Razprave v tej knjigi razvijajo teoretične diskurze, oprte na splošno stanje sodobne evropsko-ameriške literarne vede in na nekatere njene kontekste v obči znanstveni teoriji in metodologiji, v filozofiji in še posebej v humanističnih vedah; sklicujejo in navezujejo se na prakse literarnozgodovinskega raziskovanja in pisanja, seveda predvsem na slovensko, med drugimi (glede na izvor sodelavcev) pa še posebej na srednjeevropske. Avtorje družijo izhodiščno stališče, da je zgodovinsko obravnavanje literature danes sicer res z mnogih vidikov problematično, a vendar mogoče in s spoznavnega vidika relevantno, če ne celo nujno.

Abstract Algebra, 4th Edition is designed to give the reader insight into the power and beauty that accrues from a rich interplay between different areas of mathematics. The book carefully develops the theory of different algebraic structures, beginning from basic definitions to some in-depth results, using numerous examples and exercises to aid the reader's understanding. In this way, readers gain an appreciation for how mathematical structures and their interplay lead to powerful results and insights in a number of different settings.

Dalmatia between Ottoman and Venetian Rule

Viella Libreria Editrice
When the scientific study of the Black Sea Region began in the late 18th and early 19th centuries, initially commissioned by adjacent powers such as the Habsburg and the Russian empires, this terra incognita was not yet considered part of Europe. The eighteen chapters of this volume show a broad range of thematic foci and theoretical approaches - the result of the enormous richness of the European macrocosm and the BSR. The microcosms of the many different case studies under scrutiny, however, demonstrate the historical dimension of exchange between the allegedly opposite poles of 'East' and 'West' and underscore the importance of mutual influences in the development of Europe and the BSR.
With Stalin against Tito Cornell University Press

This textbook is a complete, self-sufficient, self-study/tutorial-type source of mathematical problems. It serves as a primary source for practicing and

developing mathematical skills and techniques that will be essential in future studies and engineering practice. Rigor and mathematical formalism is drastically reduced, while the main focus is on developing practical skills and techniques for solving mathematical problems, given in forms typically found in engineering and science. These practical techniques are split into three separate books: the topics of algebra, complex algebra, and linear algebra (Vol. I), calculus of single and multiple argument functions (Vol. II), and continues and discrete Convolution and Fourier integrals/sums of typical functions used in signal processing, in addition to Laplace transform examples (Vol. III)

In 1948 in a series of moves that culminated in the famous Cominform Resolution, Stalin struck at the Communist Party in Yugoslavia, provoking the first split in the Communist state system. With this long-awaited book, Ivo Banac becomes the first scholar to assess the domestic consequences of Yugoslavia's expulsion from the Cominform, and his findings will radically revise some of our most basic assumptions about Tito's revolution. Banac's subject is the nature and fate of those elements in the Yugoslav Communist party who were said to have sided with Moscow against their own country's leadership. He demonstrates that the so-called Cominformists represented as much as twenty-percent of the party membership and had widely divergent aims. He then reconstructs the history of the labyrinthine factional

struggles that preceded and accompanied the 1948 split and shows that, as always, the national question played the dominant role in Yugoslav politics. After identifying the members of the opposition and mapping its course, Banac recounts the harsh repression of the movement. He provides massive documentation of startling irony: the conflict with Stalin played the same part in the shaping of Yugoslavia's political system as the collectivization and purges of the 1930's did in the history of Soviet communism.

A member of the Energy Therapies

family - which includes, acupuncture,

acupressure and shiatsu - Emotional

Freedom Technique is a simple and

increasingly popular self- development

therapy used to treat a wide range of

physical and emotional issues.

Popularised by figures including Paul

McKenna, EFT is based on the theory

that negative emotions are caused by

disturbances in the body's energy. Often

referred to as acupuncture without

needles, EFT involves locating and

tapping on meridian points in the body

while thinking of a negative emotion and

using positive suggestion and thoughts

to alter the body's energy flow, restore

balance and reprogram thought

processes. This no-nonsense guide

introduces readers to the theories and

methods behind the technique and

shows them how to use it to reduce the

physical and emotional impact of a wide

range of issues including, depression,

fears, phobias, anger, addictions,

sleeplessness and pain. It's simple, safe,

anyone can practice it at home and with

EFT For Dummies readers can banish

This book gives an overview of the crucial events that took place during the passage from the Ottoman to the Venetian rules in the Dalmatian hinterland during the Candian and Morean Wars in the second half of the 17th century. The hinterland of the capital city of the Venetian dual province of Dalmatia and Albania - the city of Zadar/Zara - has been used here as a case study to depict all the changes relating to: inhabitation, the appearance of settlements, changes in the populations and migrations, the forms and models of administrative and

political institutions, specific border economies and the development of Venetian border areas through trade with the Ottomans alongside agriculture in the contado. Studied here is how the city of Zadar, whose life was organised as a typical coastal community like many in the Venetian Republic along with its contado, managed to enlarge its territory and incorporate elements of Ottoman political, administrative and cultural heritage along with thousands of Ottoman Christian subjects.
