has long been essential reading for specialists in the fields of comparative liturgy and history of liturgy, since Cabasilas comments in detail on the Byzantine rite of his day and is able to draw comparisons with the Roman liturgy as well. The work is also invaluable for all those who wish to understand more about the theory and practice of worship in the Orthodox Church. In this edition the text of the Commentary, translated by J. M. Hussey and P. A. McNulty, has been supplemented by a brief foreword which places Cabasilas' work in its historical context. A helpful introduction by R. M. French describes the celebration of the liturgy in the Orthodox Church."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

The book is an edited collection of fourteen chapters, each one of which takes as its starting point a myth, a legend, a story or a fable, and explores its contemporary relevance for a world of globalization, organizations, and consumerism. The book offers a set of probing, original and critical inquiries into the nature of human experience knowledge and truth, the nature of leadership, power and heroic achievement, postmodernity and its discontents, and emotion, identity and the nature of human relations in organizations. Different chapters deal, among pother things, with the nature of leadership in the face of terrorism, friendship, women's position in organizations, the struggle for identity, the curse of insatiable consumption and the ways the hero and heroine are constructed in our times.

It has become increasingly clear that metaphor needs to be explored in terms of the social and discourse context in which it is used, especially where the aim is to address real-world problems. The notion of 'real world' metaphor research has been developed to describe this important area of investigation. This book starts by describing the nature and scope of real world metaphor research and then illustrates, through 17 detailed, mainly empirically-based studies, the different areas it can apply to, and different methodologies that can be employed. Research problems are explored in areas such as artificial intelligence, language teaching and learning, reconciliation dialogue, university lecture discourse, poetry and wine description. Methods include corpus analysis, experimentation, discourse analysis, cross-cultural analysis and genre analysis. In each case the empirical studies refer back to Gibbs's opening overview of real-world research. The result is an invaluable and cross-referenced collection of papers addressing real-world problems.

Does the Christian church replace the nation Israel in the plan of God? The doctrine of supersessionism answers this question in the affirmative. But is supersessionism a biblical doctrine? Michael J. Vlach offers a detailed examination of the view that the church is the new Israel that permanently takes the place of the nation Israel. He surveys the supersessionist view in church history and then examines its hermeneutical and theological arguments. He also presents a case against supersessionism. In a unique way, he lays out the arguments of both supersessionism and non-supersessionism and then offers his analysis of why supersessionism is not consistent with the biblical witness.

Shadow, Self, Spirit - Revised Edition John Benjamins Publishing

"What do Europeans have in common apart from the rights and duties deriving from the treaties? Is there such a thing as 'Europeanness' in the sense of a common identity? Can rights serve as a unifying factor in the new ED of 27 member states? And what are the sources of human identity as such?" "This book addresses these topical issues through a combination of theoretical and philosophical enquiry and empirical analysis. The nature of Political Man is investigated, as well as the sources of identity. The author argues in favour of a broad conception of political rationality and develops a new individualistic approach to the study of identity and culture summarized in the formulation "culture is choice - and choice is culture". The notion that culture and identity are holistic phenomena, something that citizens have to accept as a kind of destiny, is challenged, because with the exception of gender, identity and culture are very much chosen. While the existing literature tends to define culture in terms of customs and habits, the author argues that the emphasis ought to be shifted towards subjective meanings and tastes (broadly defined). But choice is also culture in the sense that humans are cultural beings With cultural needs and the simplistic notions of rational choice and globalization, which assume that human beings are utility maximizers in a narrow, materialistic sense, must therefore be abandoned. From this perspective European identity suddenly looks quite solid: It is based on a variety of sources of identity, and some of the strongest sources of identity are immaterial and cultural. There is such a thing as a cultural community of distance; a sharing of outlook, memories and not least aesthetic experiences."--BOOK JACKET.

[When Culture Becomes Politics](#) Routledge

The vocabulary of wine is large and exceptionally vibrant -- from straight-forward descriptive words like "sweet" and "fragrant", colorful metaphors like "ostentatious" and "brash", to the more technical lexicon of biochemistry. The world of wine vocabulary is growing alongside the current popularity of wine itself, particularly as new words are employed by professional wine writers, who not only want to write interesting prose, but avoid repetition and cliché. The question is, what do these words mean? Can they actually reflect the objective characteristics of wine, and can two drinkers really use and understand these words in the same way? In this second edition of *Wine and Conversation*, linguist Adrienne Lehrer explores whether or not wine drinkers (both novices and experts) can in fact understand wine words in the same way. Her conclusion, based on experimental results, is no. Even though experts do somewhat better than novices in some experiments, they tend to do well only on wines on which they are carefully trained and/or with which they are very familiar. Does this mean that the elaborate language we use to describe wine is essentially a charade? Lehrer shows that although scientific wine writing requires a precise and shared use of language, drinking wine and talking about it in casual, informal setting with friends is different, and the conversational goals include social bonding as well as communicating information about the wine. Lehrer also

shows how language innovation and language play, clearly seen in the names of new wines and wineries, as well as wine descriptors, is yet another influence on the burgeoning and sometimes whimsical world of wine vocabulary.

Often called "the Kafka of Romania," Max Blecher died young but not before creating this incandescent novel. *Adventures in Immediate Irrreality*, the masterwork of the Romanian writer Max Blecher, vividly paints the crises of "irreality" that plagued him in his youth: eerie and unsettling mirages wherein he would glimpse future events. In gliding chapters that move with a peculiar dream logic of their own, this memoiristic novel sketches the tremulous, frightening, and exhilarating awakenings of a young man.
