Racist America Emerald Group Publishing

In this accessible combination of post-colonial theory, feminism and pedagogy, the author advocates using subversive and contemporary artistic representations of women to remodel traditional stereotypes in education. It is in this key sector that values and norms are molded and prejudice kept at bay, yet the legacy of colonialism continues to pervade official education received in classrooms as well as 'unofficial' education ingested via popular culture and the media. The result is a variety of distorted images of women and gender in which women appear as two-dimensional stereotypes. The text analyzes both current

and historical colonial representations of women in a pedagogical context. In doing so, it seeks to recast our conception of what 'difference' is, challenging historical, patriarchal gender relations with their stereotypical representations that continue to marginalize minority populations in the first world and billions of women elsewhere. These distorted images, the book argues, can be subverted using the semiology provided by postcolonialism and transnational feminism and the work of contemporary artists who rethink and recontextualize the visual codes of colonialism. These resistive images, created by women who challenge and subvert patriarchal modes of representation, can be used to create educational environments that provide an alternative view of women of non-western origin.

Barron's Regents Exams and Answers: Global History and Geography 2020 provides essential practice for students taking either the Global History and Geography "Transition Exam" or the "Global History and Geography II Exam", including actual recently administered "Transition Exams", thorough answer explanations, and an online access to an overview of the "Global History and Geography II Exam." All Regents test dates for 2020 have been canceled. Currently the State Education Department of New York has released tentative test dates for the 2021 Regents. The dates are set for January 26-29, 2021, June 15-25, 2021, and August 12-13th. This book features: Four actual, recently administered Regents Global History and Geography "Transition Exams" so students can get familiar with the test Thorough explanations for all answers Self-analysis charts and Regents specifications grids to help identify strengths and weaknesses A detailed overview of the "Transition Exam" Test-taking tips and helpful hints for answering all question types on the "Transition Exam" A thorough glossary that covers all important terms, international organizations, agreements, and people from 1750 to the present A webpage that contains an overview of the "Global History and Geography II Exam" and answers to frequently asked questions about that version of the exam Looking for additional practice and review? Check out Barron's Regents Global History and Geography Power Pack 2020 two-volume set, which includes Let's Review Regents: Global History and Geography in addition to Regents Exams and Answers: Global History and Geography. *What's Holding You Back?* Simon and Schuster

A biologist and an anthropologist use evolutionary biology to explain the causes and inform the prevention of rape. In this

controversial book, Randy Thornhill and Craig Palmer use evolutionary biology to explain the causes of rape and to recommend new approaches to its prevention. According to Thornhill and Palmer, evolved adaptation of some sort gives rise to rape; the main evolutionary question is whether rape is an adaptation itself or a by-product of other adaptations. Regardless of the answer, Thornhill and Palmer note, rape circumvents a central feature of women's reproductive strategy: mate choice. This is a primary reason why rape is devastating to its victims, especially young women. Thornhill and Palmer address, and claim to demolish scientifically, many myths about rape bred by social science theory over the past twenty-five years. The popular contention that rapists are not motivated by sexual desire is, they argue, scientifically inaccurate. Although they argue that rape is biological, Thornhill and Palmer do not view it as inevitable. Their recommendations for rape prevention include teaching young males not to rape, punishing rape more severely, and studying the effectiveness of "chemical castration." They also recommend that young women consider the biological causes of rape when making decisions about dress, appearance, and social activities. Rape could cease to exist, they argue, only in a society knowledgeable about its evolutionary causes. The book includes a useful summary of evolutionary theory and a comparison of evolutionary biology's and social science's explanations of human behavior. The authors argue for the greater explanatory power and practical usefulness of evolutionary biology. The book is sure to stir up discussion both on the specific topic of rape and on the larger issues of how we understand and influence human behavior.

*Let's Review* U of Minnesota Press

The Cylinder investigates the surprising proliferation of cylindrical objects in the nineteenth century, such as steam engines, phonographs, panoramas, rotary printing presses, silos, safety locks, and many more. Examining this phenomenon through the lens of kinematics, the science of forcing motion, Helmut Müller-Sievers provides a new view of the history of mechanics and of the culture of the industrial revolution, including its literature, that focuses on the metaphysics and aesthetics of motion. Müller-Sievers explores how nineteenth-century prose falls in with the specific rhythm of cylindrical machinery, re-imagines the curvature of cylindrical spaces, and conjoins narrative progress and reflection in a single stylistic motion. Illuminating the intersection of engineering, culture, and literature, he argues for a concept of culture that includes an epoch's relation to the motion of its machines.

Brief View In Global Studies. MIT Press

Racist America is a bold, thoughtful exploration of the ubiquity of race in contemporary life. It develops an antiracist theory rooted not only in the latest empirical data but also in the current reality of racism in the U.S.

This book brings together distinguished scholars, community college practitioners, and emerging leaders to expand upon

existing theories, provide reflection on practice, and demonstrate the dynamic nature of community college internationalization. There is a special challenge for United States community colleges to move from selected international programs that impact a few students to sustainable change that influences the entire college community. A key importance is realization that reform is not based on chance, but on intentional designs that are intended to guide future endeavors. The research, case studies, and experiences of the authors in this book are both inspiring and critical in the quest to encourage an academic shift for long-term change that promotes international literacy as an integral component of the community college and celebrates the needs of the changing local communities.

*Global 2000 Revisited* Routledge

In a long overdue contribution to geography and social theory, Katherine McKittrick offers a new and powerful interpretation of black women's geographic thought. In Canada, the Caribbean, and the United States, black women inhabit diasporic locations marked by the legacy of violence and slavery. Analyzing diverse literatures and material geographies, McKittrick reveals how human geographies are a result of racialized connections, and how spaces that are fraught with limitation are underacknowledged but meaningful sites of political opposition. *Demonic Grounds* moves between past and present, archives and fiction, theory and everyday, to focus on places negotiated by black women during and after the transatlantic slave trade. Specifically, the author addresses the geographic implications of slave auction blocks, Harriet Jacobs's attic, black Canada and New France, as well as the conceptual spaces of feminism and

Sylvia Wynter's philosophies. Central to McKittrick's argument are the ways in which black women are not passive recipients of their surroundings and how a sense of place relates to the struggle against domination. Ultimately, McKittrick argues, these complex black geographies are alterable and may provide the opportunity for social and cultural change. Katherine McKittrick is assistant professor of women's studies at Queen's University. Psychological Testing and Assessment Springer Science & Business Media

This volume arises from the NATO Advanced Research Workshop (ARW) on 'North African Cretaceous rudist and coral formations and their contributions to carbonate platform development', which was held in Tunisia, on 13-18 May, 2002. It was convened by M. El Hedi Negra (Universite 7 Novembre de Carthage, now Universite de Tunis El Manar, Tunisia) and Eulalia Gili (Universitat Autonoma de Barcelona, Spain). The aims of the ARW were: (1) to review and critically assess currently available data on rudist/coral formations in North African Cretaceous carbonate platforms, and their correlations, and to integrate these data with other studies around the Mediterranean; (2) to place the findings in a global context, noting both similarities with other regions of platform development as well as local differences, and (3) exploring possible reasons for these; and to help promote the creation of a vibrant peri-Mediterranean collaborative research community, embracing researchers from the entire region, to carry forward this ambitious research programme. Twenty-two presentations (oral and poster) provided both topical reviews (covering rudist evolution, and ecology, mineralogical changes, applications of strontium isotope, and graphic correlation

methods, and platform typology) as well as regional syntheses (Tunisian reservoirs, Moroccan platform history, Tunisian platforms and rudist/coral facies, Algerian platforms, and Egyptian platforms). Fifteen of these presentations are expanded here as papers. The workshop was attended by 24 academic staff, 4 geologists from the oil industry, plus several observers and students.

University of California Press

Global History & Geography Regents prep book This book includes all the information students need to ace the Regents in a clear and student-friendly format with a lot of hints and Regents taking tips. A full section chock full of a step by step guideline on how to how to answer the new Global Regents style questions will help every student who uses this book ace the Regents!

*Responsible Conduct of Research* Cambridge University Press  
Barron's Regents Exams and Answers: Algebra II provides essential review for students taking the Algebra II (Common Core) exam, including actual exams administered for the course, thorough answer explanations, and comprehensive review of all topics. This edition features: Six actual, administered Regents exams so students have the practice they need to prepare for the test Comprehensive review questions grouped by topic, to help refresh skills learned in class Thorough explanations for all answers Score analysis charts to help identify strengths and weaknesses Study tips and test-taking strategies All algebra II topics are covered, including Polynomial Equations, Rational Equations, Exponential and Logarithmic Equations, Systems of Equations with Three Variables, Functions, Sequences, and

Probability. Looking for additional practice and review? Check out Barron's Regents Algebra II Power Pack two-volume set, which includes Let's Review Regents: Algebra II in addition to the Regents Exams and Answers: Algebra II book.

A Global History of The Earlier Palaeolithic Taylor & Francis

"Japan's official efforts at internationalization have been painful to witness. . . . The government's JET program is easily the most ambitious and its history and on-the-ground problems offer significant insights into Japan's struggle to open up to the outside. David McConnell's book provides a most interesting analysis of why this process has been so complex and difficult. It tells us much about Japanese society and education at this critical point in time."—Thomas P. Rohlen, author of *For Harmony and Strength* "In this superb and insightful book, David McConnell explores perhaps the greatest (certainly the biggest) education program in humankind's history, offering patient, balanced analysis of its workings, problems, and accomplishments. McConnell's confucian equanimity and multifaceted perspectives lend the book a depth seldom found in contemporary writing on Japan."—Robert Juppe, First ALT Advisor for the JET Program "This is a very astute, thorough, and personal account of the JET program as a case study of how a program can both change a system and provoke defenses against any change. With his fine ethnographic and analytic material, McConnell reveals the faultlines of "internationalization" in Japan. This is a great contribution to the study of organizations, marginality, and shifts in global and national identity."—Merry White, author of *Japanese Families: It Takes a Nation*  
*Student-staff Directory* Springer

In a remarkable decade of public investment in higher education, some 200 new university campuses were established worldwide between 1961 and 1970. This volume offers a comparative and connective global history of these institutions, illustrating how their establishment, intellectual output and pedagogical experimentation sheds light on the social and cultural topography of the long 1960s. With an impressive geographic coverage - using case studies from Europe, the Americas, Africa and Asia - the book explores how these universities have influenced academic disciplines and pioneered new types of teaching, architectural design and student experience. From educational reform in West Germany to the establishment of new institutions with progressive, interdisciplinary curricula in the Commonwealth, the illuminating case studies of this volume demonstrate how these universities shared in a common cause: the embodiment of 'utopian' ideals of living, learning and governance. At a time when the role of higher education is fiercely debated, *Utopian Universities* is a timely and considered intervention that offers a wide-ranging, historical dimension to contemporary predicaments.

Importing Diversity Univ of California Press

Between 1944 and 1996, Guatemala experienced a revolution, counterrevolution, and civil war. Playing a pivotal role within these national shifts were students from Guatemala's only public university, the University of San Carlos (USAC). USAC students served in, advised, protested, and were later persecuted by the government, all while crafting a powerful student nationalism. In no other moment in Guatemalan history has the relationship between the university and the state been so mutable, yet so

mutually formative. By showing how the very notion of the middle class in Guatemala emerged from these student movements, this book places an often-marginalized region and period at the center of histories of class, protest, and youth movements and provides an entirely new way to think about the role of universities and student bodies in the formation of liberal democracy throughout Latin America.

*Testing Regimes, Accountabilities and Education Policy* Springer Science & Business Media

"Joe Feldman shows us how we can use grading to help students become the leaders of their own learning and lift the veil on how to succeed. . . . This must-have book will help teachers learn to implement improved, equity-focused grading for impact."

—Zaretta Hammond, Author of *Culturally Responsive Teaching & The Brain Crack* open the grading conversation Here at last—and none too soon—is a resource that delivers the research base, tools, and courage to tackle one of the most challenging and emotionally charged conversations in today's schools: our inconsistent grading practices and the ways they can inadvertently perpetuate the achievement and opportunity gaps among our students. With *Grading for Equity*, Joe Feldman cuts to the core of the conversation, revealing how grading practices that are accurate, bias-resistant, and motivational will improve learning, minimize grade inflation, reduce failure rates, and become a lever for creating stronger teacher-student relationships and more caring classrooms. Essential reading for schoolwide and individual book study or for student advocates, *Grading for Equity* provides a critical historical backdrop, describing how our inherited system of grading was originally set

up as a sorting mechanism to provide or deny opportunity, control students, and endorse a "fixed mindset" about students' academic potential—practices that are still in place a century later. A summary of the research on motivation and equitable teaching and learning, establishing a rock-solid foundation and a "true north" orientation toward equitable grading practices. Specific grading practices that are more equitable, along with teacher examples, strategies to solve common hiccups and concerns, and evidence of effectiveness. Reflection tools for facilitating individual or group engagement and understanding. As Joe writes, "Grading practices are a mirror not just for students, but for us as their teachers." Each one of us should start by asking, "What do my grading practices say about who I am and what I believe?" Then, let's make the choice to do things differently . . . with *Grading for Equity* as a dog-eared reference.

[A Global History of War](#) Bloomsbury Publishing

In the first half of the twentieth century, Jack Trice, Ozzie Simmons, and Johnny Bright played college football for three Iowa institutions: Iowa State University, the University of Iowa, and Drake University, respectively. At a time when the overwhelming majority of their opponents and teammates were white, the three men, all African American, sustained serious injuries on the gridiron due to foul play, either because of their talents, their race, or, most likely, an ugly combination of the two. *Moments of Impact* tells their stories and examines how the local communities of which they were once a part have forgotten and remembered those assaults over time. Of particular interest are the ways those memories have been expressed in a number of commemorations, including a stadium name, a trophy, and the

dedication of a football field. Jaime Schultz focuses on the historical and racial circumstances of the careers of Trice, Simmons, and Bright as well as the processes and politics of cultural memory. Schultz develops the concept of “racialized memory”—a communal form of remembering imbued with racial significance—to suggest that the racial politics of contemporary America have generated a need to redress historical wrongs, congratulate Americans on the ostensible racial progress they have made, and divert attention from the unrelenting persistence of structural and ideological racism.

**Global Boosters** ReadHowYouWant.com

This masterpiece by Engels reflects his views on the plight of labour classes in England. It is based on his in-depth research and parliamentary reports. In a factual and analytic manner he has voiced his support for fundamental human rights. It is an emphatic protest against the barbarianism of capitalism and

industrialization. A prototypical opus!

*International Education at Community Colleges* Univ of California Press

Austin writes about the glass ceiling that women unconsciously build in concert with external pressures against their achievements. She identifies eight issues affecting women's ability to achieve. Concrete plans sketch out actions for success to aid women at any level.

[An ABC for Baby Patriots](#) Routledge

Recent scandals and controversies, such as data fabrication in federally funded science, data manipulation and distortion in private industry, and human embryonic stem cell research, illustrate the importance of ethics in science. Responsible Conduct of Research, now in a completely updated second edition, provides an introduction to the social, ethical, and legal issues facing scientists today.
